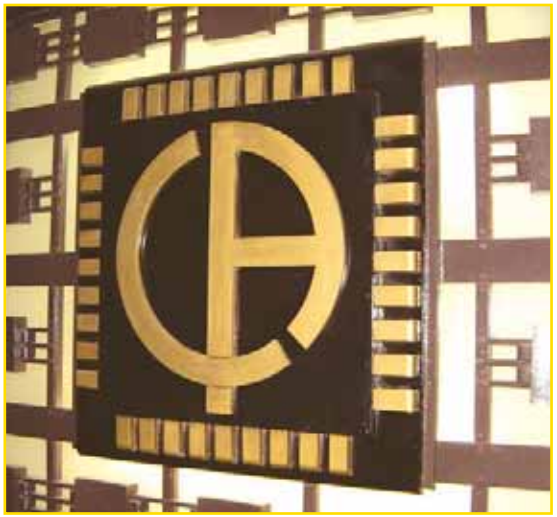
ABOUT THE CHAUVIN ARNOUX GROUP



Logo on the company's former main gate

AN AMAZING **STORY!**

Every story starts somewhere. The story of the Chauvin Arnoux company as an inventor and manufacturer of measurement instruments since 1893 is rich in developments and innovations. Today, its products bear witness to and reflect the sociological and technological changes and the industrial innovations which marked the previous century. A fascinating story that explains why and how Chauvin Arnoux's image and personality evolved... in two colours.

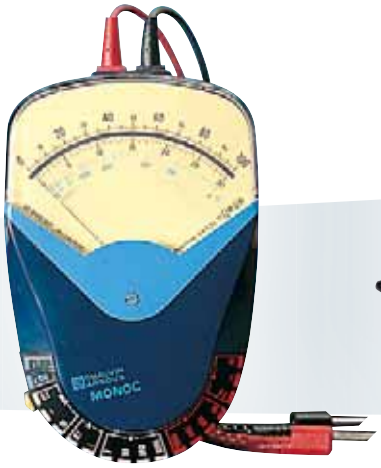
It is often said that at the root of knowledge is language, or that the origin of an innovation was an idea,... yet it is the individual, the person, who is really the source of knowledge and discoveries. This also applies to electricity, which was not invented in the 19th century, but discovered in the 6th century BCE by a Greek philosopher and scientist named Thales, the first person to note the electrostatic properties of amber.

From the beginning of the 19th century, there was the yellow of amber. Then manufactured goods began to include the yellow of brass and copper, materials used in measurement instruments, either for the casings of galvanometers or for the connections of electrical measurement instruments. Beige was also introduced with the use of varnished wood in the casings, while black was reserved for the instruments' dials. Right from the start in 1893, the contrast between black and the yellow of varnished wood soon became the norm for the measurement instruments produced by Chauvin Arnoux.

In a relatively short time, between 1900 and 1936, with the development of new technologies and new techniques for working materials, yellow brass began to be used with black Bakelite, eventually spreading to nearly all our instruments.
Already known for its sense of design and the combination of its original colours yellow brass and

1895 reflection galvanometer

This calibration potentiometer dating from 1900 was used with a standard battery and a galvanometer like the one shown above. Its price was 195 francs!



The Monoc L

CdA 600 Polyclamp (1982)

ABOUT THE CHAUVIN ARNOUX GROUP

black, in its measurement instruments, Chauvin Arnoux reproduced these colours in its first corporate logo in 1927.
In the 1940s, many measurement instruments only used black or black and the silver-grey of ferrous metals, sometimes painted. Chauvin Arnoux adapted its original visual identity to suit the fashions of the time, which also corresponded to technical criteria for safety, life-span extension or weight considerations linked to the metal and the manufacturing process used.

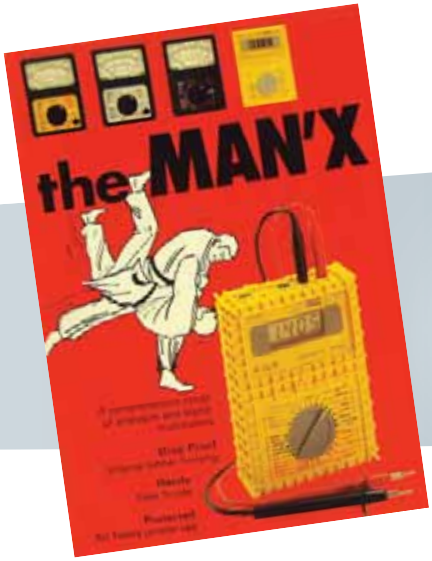
The 1950s saw the arrival of rubber-like materials, used for the bases of portable instruments, and subsequently for the shockproof sheaths made of black neoprene, first designed and patented by Metrix® and Chauvin Arnoux in 1958. These shockproof sheaths later became widely used on the handheld instrument market.

With the 1970s came plastics technology. This was when Chauvin Arnoux launched worldwide its first innovative products made of black and yellow plastic: the CdA 8 tester in 1979, the CdA 600 multimeter clamp in 1982, followed by the whole range. Some earth testers, such as the Terca in 1985 and the Prowatt wattmeters in 1989, also had a yellow casing. **The combination of yellow and black** for on-site equipment began to spread with its use for safety signage and for identifying hazardous areas on site…
This encouraged Chauvin Arnoux to launch the well-known IMEG 500 or ISOL1000 series in Europe and then in the United States with the company's two colours.

The MAN'X 500 series launched by Chauvin Arnoux, the very first multimeters made of a flexible material, further strengthened the company's visual identity.
At about the same time, Metrix launched several products with yellow casings and black platens, including the instruments in its MX 44 series (1988) followed by the MX 51 series.
Over the years, Chauvin Arnoux has developed its visual identity across all its product ranges: its multimeters, wattmeters, megohmmeters and installation testers all bear the company's colours

One last remark about colours: while yellow is always seen as the colour of the sun and of certain kings or emperors in Asia, it is not so widely known that in physics, black is the symbol of a "black body", meaning a system which absorbs all the light it receives. Black and yellow? A historic tandem for Chauvin Arnoux which was the first company to use this pairing for its corporate visual identity in the early 20th century when it first designed its logo in 1927.

Axel Arnoux



On both the French MICA multimeter in 1985 and the ANAGRAF American version available the same year, the yellow of Chauvin Arnoux is clearly in evidence.

MX 51

MEASUREMENT EXPERTS

Founded in 1893 by **Raphaël Chauvin** and **René Arnoux**, **CHAUVIN ARNOUX** is an expert in the measurement of electrical and physical quantities in the industrial and tertiary sectors.
Total control of product design and manufacturing in-house enables the Group to innovate constantly and to propose a very broad product and service offering meeting all its customers' needs.
The Group's **quality policy** enables it to deliver products which comply with the specifications, as well as the international and national standards, in the metrological, environmental and user-safety sectors.

A FEW FIGURES

100 million euros
of sales revenues

10 subsidiaries across the world

900 employees

CHAUVIN ARNOUX TEST & MEASUREMENT

CHAUVIN ARNOUX, the French international Group specialized in electrical measurement, relies on its **Chauvin Arnoux®** brand to propose a wide range of **portable measuring instruments**.

Its offering covers:
- **electrical measurement** (testers, multimeters and current clamps)
- **electrical safety testing** (insulation testers, ohmmeters, earth/ground testers)
- **power recording and analysis** (wattmeters and network quality analysers)
- **measurement of physical** quantities (thermal cameras, luxmeters, sound level meters)

Laboratory and educational instruments (training benches and cases) complete the scope of its expertise.

KNOW-HOW ACKNOWLEDGED IN ALL SECTORS OF ACTIVITY

Electrical production, transmission, distribution, installation & maintenance

Tertiary and industrial maintenance, diagnostics & testing

Improvement of energy efficiency

R&D and laboratory work

Education

QUALITY, STANDARDS AND ECO-RESPONSIBLE APPROACH

Eco Conception

"Eco Conception" eco-design label for product development based on an eco-friendly approach

ISO 9001 • ISO 14001 CERTIFICATION

Intertek

The Group's ISO 9001 certification for the design processes and ISO 14001 certification for the manufacturing and sales processes demonstrate its determination to reconcile business and protection of the environment.

- Portable testers and multimeters
- Current clamps & multimeter clamps
- Insulation, earth and continuity testers
- Installation and electrical equipment testers
- Wattmeter-energy meters & electrical disturbance analysers
- Thermal cameras, thermometers, tachometers, field meters, luxmeters, etc.
- Recorders
- Training benches

In our laboratories, we carry out **strict quality inspections and tests at each stage in the design and manufacturing processes**: functional and metrological testing, mechanical and climatic testing, electromagnetic compatibility testing, electrical safety testing, ageing tests, etc.

A LINK BETWEEN YOU AND US

The Chauvin Arnoux Group has always attached great importance to its communication with the outside world. **Convinced that it is essential to dialogue with all its partner distributors and customers**, the Group uses **diverse communication media** to **maintain this link** via magazines, technical journals, its website, its presence in the specialist press and the main industrial platforms.

CONTACT MEASUREMENT NEWS

A magazine for customers focusing on the Group's news and innovations, **Contact Measurement News** remains the best place for **technical information from the companies in the Group**. Sent out to 48,000 readers and available in the distribution networks all over the world, this thirty-page magazine is printed in colour on glossy paper and is available in three languages.

LES CAHIERS DE L'INSTRUMENTATION

"Les Cahiers de l'Instrumentation" is a magazine providing information for the education sector. It is published traditionally to coincide with the annual Educatec trade fair. Its twenty colour pages include practical exercises highlighting solutions, information on the standards and practical case studies involving measuring instruments, testers or energy-control equipment.
A firm favourite among teachers in technical education, this magazine serves as a bridge between students and the world of business.

40 years of communication to stay close to you and maintain your trust

- Contact Measurement News
- "Les Cahiers de l'instrumentation"
- Website 3.0

WEBSITE 3.0

Everyone agrees that the **Web 3.0** is a question of mobility, connected things and data. Internet access is increasingly nomadic. Information may be accessed anywhere, at any time. The Chauvin Arnoux Group has understood this and taken it fully on board, proposing a **new, totally redesigned website** which accompanies Internet users as they browse. **Finding, sharing and combining information** are now much easier. A new conception of the web with a single purpose: **to offer users relevant, customized information** on each of the Group's brands: Chauvin Arnoux®, Enerdis®, Pyrocontrole® and Manumesure.

FOCUS ON IMAGES

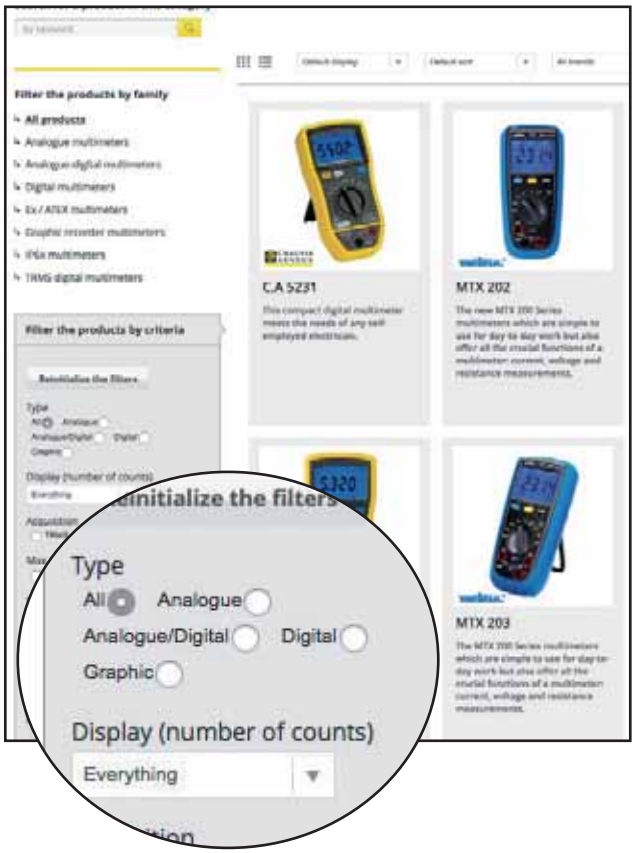
Because a website without pictures is a website which isn't working, **chauvin-arnoux.com** gives pride of place to all the images on the site. Whether they involve corporate matters, applications, expertise or products, they place the company at the heart of a system which values complementarity between the different brands. They give the image of a **structured Group** by using **an identical presentation layout for each of the Group's companies.**

TRANSVERSE EXPERTISE

Multiplying the number of ways in to give internet users direct access to the information while limiting the number of clicks necessary: that's the challenge taken up by the Group. The **transverse nature of the four companies' skills** thus becomes obvious. Moving from one site to another, from one skill to another, via the history of the Group, the training schedule, the press and career opportunities, everything combines to make browsing **simple, effective and quick.**

A CLARIFIED PRODUCT OFFERING

Each company in the Group presents the scope of its offering by means of its products, expertise, applications or publications. Internet users have direct access to all the information linked to a product or complete range of products. The **search engine** quickly allows you find a product datasheet simply by entering a few keywords. You can also refine the search by using "**faceted**" **navigation** based on technical parameters which you check or uncheck, as required. In this way, internet users can **very quickly target the product** which meets their needs. This helps save precious time for visitors in a hurry.



The whole site is multilingual, available in French, English, Spanish, Italian and German. And each subsidiary has its own website which is consistent with the Group site.

CHAUVIN ARNOUX, A CERTIFIED TRAINING ORGANIZATION SINCE 1993

The Chauvin Arnoux Group proposes six one-day training modules. Whether you need theoretical training or practical experience based around a product, choose the market leader to train you and your staff.

New in 2016: a training course dedicated to energy auditing so that you perform the right measurements.

ENERGY AUDITS: OPT FOR THE RIGHT MEASUREMENTS

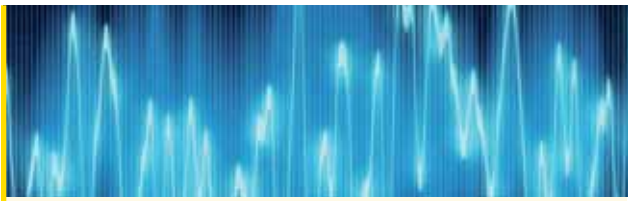
- The advantages of energy auditing
- Economical, environmental and regulatory constraints
- People authorized to perform an energy audit
- Towards a continuous improvement process: the ISO 50001 standard
- Choosing the right measuring tool
- Defining the potential sources of energy savings and the related measurements
- Implementing appropriate solutions

UNDERSTANDING AND OVERCOMING HARMONICS

- The basics of harmonic phenomena.
- Identifying and characterizing the sources of disturbances.
- Measuring and detecting the phenomena in experimental conditions using a harmonic analyser.
- The applicable standards and labels.
- Understanding the effect of harmonics on the electrical components using real cases.
- How to deal with harmonic disturbances.

ELECTRICAL INSTALLATIONS AND ENERGY QUALITY

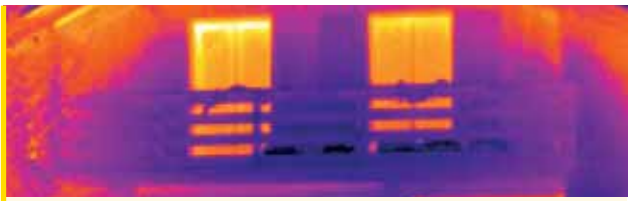
- Excessive consumption of reactive energy leading to penalty payments.
- Loss of service continuity at the first fault on an IT system.
- Untimely tripping of the circuit-breakers protecting industrial electrical equipment.
- Untimely tripping of RCDs.
- Random fault on an electricity distribution system.



ELECTRICAL INSTALLATIONS AND NF C 15-100

- Properties and objectives of the earth/ground connection systems
- Behaviour of the earth/ground connection systems with regard to harmonics
- Insulation resistance measurement
- Electrical continuity measurements on protective conductors
- Resistance measurements on earth/ground electrodes
- Residual Current Device (RCD) testing

CERTIFICATION NUMBER 11.92.06217.92



THERMOGRAPHY

- Understanding heat exchange phenomena.
- Measuring with an infrared thermographic camera.
- Interpreting the measurements.
- Overview of all the applications of thermography and the current obligations.

C.A 8336 NETWORK ANALYSER

- Setup and connections
- Presentation of the various measurements and functions: waveforms, harmonics, transients, alarms, etc.
- Recording and measurement campaigns
- Analysis of the measurement results
- Simulation exercise with the instrument on an electrical model

Training provided on the Chauvin Arnoux Group's historic site in the 18th Arrondissement of Paris

- Expert training instructors acknowledged in their fields
- Innovative demonstration equipment to understand and operate
- Limited number of participants for high-quality discussions

Detailed training schedule and registration form available from **www.chauvin-arnoux.com** or by sending a simple request to **formation@chauvin-arnoux.com**

TRAINING IS AN ESSENTIAL ADVANTAGE IN ANYONE'S CAREER.

- Favouring skills development
- Gaining access to the different levels of qualification
- Obtaining authorizations

UNIVERSAL TEST & MEASUREMENT

THE STANDARDS

EN 60529

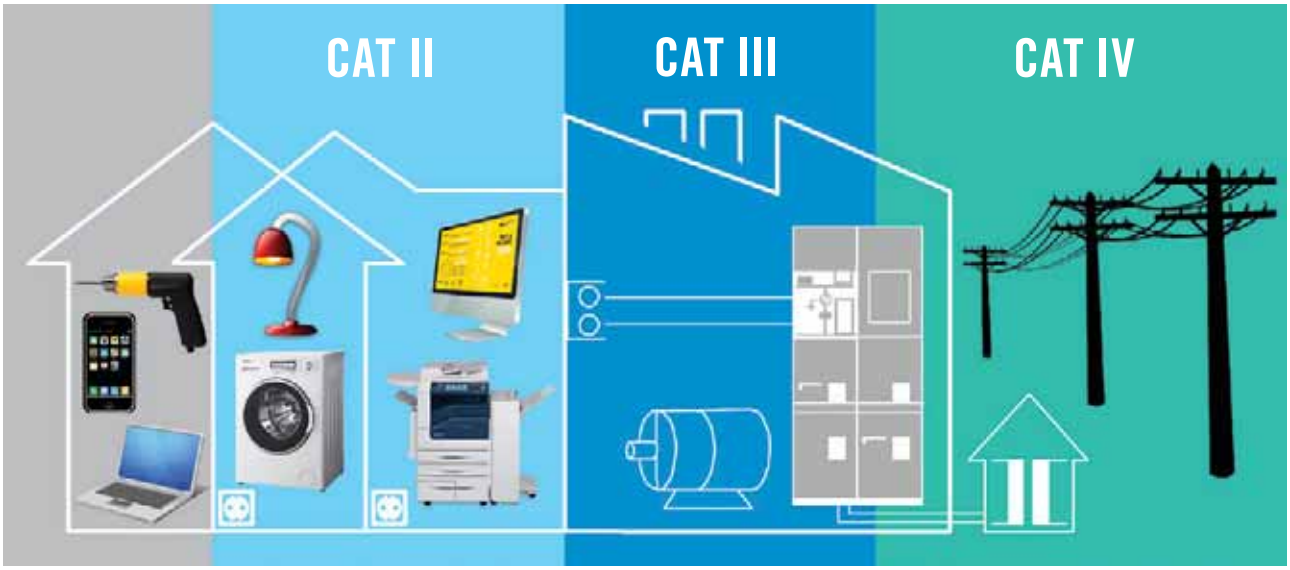
The EN 60529 standard defines the level of tightness(leakproofing) of an instrument against penetration by solids or water. The IP rating corresponds to the instrument's level of protection against penetration by solids (1st digit) and by water (2nd digit). The higher the rating, the more effective the protection. A product without protection corresponds to a rating of IP00 (minimum rating), whereas a product totally protected against penetration by solids and liquids would have a rating of IP68 (maximum rating).

IEC 61010

This international standard defines the safety rules for electrical measuring, control and laboratory instruments. It helps to **ensure** that the design and construction of the instruments **protect users and their environment** against: electric shocks, burns, mechanical hazards, the spread of fire from these instruments, excessive temperatures, etc.

For some types of instrument, this standard is completed by specific instructions.

The development of industrial and domestic equipment is increasing the hazards which may be encountered on an electrical installation, notably in terms of ever-higher voltage surges. On LV installations, where the voltages are limited to 1,000 VAC and 1,500 VDC, **the hazard levels depend the type of installation and the voltage level.**



CAT II : **Measurements on circuits connected directly to the low-voltage installation.**

Examples: domestic distribution system, portable or domestic appliances and equipment, mains power sockets.

CAT III : **Measurements on the building's installation.**

Examples: fixed installations involved in industrial distribution and the input circuits for electrical maintenance of a building (lighting, lift, etc.).

CAT IV : **Measurements at the source of the low-voltage installation.**

Examples: direct distribution circuit, primary sources, overhead-line and cable systems, including distribution busbars and the associated protective equipment against voltage surges.

The international standards in the IEC 61010 family concern the safety rules for electrical measuring, control and laboratory instruments and their uses. More specifically, **the IEC 61010-031 standard** and its amendment A1 which define the safety rules **for measuring instruments** and accessories used with them. In the new edition which came into force on 1st March 2011, this standard has been completed with Chapter 13 covering "prevention of hazards linked to short-circuits and electric arcs":

This addition stipulates the following rules for work on CAT III and CAT IV installations:

- The conductive part of test probes must not exceed 4 mm in length
- The external surfaces of the jaws of crocodile clips must be non-conductive and the conductive parts must not be accessible when the clip is closed.

The IEC 61010-2-033 standard, first published on 09/02/2013, has brought changes concerning multimeters, multimeter clamps, etc.

Since 9th March 2015, these instruments have had to guarantee a minimum safety level corresponding at least to CAT III 300 V.

IEC 61557

This international standard specifies the electrical safety characteristics in 1,000 VAC and 1,500 VDC low-voltage distribution networks. It defines all the requirements for combined performance measurement and monitoring devices which measure and supervise the electrical parameters in electrical distribution networks. These requirements also define the performance levels in single and three-phase AC or DC networks with rated voltages less than or equal to 1,000 V AC or 1,500 V DC.

The parts of the IEC 61557 standard applicable to our areas of test and measurement include:

Part 1 : IEC 61557-1 : General

Part 2 : IEC 61557-2 : Insulation resistance

Part 3 : IEC 61557-3 : Loop impedance

Part 4 : IEC 61557-4 : Resistance of earth conductors and equipotential bonding

Part 5 : IEC 61557-5 : Resistance to earth

Part 6 : IEC 61557-6 : Effectiveness of residual current devices (RCDs) in TT, TN and IT networks

Part 7 : IEC 61557-7 : Phase sequence

NF C 15-100

This is the **official French safety standard concerning the protection of low voltage electrical installations**, the protection of people and the ease of managing, operating and upgrading the installation. **Installations in housing** (house or apartment) **must comply with this standard**.

In particular, NF C 15-100 defines the protective systems, RCD circuit-breakers, wiring, number and type of lighting points and number of power outlets in each type of room (bathroom, kitchen...), etc.

TECHNICAL REMINDERS

NUMBER OF COUNTS (FOR MEASUREMENT)

This is one of the fundamental specifications of instruments using analogue-digital conversion. It is usually used to define **the measurement range and the resolution**, on the basis of the value chosen as the rated calibre.

MEASUREMENT RANGE

This indicates the limits within which a digital instrument maintains its specified characteristics. The measurements obtained are not subject to an error greater than the maximum tolerated error.
It is defined by a minimum measurable value and a maximum measurable value.

RATED CALIBRE

The calibre of an instrument is the **value of the quantity to be measured** which corresponds to the upper limit of the measurement range. For example, for an ammeter, if this upper limit is 5 A, its calibre is said to be 5 A.

RESOLUTION

This is the smallest measurable value difference. It is also the **value of one measurement count** or unit of quantification which is usually termed the "unit".

MINIMUM MEASURABLE VALUE (OR THRESHOLD)

This is the **smallest measurable value**. For an instrument with excellent conversion linearity, it may be the same as the resolution.
This is not always the case and the manufacturer should indicate it clearly, because **this minimum value also depends on the accuracy**, and particularly on the constant error.
When the constant error is too high, it becomes impossible to obtain valid measurements of very low values.

RMS: ROOT MEAN SQUARE

The term RMS (Root Mean Square) refers to the effective value. By definition, the effective value of any current is **the value of the DC current which would produce the same heating when flowing through a resistor.**

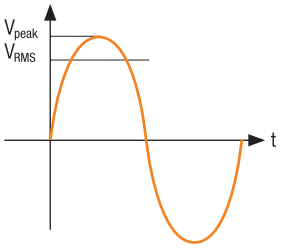
$$V_{RMS}=\sqrt{\frac{1}{T}\int_{o}^{T}v(t)^2}$$

In the specific case of a sinusoidal quantity, application of the relation above gives:

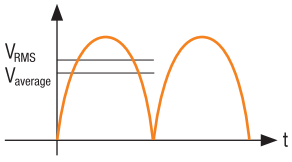
$$V = V_{peak}\cos\omega t$$

$$V_{RMS}=\sqrt{\frac{1}{T}\int V_{peak}^2\ \cos(\omega t)^2.dt} = \frac{V_{peak}}{\sqrt{2}}$$

The amplitude (Vc) of a voltage or of a sinusoidal current is equal to $\sqrt{2}$ times its RMS value ($Vc = \sqrt{2}\ V_{RMS}$).
It is crucial to know this RMS value in industrial environments; it is this value which is used to define a current.



Thus, for a 230 V/50 Hz network:
$V_{RMS} = 230$ V
$V_{peak} = 325$ V
$V_{average} = 207$ V



For a sinusoidal AC voltage
$V_{peak} = V_{RMS} \times \sqrt{2}$
$V_{average} = 0.9\ V_{RMS}$

An "average value" measuring instrument measures the average value of a sinusoidal current, after rectification and filtering, and displays the RMS value after applying a coefficient of 1/0.9 = 1.111
This indirect measurement method is simple and accurate but only valid for an undistorted sinusoidal current. It only tolerates distortion of a few percent.
This is why **"RMS" measuring instruments are increasingly widely used**. They rely on direct measurement principles: the thermal method (used mainly in metrology) and analogue or digital calculation methods requiring sophisticated electronic components.

PEAK VALUE – CREST FACTOR

The crest factor is expressed as follows $CF = V_{peak} / V_{RMS}$
This information complements the RMS value, allowing you to assess the distortion of a signal in qualitative terms.
For a sinusoidal signal, $CF = \sqrt{2} = 1.414$

ADVICE

When we speak of a 230 V network voltage, we are referring to an RMS value. For many years, the level of distortion caused by linear loads (incandescent lamps, heating) connected to the network was very low. The spread of non-linear loads (switching power supplies, light dimmers, variable speed-drives or compact fluorescent lamps) is calling this approach into question, as "pure" sinusoidal currents are becoming increasingly rare on the network.

Conventional measuring instruments (calculating the RMS value from the average value) are only accurate with sinusoidal currents, as a matter of principle. Otherwise, the measurement error may be as high as 50 %!

You are advised to opt for "RMS" measuring instruments which are capable of providing correct measurements, whatever the waveform of the current or voltage.

SAFETY RULES AND GOOD PRACTICES

- Use measuring instruments and accessories which are suitable for the application and the measuring conditions.

Prefer CAT IV instruments:

- They can withstand voltage surges which are up to 50 % greater than a CAT III product
- CAT IV 1000 V provides protection against electric shocks up to 12,000 V, while CAT IV 600 V instruments protect up to 8,000 V.
- Using a lower-category instrument means checking that the installation is equipped with protective systems (disconnecting switch, circuit-breaker, etc.) which are functional and in good condition. This is often the case… but not always!
- **For outdoor or temporary installations or for installations upstream of the protective systems, CAT IV instruments must be used.**

- It is the weakest element which defines your level of protection. If you use accessories of a lower category or with a lower voltage than your measuring instrument, the global level of safety offered by your measuring system will be reduced.
- Use accessories in perfect condition. Any accessory which is faulty, however slightly, must be replaced immediately as it can no longer guarantee your safety.
- The fuses are protective elements. If you replace them with cheaper models or, even worse, with a metal element (copper wire, aluminium foil, etc.), you will no longer be protected against possible voltage surges on your installation.

- Phase-sequence testing up to 400 Hz

SPECIFICATIONS

	C.A 742	C.A 762
Voltage detector		
Voltage	12 V_{AC} ≤ U ≤ 690 V_{AC} 12 V_{DC} ≤ U ≤ 750 V_{DC}	
Frequency	DC, 16 2/3 to 800 Hz	
Impedance	> 300 kΩ	> 400 kΩ
Max. current	3.5 mA_{RMS}	
Indication of polarity	Yes	
Hazardous voltage indication	The red ELV (Extra Low Voltage) LED indicates when the voltage is higher than the SELV (Safety Extra Low Voltage); the higher the voltage, the faster it flashes.	
Phase / Neutral identification	Above 50 V (45 - 65 Hz) Above 150 V (16 2/3 - 45 Hz)	
Continuity with buzzer		
Trigger threshold	100 Ω typical (150 Ω max.)	
Extended continuity test	-	2 kΩ, 60 kΩ, 300 kΩ
Test current	≤ 1 mA	
Open-circuit voltage	≤ 3.3 V	
Protection	Up to 1000 V	
Phase rotation	No	2-wire method
Ph/Ph voltage	-	50 V ≤ U ≤ 690 V_{AC}
Frequency	-	Between 45 and 400 Hz
Buzzer	Intermittent beep for voltage detection and continuous beep for continuity	
Standards and electrical safety	IEC 61010 600 V CAT IV IEC 61243-3 Ed.2 concerning Voltage Detectors/Voltage Absence Testers (VATs) IEC 61326-1, emission and immunity in industrial environments	
Protection of enclosure	Casing: IP65 Test probes (option): IP2X	
Climatic conditions	Use from -15 °C to +45 °C / 20 to 95 % RH	
Power supply	2 x 1.5 V batteries (AAA and LR3)	
Battery life	7,500 x 10 s measurements	7,000 x 10 s measurements
Dimensions / weight	163 x 64 x 40 mm / 210 g	

ADDITIONAL INFO

- Don't forget the adapter for 2P+E sockets to test your power C.A 751 — P01101997Z

CONTENTS

- 1 voltage detector delivered with:
- 1 black Ø 2 mm test-probe lead with crystal safety cap
- 1 red Ø 2 mm test-probe lead with crystal safety cap
- 1 wrist-strap
- 2 x 1.5 V LR03 batteries

- The IP2X version is delivered with:
- 1 set of IP2X Ø 4 mm test probes 0.85 m long (black) and 0.25 m long (red)
- 1 wrist-strap
- 2 x 1.5 V LR03 batteries

ACCESSORIES / REPLACEMENT PARTS

- Red Ø 2 mm test probe — P01102008Z
- Crystal safety cap for Ø 2 mm test probe (x10) — P01102033
- See all the accessories on page 44

VOLTAGE DETECTORS / VOLTAGE ABSENCE TESTERS (VATS)

C.A 771 - C.A 771 IP2X

Ref. : P01191771 P01191771A

C.A 773 - C.A 773 IP2X

Ref. : P01191773 P01191773A

1000 V CAT IV | IP 65 | IEC 61243-3 | NF C 18-510

STRENGTHS

- Full Autotest with indication of the type of fault
- Lighting of the point of measurement
- Automatic standby
- Extended climatic class
- IP2X version available, compliant with NF C 18-510

SPECIFICATIONS

	C.A 771	C.A 773
Display	LEDs	LEDs + Backlit digital display
Voltage detection		
Voltage	12 V_{AC} ≤ U ≤ 1000 V_{AC} 12 V_{DC} ≤ U ≤ 1400 V_{DC}	
Frequency	DC, 16 2/3 to 800 Hz	
Impedance	> 500 kΩ	
Max. current	3.5 mA RMS	
Polarity indication	Yes	
Stray voltage detection	Yes (by low-impedance load switching)	
RCD tripping	Yes (by low-impedance load switching) Approx. 30 mA to 230 V	
Redundant hazardous voltage indication	The ELV (Extra Low Voltage) LED indicates a voltage higher than the SELV (Safety Extra Low Voltage) with the flashing rate proportional to the voltage	
Phase / Neutral identification	Above 50 V (45 - 65 Hz) Above 150 V (16 2/3 - 45 Hz)	
Continuity & Resistance		
Buzzer trigger threshold	100 Ω typical (150 Ω max.)	100 Ω typical (150 Ω max.)
Extended continuity test (Resistance)	2kΩ, 60 kΩ, 300 kΩ	0,5 Ω to 2,999 kΩ
Test current / Open-circuit voltage	≤ 1 mA / ≤ 3.3 V	
Phase rotation	2-wire method	
Ph/Ph voltage	50 V ≤ U ≤ 1000 V_{AC} (45 - 400 Hz)	
Buzzer	Intermittent beep for voltage detection / Continuous beep for continuity	
Standards and electrical safety	IEC 61243-3:2009, EN 61243-3:2010 IEC 61010 1000 V CAT IV	
Enclosure protection	IP65	
Climatic conditions	-30 °C to +60 °C (Extended "class S")	-15 °C to +45 °C ("class N")
Battery life	> 5,000 x 10 s measurements	> 2,500 x 10 s measurements
Dimensions / weight	228 x 60 x 39 mm (without test probe) / 350 g approx.	

ADDITIONAL INFO

- Don't forget the adapter for 2P+E sockets to test your power sockets
  C.A 753 ____ P01191748Z

CONTENTS

- 1 voltage detector delivered with:
- 1 set of red/black Ø 2 mm removable test probes with crystal safety cap
- 1 test-probe protector
- 1 Velcro strap
- 2 x 1.5 V LR03 batteries

- The IP2X version is delivered with:
- 1 set of red/black IP2X Ø 4 mm removable test probes with crystal safety cap
- 1 Velcro strap
- 2 x 1.5 V LR03 batteries

Ref. : P01196521E P01196522E P01196523E

600 V CAT III

IP 53

STRENGTHS

- "Fus" LED: HRC fuse check
- "Voltest™" LED: voltage presence in ohmmeter* mode
- Automatic tare in ohmmeter mode*
- µA calibres
- Compact, shockproof casing with multi-purpose "Multistand™" articulated stand

* for C.A 5003 and C.A 5005

SPECIFICATIONS

	C.A 5001	C.A 5003(1)	C.A 5005(1)
DC voltage	8 calibres : 100 mV / … / 1000 V(2)		
AC voltage	5 calibres : 10 V / … / 1000 V(2)		
Internal resistance	20 kΩ/V		
Operating frequency	10 Hz … 100 kHz depending on calibre		
DC current	5 cal. : 50 µA / … / 5 A	7 cal. : 50 µA / … / 15 A	6 cal. : 50 µA / … / 10 A
AC current	4 cal. : 5 mA / … / 5 A	5 cal. : 1.5 mA / … / 15 A	5 cal. : 3 A / … / 300 A(3)
Resistance	2 cal. : 10 kΩ and 1 MΩ		
Audible continuity test	R < 50 Ω		
Scale in dB for VAC	0 … +22 dB		
Typical accuracy(4)	1.5 % for VDC • 2.5 % for VAC and AAC & • 10 % for Ω		
Power supply	1 x 1.5 V LR06 battery	1 x 9 V 6LR61 battery	
Battery life	10,000 x 15 s measurements	10,000 x 10 s measurements	
Electrical safety(5)	IEC 61010-1 Edition 2 600 V CAT III		
Protection(6)	HRC fuses 0.5 A and 5 A	HRC fuses 1.6 A and 16 A	HRC fuses 1 A and 10 A
Ingress protection	IP 40	IP 53	
Climatic conditions	–10 °C … +55 °C and HR < 90 %		
Dimensions / weight	160 x 105 x 56 mm / 500 g		

(1) Additional "Voltest™" function to check for the possible presence of a voltage during resistance measurement and audible continuity test - (2) Use limited to 600 V max. (3) Limited to 240 A max. by the MN 89 miniclamp - (4) In % of end-of-scale - (5) Degree of pollution 2 - (6) Electronic protection and HRC fuses for the current calibres with fuse test LED.

ADDITIONAL INFO

- Also delivered complete in a hard case:

C.A 5001 case ____ P01196521F
C.A 5003 case ____ P01196522F
C.A 5005 case ____ P01196523F

- The C.A 5005 is delivered with a current clamp for measurements up to 200 AAC

CONTENTS

- C.A 5001 delivered with 1 set of silicone straight banana plug/elbowed banana plug leads, 1 set of safety test probes, 1 x 1.5 V LR6 battery
- C.A 5003 delivered with 1 set of silicone straight banana plug/elbowed banana plug leads, 1 set of safety test probes, 1 x 9 V 6LR61 battery
- C.A 5005 delivered with 1 MN89 AC clamp, 1 set of silicone straight banana plug/elbowed banana plug leads, 1 set of safety test probes, 1 x 9 V 6LR61 battery

ACCESSORIES / REPLACEMENT PARTS

- Accessories kit for electricians ____ P01295459Z
- CMI214S current measurement lead ____ P03295509
- See all the accessories on page 44

C.A 5011

Ref. : P01196311E

600 V CAT IV | IP 53 | TRMS

STRENGTHS

- Extra safety with 2 LEDs: “Fus”: HRC fuse test, “Voltest™”: voltage presence in ohmmeter mode
- Two complementary readings: digital for accuracy, with backlighting, and analogue for quick reading
- Automatic AC/DC recognition
- Compact, shockproof casing with multi-purpose Multistand™ articulated stand

SPECIFICATIONS

	C.A 5011
DC and AC voltage	2 x 5 calibres 400 mV / … / 1000 V(1)
Impedance	10 MΩ
Operating frequency (2)	20 Hz / … / 10 kHz
DC and AC current	2 x 6 calibres : 400 µA / … / 10 A
Resistance (3)	6 calibres : 400 Ω / … / 40 MΩ
Audible continuity test (3)	R < 400 Ω
Frequency	3 calibres : 4 kHz / … / 400 kHz
Scale in dB for VAC	-20 dB … +16 dB
Max. value	Sur 500 ms
Typical accuracy (4)	1% for VDC and Ω, 1.5 % for ADC
Power supply	1 x 9 V 6LR61 battery
Battery life	300 hours
Electrical safety (5)	IEC 61010-1 Edition 2 600 V Cat IV
Protection (6)	1 A and 10 A HRC fuses
Ingress protection	IP 53
Climatic conditions	-10 °C … +55 °C and RH < 90 %
Dimensions / weight	160 x 105 x 56 mm / 500 g

(1) Use limited to 600 V max. (2) Crest factor ≤ 5 – (3) Additional Voltest™ function to check for the possible presence of a voltage - (4) In digital mode. In analogue mode: 2.5 % – (5) Degree of pollution 2 – (6) Electronic protection and HRC fuses for the current calibres with fuse test LED.

ADDITIONAL INFO

- Also available delivered complete in hard case:
  C.A 5011 case ____ P01196311F

CONTENTS

- 1 C.A 5011 multimeter
- 1 set of silicone straight banana plug/elbowed banana plug leads
- 1 set of safety test probes
- 1 x 9 V 6LR61 battery

- 12-bit converter
- 3-year warranty

CONTENTS

- C.A 5275 delivered with a set of banana plugs, a set of test probes, a 9 V battery, a shoulder bag, a MultiFix mounting accessory and a startup guide
- C.A 5277 same as C.A 5275 plus a K-thermocouple temperature sensor

ACCESSORIES / REPLACEMENT PARTS

- Accessories kit for electricians — P01295459Z
- PVC test-probe lead, insulated elbowed male plug Ø 4 mm (x 2) — P01295456Z
- See all the accessories on page 44

AMMETERS WITH FLEXIBLE CURRENT SENSORS

MA400D-170 - MAD400D-250

Ref. : P01120575Z P01120576Z

MA4000D-350

Ref. : P01120577Z

600 V CAT IV | TRMS

STRENGTHS

- Compact, stand-alone and easy to use
- Direct current readings
- Measurement from just a few tens of mA
- Memorization of maximum value

SPECIFICATIONS

	MA400D-170 / 250		
Display range	4 AAC	40 AAC	400 AAC
Measurement range	0.020 A … 3.999 A	4.00 A … 39.99 A	40.0 A … 399.9 A
Resolution	1 mA	10 mA	100 mA
Accuracy	± (2% + 10 cts)	± (1.5% + 2 cts)	± (1.5% + 2 cts)
Clamping Ø / Sensor length	MA400D-170 : Ø 45 mm / 170 mm MA400D-250 : Ø 70 mm / 250 mm		
Bandwidth	10 Hz … 3 kHz		
Power supply	2 x 1.5 V LR03 batteries		
Safety	IEC 61010 CAT IV 600 V		
Operating temperature	0°C to +50°C		
Instrument weight	130 g approx.		
Casing dimensions	100 x 60 x 20 mm		
Length of built-in connection cable	0.8 m		

	MA4000D-350		
Display range	40 AAC	400 AAC	4,000 AAC
Measurement range	0.01 A … 39.99 A	40.0 A … 399.9 A	400 A … 3,999 A
Resolution	10 mA	100 mA	1 A

Electrical safety as per IEC 61010-1, IEC 61010-2-032, IEC 61010-2-033	600 V CAT IV - 1000 V CAT III		
Power supply	1 x 9 V 6LR61 battery		
Dimensions / weight	78 x 222 x 42 mm / 340 g		

STRENGTHS

- Clamping Ø 34 mm
- Compact format
- Light weight
- TRMS AC+DC with the F205 clamp

CONTENTS

F201 delivered with:

- 1 set of built-in PVC test-probe leads (black/red) / insulated elbowed male banana plug Ø 4 mm
- 1 x 9 V 6LR61 battery
- 1 Multifix shoulder bag
- 1 mini-CD containing the User Manual

F203 same as F201 plus 1 wire thermocouple with built-in insulated Ø 4 mm banana connections with 19 mm spacing

F205 delivered with:

- 1 set of PVC leads (black/red) with insulated elbowed male banana plug Ø 4 mm / insulated straight male banana plug Ø 4 mm
- 2 test probes / insulated female plug Ø 4 mm (black/red)
- 1 safety crocodile clip (black)
- 1 x 9 V 6LR61 battery
- 1 Multifix shoulder bag
- 1 mini-CD containing the User Manual

F401 - F403 - F405 - F407

Electrical safety as per IEC 61010-1, IEC 61010-2-032, IEC 61010-2-033	1000 V CAT IV - 1000 V CAT III			
Power supply	4 x 1.5 V LR06 batteries			
Dimensions / weight	92 x 272 x 41 mm / 600 g			

STRENGTHS

- Small and medium-power LV applications
- Clamping Ø 48 mm
- TRMS AC+DC with the F405 / F407 clamps
- Delivered in pre-equipped MultiFix shoulder bag

CONTENTS

F401 / F403 delivered with:

- 1 set of PVC leads (black/red) with insulated elbowed male banana plug Ø 4 mm / insulated straight male banana plug Ø 4 mm
- 2 test probes / insulated female plug Ø 4 mm (black/red)
- 1 wire thermocouple with built-in insulated Ø 4 mm banana connections with 19 mm spacing
- 4 x 1.5 V LR03 batteries
- 1 Multifix shoulder bag
- 1 mini-CD containing the User Manual

F405 same as F401 / F403 without the wire thermocouple and with 1 safety crocodile clip (black)

F407 same as F405 with:

- 2 safety crocodile clips (red/black)
- 1 mini-CD containing the Power Analyser Transfer PC software and the User Manual

STRENGTHS

- High-power LV applications
- Clamping Ø 60 mm
- TRMS AC+DC with the F605 / F607
- Delivered in pre-equipped MultiFix shoulder bag

CONTENTS

F601 / F603 delivered with:

- 1 set of PVC leads (black/red) with insulated elbowed male banana plug Ø 4 mm / insulated straight male banana plug Ø 4 mm
- 2 test probes / insulated female plug Ø 4 mm (black/red)
- 1 wire thermocouple with built-in insulated Ø 4 mm banana connections with 19 mm spacing
- 4 x 1.5 V LR03 batteries
- 1 Multifix shoulder bag
- 1 mini-CD containing the USER Manual

F605 same as F601/F603 without the wire thermocouple and with 1 safety crocodile clip (black)

F607 same as F605 with:

- 2 safety crocodile clips (black/red)
- 1 mini-CD containing the Power Analyser Transfer PC software and the User Manual

ACCESSORIES / REPLACEMENT PARTS

TESTERS

C.A 730 and C.A 735

- Wrist-strap — P03100824

C.A 730, C.A 735 and C.A 745

- 9 V 6LR61 batteries — P01100620
- Shoulder bag no. 10 — P01298012
- Soft case 200 x 100 x 40 mm with belt clip — P01298065Z

C.A 732

- 1.5 V LR03 battery — P01296032

C.A 745

- Transport cover — P01298007
- Lockable safety test probe — P01103061Z

VOLTAGE DETECTORS

C.A 742, C.A 742 IP2X, C.A 762 and C.A 762 IP2X

- Measurement adapter for 2P+E socket, model C.A 751 — P01101997Z
- Red test probe Ø2 mm — P01102008Z
- Black test-probe lead Ø2 mm — P01102009Z
- Adapter for safety rod (set of 2) — P01102034
- Crystal safety cap for test probe Ø2 mm (x10) — P01102033
- Set of 2 leads 0.25 m and 0.85 m long with Ø4 mm IP2X test probes — P01295285Z
- Set of 2 leads 1.5 m long with Ø4 mm IP2X test probes — P01295462Z
- MultiFix shoulder bag, 120 x 200 x 60 mm — P01298074
- Soft case, 200 x 100 x 40 mm with belt clip — P01298065Z
- Shoulder bag no. 10 — P01298012Z
- Wrist-strap — P03100824

C.A 771, C.A 771 IP2X, C.A 773 and C.A 773 IP2X

- CAT IV test probes — P01102123Z
- Ø2 mm test probes — P01102124Z
- Ø4 mm test probes — P01102125Z
- Test-probe protector — P01102126Z
- IP2X CAT IV test probes — P01102127Z
- IP2X Ø4 mm test probes — P01102128Z
- Measurement adapter for 2P+E socket, model C.A 753 — P01191748Z
- MultiFix shoulder bag, 120x320x60 mm — P01298076
- Crystal safety cap for test probe Ø2 mm (x10) — P01102033

ANALOGUE MULTIMETERS

C.A 5001, C.A 5003 and C.A 5005

- Accessories kit for electricians — P01295459Z
- I/R probe — P01651610Z
- C.A 801 single-channel temperature adapter — P01652401Z
- C.A 803 two-channel temperature adapter with differential measurement — P01652411Z
- CMI214S current measurement lead — P03295509
- Shoulder bag — P01298033
- Soft case no. 5 — P01298036
- Hard case — P01298037
- Shoulder bag no. 21 with strap (250x165x60 mm) — P06239502

C.A 5001

- 1.5 V LR06 battery — P01296033
- 0.5 A HRC fuse (x 10) — P01297028
- 5 A HRC fuse (x 10) — P01297035

C.A 5003

- 9 V 6LR61 battery — P01100620
- MN11 LCA 200/0.2 clamp — P01120404
- 1.6 A HRC fuse (x 10) — P01297036
- 16 A HRC fuse (x 10) — P01297037

C.A 5005

- 9 V 6LR61 battery — P01100620
- MINI 09 clamp - 1 A / 100 MVDC — P01105109Z
- MN11 LCA 200/0.2 clamp — P01120404
- 10 A HRC fuse (x 10) — P01297038
- 1 A HRC fuse (x 10) — P01297039

DIGITAL MULTIMETERS

C.A 5011

- 9 V 6LR61 battery — P01100620
- Crocodile wire grip (x 2) — P01102053Z
- Insulation-piercing clip (x 2) — P01102055Z
- Moulded PVC lead with straight male plug/insulated elbowed male plug Ø4 mm (x 2) — P01295451Z
- Moulded red/black silicone lead with straight male plug/insulated elbowed male plug Ø4 mm (x 2) — P01295453Z
- Safety test probe (x 2) — P01295454Z
- PVC test-probe lead, insulated elbowed male plug Ø 4 mm (x 2) — P01295456Z
- Crocodile clip (x 2) — P01295457Z
- Ø 4 mm CAT II 300 V test probe (x 2) — P01295458Z
- Ø 2 mm CAT II 300 V test probe (x 2) — P01295460Z
- IP2X test-probe lead (x 2) — P01295461Z
- Accessories kit for electricians — P01295459Z
- I/R probe — P01651610Z
- C.A 801 single-channel temperature adapter — P01652401Z
- C.A 803 two-channel temperature adapter with differential measurement — P01652411Z
- CMI214S current measurement lead — P03295509

C.A 5231, C.A 5233, C.A 5271, C.A 5273, C.A 5275 et C.A 5277

- 9 V 6LR61 battery — P01100620
- Crocodile wire grips (x 2) — P01102053Z
- Insulation-piercing clip (x 2) — P01102055Z
- 40 kVdc / 28 kVac high-voltage probe — P01102097
- MultiFix multi-position mounting accessory — P01102100Z
- Moulded PVC lead with straight male plug/insulated elbowed male plug Ø4 mm (x 2) — P01295451Z
- Moulded red/black silicone lead with straight male plug/insulated elbowed male plug Ø4 mm (x 2) — P01295453Z
- Safety test probe (x 2) — P01295454Z
- PVC test-probe lead, insulated elbowed male plug (x 2) — P01295456Z
- Crocodile clip (x 2) — P01295457Z
- Ø 4 mm CAT II 300 V test probe (x 2) — P01295458Z
- Ø 2 mm CAT II 300 V test probe (x 2) — P01295460Z
- IP2X test-probe lead (x 2) — P01295461Z
- Accessories kit for electricians — P01295459Z
- I/R probe — P01651610Z
- C.A 801 single-channel temperature adapter — P01652401Z
- C.A 803 two-channel temperature adapter with differential measurement — P01652411Z

C.A 5231

- 100 AAC MINI 03 current clamp — P01105103Z
- 400 AAC / 600 ADC PAC10 current clamp — P01120070

C.A 5233, C.A 5273 and C.A 5277

- Safety thermocouple adapter (x 2) — P01102106Z
- Safety adapter and temperature probe, wire K sensor, -50°C to +450°C — P01102107Z
- CMI214S current measurement lead — P03295509

ACCESSORIES / REPLACEMENT PARTS

MULTIMETER CLAMPS

F200, F400 and F600 SERIES

- MultiFix multi-position mounting accessory — P01102100Z
- Moulded PVC lead with straight male plug/insulated elbowed male plug Ø4 mm (x 2) — P01295451Z
- Moulded red/black silicone lead with straight male plug/insulated elbowed male plug Ø4 mm (x 2) — P01295453Z
- Safety test probe (x 2) — P01295454Z
- PVC test-probe lead, insulated straight male plug Ø 4 mm (x 2) — P01295455Z
- PVC test-probe lead, insulated elbowed male plug Ø 4 mm (x 2) — P01295456Z
- Crocodile clip (x 2) — P01295457Z
- Ø 4 mm CAT II 300 V test probe (x 2) — P01295458Z
- IP2X test-probe lead (x 2) — P01295461Z
- Accessories kit for electricians — P01295459Z
- CMI214S current measurement lead — P03295509

F400 and F600 SERIES

- 1.5 V LR06 battery — P01296033
- MultiFix shoulder bag 120x320x60 mm — P01298076

F201 and F205

- 9 V 6LR61 battery — P01100620
- MultiFix shoulder bag 120x245x60 mm — P01298075

F203

- 9 V 6LR61 battery — P01100620
- Safety thermocouple adapter (x 2) — P01102106Z
- Safety adapter and temperature probe, wire K sensor, -50°C to +450°C — P01102107Z
- MultiFix shoulder bag 120x245x60 mm — P01298075
- C.A 801 single-channel temperature adapter — P01652401Z
- C.A 803 two-channel temperature adapter with differential measurement — P01652411Z

F403 and F603

- Safety thermocouple adapter (x 2) — P01102106Z
- Safety adapter and temperature probe, wire K sensor, -50°C to +450°C — P01102107Z

ELECTRICAL SAFETY

ELECTRICAL INSTALLATION TESTING

The risks linked to incorrect use of electricity may include:
-life-threatening danger for people,
-threat of damage to electrical installations and property,
-harmful effects on systems operation and equipment life spans.
So the purpose of electrical installation testing is primarily to ensure that people and goods are kept safe and are protected in the event of a fault. It also facilitates **preventive maintenance of installations**, preventing serious faults which might prove expensive (production shutdown, etc.).
To guarantee people's safety with regard to these installations and the electrical equipment connected to them, standards have naturally been developed and updated to take changes into account. The **IEC 60364** standard and its various national equivalents published in each European country, such as **NF C 15-100** in France or **VDE 100** in Germany, specify the requirements concerning electrical installations in buildings. Chapter 6 of this standard describes the requirements for testing the compliance of an installation.

The effectiveness of the safety measures implemented can only be guaranteed if **regular tests** prove they are operating correctly. This is why the standards cover not only the initial verifications when installations are commissioned, but also **periodic testing** whose frequency depends on the type of installation and equipment, its use and the legislation in the country involved. In addition, **the tests must be carried out with measurement instruments that comply with the IEC 61-557 European standard** ensuring user safety and reliable measurements.
The electrical testing is divided into 2 parts:
1. **Visual inspection** to guarantee that the installation complies with the safety requirements (presence of an earth electrode, protective devices, etc.) and does not show any visible evidence of damage.
2. **Measurements**
There are 4 main measurements required:
1. Earth
2. Continuity
3. Insulation
4. Tests of protective devices

1. EARTH

To guarantee safety on residential or industrial electrical installations, one of the basic rules is that there must be an earth electrode.

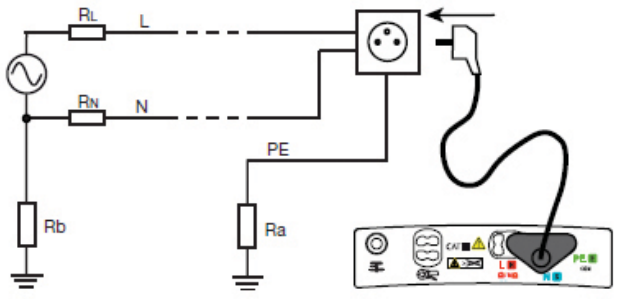
If there is no earth electrode, it may endanger people's lives and damage electrical installations and property.

When a large enough area is available to set up stakes, you should measure the earth with the traditional 3-pole method, also known as the 62 % method.

When the 62 % method is not applicable, however, other methods can be used. There are many methods for measuring the earth (1P live earth, PH-PE loop impedance, selective earth with 1-clamp method, etc.), some more suitable than others, depending on the neutral system, the type of installation (residential, industrial, urban, rural, etc.), the possibility of cutting off the power, the area available for planting stakes, etc.

2. CONTINUITY

The purpose of continuity measurement is to **check the continuity of the protective conductors and the main and supplementary equipotential bonds. The test is carried out using a measuring instrument** capable of generating a no-load voltage of 4 to 24 V (DC or AC) with a minimal current of 200 mA. The resistance measured must be lower than a threshold specified by the standard applicable to the installation tested, which is usually 2 Ω. As the resistance value is low, the resistance of the measurement leads must be compensated, particularly if very long leads are used.



Example : Approximate measurement of earth resistance by the Zs (Ph-PE) loop measurement method in a TT-type earthing system

3. INSULATION

Good insulation is **essential to prevent electric shocks**. This measurement, usually carried out between active conductors and the earth, involves injecting a DC voltage, measuring the current and thus determining the insulation resistance value.
The power must be switched off and the installation must be disconnected before performing this test to ensure that the test voltage will not be applied to other equipment electrically connected to the circuit to be tested, particularly devices sensitive to voltage surges.

According to the IEC 60364 standard, the minimum insulation resistance values must be as follows:

Rated voltage of circuit V	DC test voltage V	Insulation resistance MΩ
SELV or PELV	250	≥ 0.5
≤ 500 V including PELV	500	≥ 1.0
> 500 V	1,000	≥ 1.0

4. TESTS OF PROTECTIVE DEVICES

Fuses / Circuit-breakers

To check the specifications of the protective devices such as fuses or circuit-breakers, **a fault loop impedance measurement is carried out** to calculate the corresponding short-circuit current. A visual inspection can then be used to check that the sizing is correct.
A fuse table directly integrated in certain installation testers can be used to check automatically that the fuses are correctly sized.

Residual Current Devices (RCDs): types AC, A and B

RCDs, which detect earth leakage currents, can be tested using two methods:
- the basic test, also called a pulse test, which determines the trip time (in milliseconds)
- the step test, which determines the trip time and trip current, thus detecting any RCD ageing.

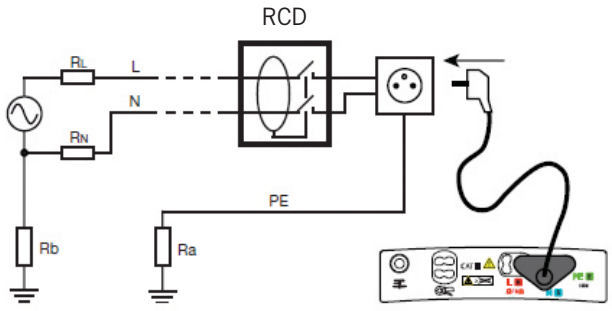
Type-B RCDs are designed to provide a specified response for DC-only leakage currents. A specific test is then required to check RCDs of this type.

5. OTHER RECOMMENDED MEASUREMENTS

When testing low-voltage installations, other measurements are recommended (mandatory in some countries) such as:

- **The voltage drop ΔV% in the cables**, obtained by means of two line-impedance measurements to check that their cross-sections are appropriate
- The **correct phase order** in three-phase systems, thus ensuring that rotating machines turn in the right direction
- **The installation's voltage and frequency**, allowing identification of any poor connections

Detection of phase current unbalance by measuring with a clamp and first-level assessment of the harmonic content are useful additions to any installation analysis.



Example: RCD test via connection in a wall socket in TT-type earthing systems.

INSULATION MEASUREMENT

To ensure that electrical equipment and installation operate correctly in total safety, all the conductors are insulated: sheathing for cables, varnish for windings. When the quality of these insulating materials diminishes, leakage currents may flow from one conductor to the other and, depending on the extent of the insulation faults (the worst being a short-circuit), may cause serious damage.

Equipment with faulty insulation may break down, burn or cause a fault on the installation itself, thus triggering protective devices and shutting down the whole installation...

Furthermore, some particularly sensitive installations (operating theatres in hospitals, chemical industries, etc.) are built using an IT-type neutral system (cf. IEC 60364-6), which tolerates an initial line-earth insulation fault and only shuts down the installation if a second fault occurs.
Measurements are needed to prevent and prepare for the hazards linked to insufficient or damaged insulation. These measurements concern both the electrical equipment and the installations to which it is connected.
These measurements are carried out during commissioning on new or reconditioned items, and **then repeated regularly** to monitor their evolution over time.

INSULATION RESISTANCE MEASUREMENT AND DIELECTRIC TESTING

These two concepts, which characterize the quality of an insulant, require further explanation as they are too frequently confused.

■ **Dielectric strength testing**, also called "breakdown testing", **measures an insulant's ability to withstand a medium-duration voltage surge without sparkover occurring**. In reality, this voltage surge may be due to lightning or the induction caused by a fault on a power transmission line. The main purpose of this test is to ensure that the construction rules concerning leakage paths and clearances have been respected. This test is often performed by applying an AC voltage but can also be done with a DC voltage. This type of measurement requires a dielectrometer.

The result obtained is a voltage value usually expressed in kilovolts (kV). Dielectric testing may be destructive in the event of a fault, depending on the test levels and the available energy in the instrument.

For this reason, it is reserved for type tests on new or reconditioned equipment: only equipment that passes the test will be put into service.

■ **Insulation resistance measurement**, however, is non-destructive under normal test conditions. Carried out by applying a DC voltage with a smaller amplitude than for dielectric testing, it yields a result **expressed in kΩ, MΩ or GΩ**. This resistance indicates **the quality of the insulation between two conductors** and provides a good idea of the risks of leakage currents. Because it is non-destructive, it is particularly useful for monitoring insulant ageing during the operating life of electrical equipment or installations. This means it can be used as a **basis for preventive maintenance**. This measurement is performed using an insulation tester, also called a megohmmeter.

MEASURING LEVELS OF INSULATION

In concrete terms, first of all the installation or equipment is checked to ensure that no voltage is present in it. Then a DC test voltage is applied and the insulation resistance value is read. **When measuring an insulation in relation to the earth, you are advised to place the positive pole of the test voltage on the earth** to prevent earth polarization problems when carrying out multiple tests.

All the standards concerning electrical installations or equipment specify the measurement conditions and minimum thresholds to be respected for insulation measurements.

INSULATION MEASUREMENT APPLICATIONS

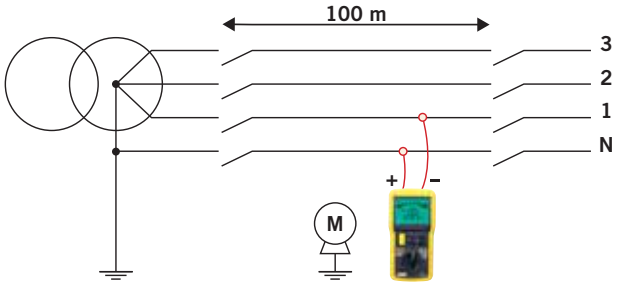
Insulation measurement on electrical installations

Insulation test before powering up

Before powering up a new installation, its insulation must be tested.

Two types of measurements are required:

- **Verification of the conductors**: this checks that none of the conductors, cut-off devices or connection equipment has suffered damage liable to cause an insulation fault. This is done before commissioning the installation, with all the receivers disconnected.
- **Verification of the whole installation** in relation to the earth.



Insulation test after powering up

After powering up the installation, **the insulation should be checked regularly** to make sure there is no substantial drift away from the initial values.

Because the method used is the same as for testing before powering up, the installations must be switched off.

In both cases, the insulation will be considered acceptable if the insulation resistance measured is greater than the threshold specified by the applicable standard for the installation tested (NF C 15-100 in France, VDE 100 in Germany, European standard IEC 60364, IEEE 43-2000, etc.)

Insulation measurement on motors, transformers, etc.

Whether on electrical installations or on machines, **the quality of the insulating materials deteriorates as time passes** due to the stresses affecting the equipment. This deterioration reduces the electrical resistivity of the insulants, leading in turn to an increase in the leakage currents and causing incidents which may be serious in terms of the safety of people and property, but also in terms of production stoppage costs in industry.

So, in addition to the measurements during commissioning of new or renovated equipment, **regular insulation testing of installations and equipment helps to prevent such incidents** by organizing **preventive maintenance** designed to detect ageing and therefore prevent premature deterioration of the insulation properties before they reach a level liable to cause the incidents described above.

Deterioration of the equipment may occur naturally, but it is often also accelerated by external contaminants such as dust, oil, etc. It is therefore strongly recommended to monitor its insulation over time.

To carry out this preventive maintenance effectively, the **Chauvin Arnoux range of megohmmeters** proposes the following functions:

- PI, DAR and DD quality ratios for a quick assessment of insulation quality, with the added advantage that they are not particularly influenced by temperature, making them easy to use without requiring correction of the results
- Automatic calculation of the insulation resistance at a reference temperature (C.A 6549, C.A 6550, C.A 6555)
- Method based on the influence of test voltage variation (step voltage measurement)

CRITERIA FOR CHOOSING AN INSULATION TESTER

Here are a few tips to help you choose an insulation tester that matches your requirements.

■ The application.

What type of equipment will you be testing: electrical installations, switchgear, telephony, etc.

Rated operating voltage, manufacturer recommendations, dedicated standards

Test voltage: 50 – 100 – 250 – 500 – 1,000 – 2,500 – 5,000 – 10,000 – 15,000 VDC

Measurement range: kΩ, MΩ, GΩ, TΩ

■ User comfort.

Reading mode: needle display with logarithmic scale, digital LCD, analogue bargraph

User-friendly features: programmable alarm thresholds, backlighting, remote control probe

■ Operating mode.

Hand-cranked generator, normal or rechargeable batteries

Other measurements required: continuity, current, voltage, etc.

Single-function or multi-function instrument, for testing installations or machines

EARTH MEASUREMENT

For **residential or industrial installations, the presence of an earth connection is one of the basic rules to ensure that the electrical installation is safe.**
The absence of an earth connection may endanger people's lives and damage electrical installations and property.
However, the presence of an earth connection does not guarantee safety and, even if the earth is correctly sized, only regular testing can ensure that it functions correctly.
The standards for electrical installations, such as IEC 60364, NF C 15-100, etc., stipulate the general installation conditions to be applied in order to guarantee the safety of people, pets, farm animals and property by protecting them against the hazards and damage which may result from use of the electrical installations.
When there is a large enough area available to set up stakes, earth measurement should be carried out with the traditional 3-pole method, also known as the 62 % method.
There are a large number of different methods for earth measurements, however, and the right choice depends on the type of neutral system, the type of installation (residential, industrial, urban, rural, etc.), the possibility of switching off the power supply, the area available for setting up stakes, etc.

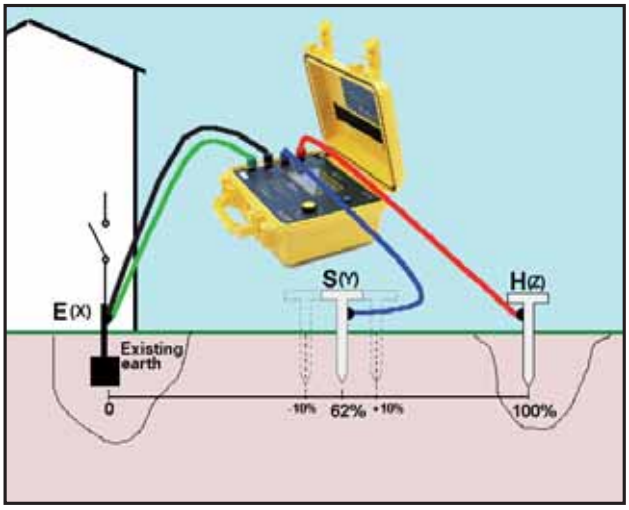
LIST OF THE DIFFERENT EARTH MEASUREMENT METHODS

	Rural building with possibility of setting up stakes	Urban building with no possibility of setting up stakes
Single earth connection		
3-pole method alias 62 % method	■	
Triangle method (2 stakes)	■	
4-pole method	■	
Variant 62 % method (1 stake)	■	
Line-PE loop measurement	■	Only with TT system
Network of multiple parallel earths		
Selective 4-pole method	■	
Earth clamp	■	■
Earth loop measurement with 2 clamps	■	■

Here is an overview of the most frequently-used measurement methods:

The 62 % in-line measurement method (two stakes)

This method requires the use of two auxiliary electrodes (or "stakes") to allow current injection and provide the 0 V reference potential.



The positioning of the two auxiliary electrodes in relation to the earth connection to be tested E(X), is crucial. For correct measurements, the "auxiliary connection" providing the reference potential (S) must not be positioned in the areas influenced by earths E & H due to the flow of the current (i).
Statistics from the field have shown that the ideal method for guaranteeing the highest possible measurement accuracy involves placing the stake S at a point 62 % of the distance from E on the line EH.
You must then make sure that the measurement does not vary significantly when moving the stake S by ± 10 % (S' and S") on either side of its initial position, while remaining on the line EH.
If the measurement varies, it means that (S) is in an influence area, so the procedure should be repeated after increasing the distances.
For a correct measurement, the stake H should be at least 25 metres away from the earth to be tested.
For more accurate measurement, it is possible to use

a 4-pole measurement method (adding a connection between the earth to be tested and the ES terminal of the measurement instruments) to minimize the resistance of the measurement leads, thus improving accuracy. This method is strongly recommended for low resistance values as the influence of measurement-lead resistance will then be considerable.

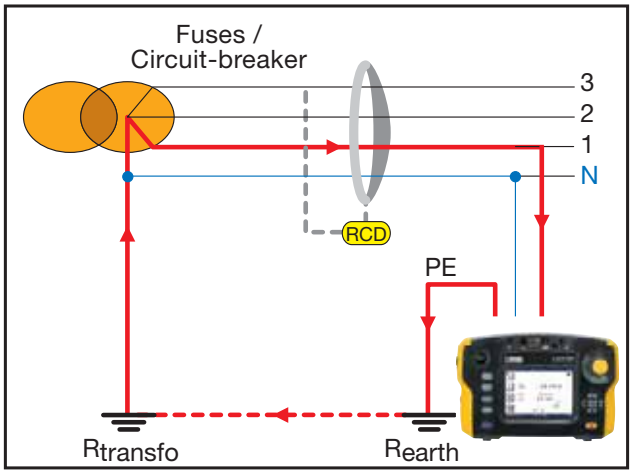
Line-PE loop measurement (only on TT system)

In urban environments, it often proves difficult to measure earth resistances using auxiliary stakes because it is not possible to set up the stakes for reasons of space, concreting, etc.

Loop measurement can then be used to test earths in urban environments without using stakes simply by hooking up to the mains power supply (mains socket).

In addition to the earth to be measured, the loop resistance measured in this way includes the earth and internal resistance of the transformer and the resistance of the cables. As all these resistances are very low, the value measured is an overall earth resistance value.

The actual earth resistance is therefore lower: Rmeasured > Rearth. The (overall) measurement error introduced by this method actually contributes to greater safety. The standards concerning electrical installations consider that the loop resistance (overall earth resistance) may be taken into account instead of the earth resistance to comply with the rules on protection against the risk of indirect contacts.



Note: on TN or IT (impedant) systems, the loop impedance measurement can be used to calculate the short-circuit current and thus to size the protective devices correctly.

Selective earth measurements

For interconnected earths, selective earth measurement can be used for quick, safe testing. In this case, it is not necessary to isolate the installation (no need to open the earth bar) and, for loop measurements with 2 clamps or **with an earth clamp, it is not necessary to set up stakes.**

For the earth clamp and for the 2-clamp method, all you have to do to find out the earth value and the value of the currents flowing in it is clamp the cable connected to the earth.

An earth clamp comprises two windings: a generator winding and a receiver winding:

- The clamp's "generator" winding develops an AC voltage at the constant level E around the clamped conductor; a current I = E / Rloop then flows through the resistive loop.
- The "receiver" winding measures this current.
- As E and I are known values, the loop resistance can be deduced from them.

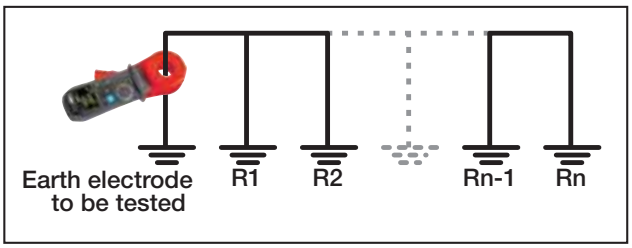
This case involves a network of parallel earths. Knowing that "n" resistances in parallel are equivalent to a resistance Raux with a negligible value, we can measure the local earth value Rx:

Rloop = Rx + Raux (where Raux = resistance equivalent to R1…Rn in parallel)

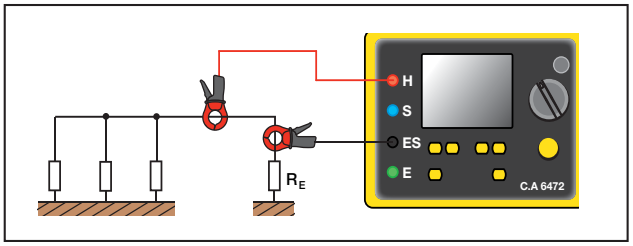
As Rx >> Raux', we obtain the result Rloop # Rx

The 2-clamp method is an equivalent method. One clamp acts as the generator, while the second acts as the receiver. This method may be more practical in places where access is difficult or when a larger clamping diameter is required.

Schematic diagram: earth clamp



Schematic diagram: 2-clamp method



It is also possible to use the 4-pole + clamp method, which requires auxiliary stakes but allows precise measurement of the earth resistance.

SAFETY OF MACHINES, SWITCHBOARDS AND PORTABLE ELECTRICAL APPLIANCES

MACHINE SAFETY

The **IEC 60204 / EN 60204** standard defines a **machine** as a **set of parts** or systems linked together, **at least one of which is mobile**. The fields of application are particularly diverse: machines for working metal, wood, textiles, printing, compressors, leather, tanneries, agricultural machinery, building sites and quarries, etc.

Part 1 of this reference standard defines the general requirements regarding electrical machine safety to ensure the protection of people who may be exposed to hazardous phenomena due to failure of the electrical equipment or the command circuits, disturbances in the power sources or power circuits, loss of continuity in the circuits, electromagnetic disturbances, release of accumulated energy, excessive audible noise or excessive surface temperatures.

To ensure electrical safety on the machines, you have to carry out a number of checks and tests after initial implementation, installation, renovation or modification and during periodic testing

- Checking of the **protective automatic cut-off systems** on the power supply in particular (the types of tests and checks depend on the earthing system):
  - Checking of PE continuity on each circuit in the machine with a measurement current ≥ 200 mA which may be as high as 10 A,
  - Verification of the loop impedance as per IEC 61557-3 and correct coordination of the protection against overcurrents
  - Visual check of the protection against overcurrents
  - RCD testing as per IEC 61557-6, tripping-time test (recommended)
  - Verification of the current at the first insulation fault by measurement or calculation

  Note: this test may be simplified depending on the condition of the machine as established by a questionnaire included in the standard.
- Insulation resistance measurement at 500 VDC, R > 1 MΩ
- Test of dielectric strength with 50 or 60 Hz AC voltage, at 2 x UN or 1,000 V, duration 1 sec (without disruptive discharge)
- Residual overvoltage test by measuring the discharge time < 1 sec or 5 sec.
- Operating test of the machine and the circuits involved in electrical safety
- The tests are usually performed in the order of decreasing failure in order to intercept electrical safety problems on the machine tested as quickly as possible.

Other aspects of the machine may be checked, such as the conformity of the documentation, the temperature reached, the correct order of the phase sequence and the phase drop between the power supply and the load.

SWITCHBOARD SAFETY

The IEC 61439 / EN 61439 standard defines a set of low-voltage equipment as a combination of one or more low-voltage connection devices.
A recent upgrade of this standard precisely defines the limits of liability between the original manufacturer, who should perform the design checks, and the assembler (switchboard operator) who should perform individual series testing. These checks include construction and performance tests. The switchboard operator is considered to become the original manufacturer if modifications are made to the low-voltage switchboard. A declaration of conformity based on simple comparison with a similar switchboard will not be accepted, so a new check is necessary. This new context means that additional test equipment is needed to ensure compliance with the requirements of this reference standard.
The tests required for low-voltage switchboards are:

- **Physical measurement of the insulation gap or leakage distance**
- **PE continuity check** with a measurement current ≥ 200 mA which may be up to 10 A (R ≤ 0.1 Ω)
- **Short-circuit withstand** by creating a bolted short-circuit
- Checking of the **dielectric properties** by a test at 50 / 60 Hz with the application of a voltage between the different groups of terminals rising slowly and then held for 5 sec or 1 sec

■ **Insulation test** (variant)
Other aspects can also be checked, such as the discharge time, the IP protection rating, the electrical circuits and connections (by random testing), identification of the external terminals, mechanical operation, shock voltage withstand, heating, etc.

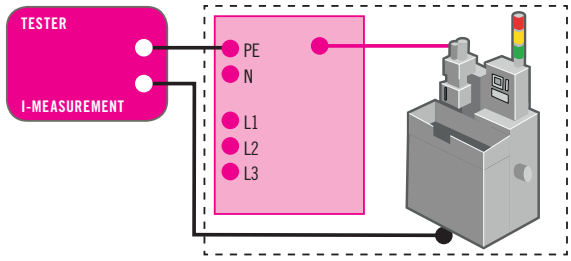
SAFETY OF PORTABLE ELECTRICAL APPLIANCES

The VDE 701 and VDE 702 standards define the inspections to be performed after repair or modification of the electrical appliances and the periodic inspections necessary, as well as general guidelines for electrical safety. This reference standard describes the automatic sequencing of the tests to be performed.
Many of the tests and checks to be performed are identical to those described in the Machines and Switchboards section, plus certain tests "with probes" when the equipment does not have double insulation or reinforced insulation (Class I).
Furthermore, the leakage current measurements must include leakage measurements by different methods (substitution method, differential leakage method, contact leakage method, etc.). The polarity of the mains leads must also be checked to ensure that it complies.

MAIN TESTS & CHECKS

PE CONTINUITY TEST

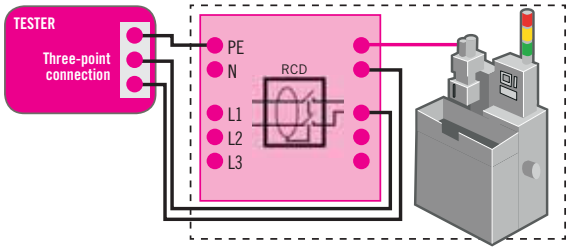
(IEC 61557-4)



Used to check whether the resistance measured corresponds to the cross-section and length of the PE conductor.

RCD AND PRCD TEST

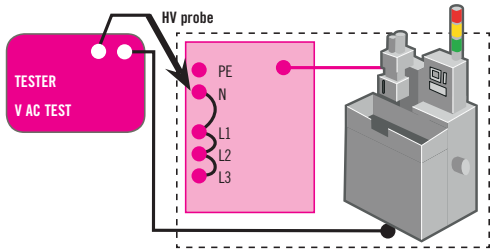
RCD test (Uc, T, I) (IEC 61557-6)



The RCD test can be used to check operation of the RCDs.

HV DIELECTRIC TEST

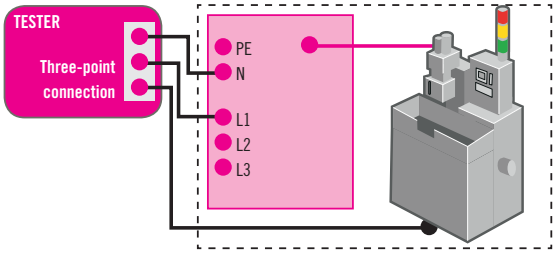
AC dielectric strength



The AC dielectric test can be used to confirm the device's ability to function at its operating voltage. These tests are performed at a higher voltage than the normal operating voltage.

LOOP IMPEDANCE MEASUREMENT

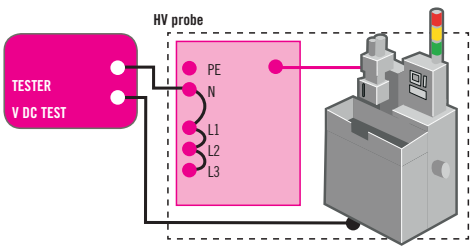
Loop & PFC measurement (IEC 61557-3)



By measuring the loop impedance and calculating the prospective fault current (PFC), you can check that the automatic cut-off systems or fuses are appropriately sized.

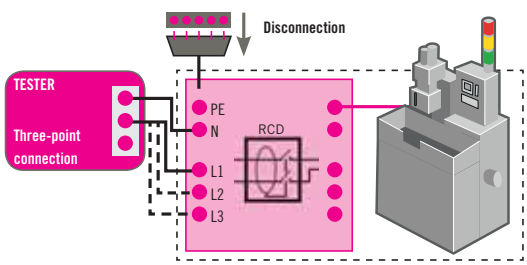
INSULATION RESISTANCE MEASUREMENT

Measurement of Rinsulation in MΩ (IEC 61557-2)



By measuring the insulation resistance, it is possible to detect faults due to deterioration or pollution and mould.

DISCHARGE TIME



When the machines are disconnected, high-value capacitors may supply a hazardous voltage. This test measures whether the time taken by the discharge voltage to reach a non-hazardous value complies with the requirements (< 5s/< 1s).

TECHNICAL OVERVIEW / OTHER TESTERS

MEASUREMENT OF LOW RESISTANCES

The measurement of low resistances is **widely used in preventive maintenance** to check the continuity of the chassis-earths, surface condition and metallization, the quality of the contacts in the switches and relays, the resistance of the cables and windings, to assess motor and transformer heating and, in general, to check the mechanical joints. A wide variety of fields are involved, including the automotive sector, telecommunications, transport, motor and transformer manufacturers, etc . as well as the repair and maintenance companies working in these different sectors.

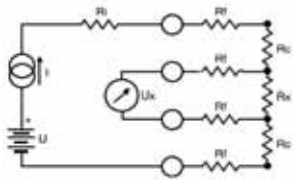
Measurement principle

The basic principle for measuring resistance involves applying Ohm's Law: U = R x I. When measuring very low resistances, a measurement current is injected and the resulting voltage is measured on the terminals of the resistance to be checked. The connections are the same as for 4-wire measurements, often called a Kelvin assembly, which limits the influence of the measurement leads when measuring low resistances.

The connection diagram is shown opposite:

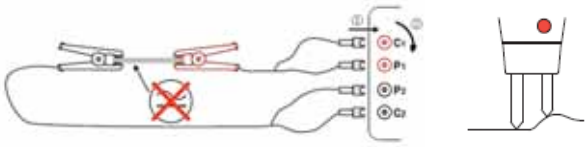
From a DC voltage source U, a generator supplies a current with the value I.

A voltmeter measures the voltage drop Ux at the terminals of the resistor Rx to be measured and displays Rx = Ux / I. The result is independent of the other resistances encountered in the current loop (Ri, Rf, Rc), as long as the total voltage drop which they cause with Rx remains lower than the voltage which the current source can supply.



Where: Ri = internal resistance of the instrument, Rf = resistance of the measurement wires, Rc = contact resistance, Rx = resistance to be measured

In practice, double retractable test probes, pivoting or otherwise, or Kelvin clamps are used for better contact with the object to be tested. Lastly, when measuring on a rivet, the two contacts of a given test probe must be capable of retracting by different amounts.

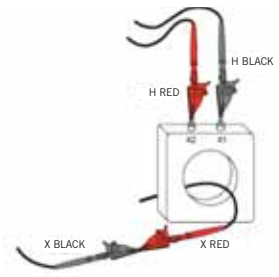


The micro-ohmmeters must offer a resolution of 1 µΩ or even 0.1 µΩ, a wide measurement range and compensation of the thermocouple effects by inversion of the measurement current. To ensure operator safety, the equipment must be protected against accidental overvoltages, prevent measurement in the presence of a disturbance voltage and trigger automatic discharging after measurements on inductive objects.

Lastly, as the resistance of metals changes significantly according to the temperature, it is a good idea to present the result at a given reference temperature. The instruments with the best performance automatically perform this calculation according to the type of metal, its temperature coefficient (approximately 0.4 %/°C for copper or aluminium), the ambient temperature and the reference temperature.

MEASUREMENT OF THE TRANSFORMER RATIO AND EXCITATION CURRENT

Strict compliance with the primary / secondary ratio values of the voltage, power and current transformer is crucial because any variation of these values over time is a sign of problems in the transformer, such as internal damage, possible deterioration of the insulants due to mechanical damage or contamination or short-circuits between loops. In addition, accurate measurement of the excitation current can identify problems in the magnetic core of the transformer, such as type and thickness of the material, mechanical stresses and air-gap and assembly variations.



By checking the winding polarity and the presence of open circuits or groups of terminals in open circuit, it is possible to detect rewiring errors after maintenance operations. **Transformer ratio measurements performed using the method described in the IEEE C57.12-90™- 2006 reference document ensure standard, repeatable measurements.**

As such measurements are often performed in environments where a lot of noise is present, it is important for the operator to

be able to choose different filters in order to obtain more reliable results in such environments. Operator safety is ensured by a technique involving primary excitation, thus guaranteeing that no hazardous signal can occur at the secondary terminals of the transformer being tested.
Storage of different "boilerplates" (specifications) in the instrument and direct display of the ratio value and its percentage deviation from the rated value help to speed up interpretation of the measurements performed.
Their long battery life and their storage capacity for the results make digital ratiometers particularly useful for performing and analysing measurements.

MOTOR DIRECTION AND PHASE ROTATION TESTS

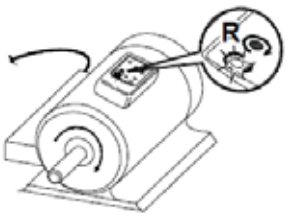
Interconnection of several sections of the electrical network or several buildings on the same site in a three-phase system requires the phase sequence to follow the normal direction. This is **particularly crucial for the power supplies of rotating machines** as **the rotation order of the phases connected determines the direction of the rotating field and therefore the rotation direction of the rotor.**

Phase rotation direction

The phase rotation direction can be determined by connecting the three phases of the electrical network to be tested to the tester, in accordance with the markings. **The tester then indicates the phase rotation direction**: clockwise or anticlockwise. In this case, the tester is self-powered via the measurement inputs.
To cover a wide range of applications, **the equipment must be capable of operating at frequencies from 15 to 400 Hz.**

Rotating field direction or rotation direction without connection

For some phase sequence detectors, the possibility of testing without connection, simply by positioning the tester on the casing of the motor, allows you to obtain a quick indication of the rotating field direction. In this mode, the tester must be set up in parallel to the rotor and in the prescribed direction. This principle is not valid when controlling a motor by means of a frequency converter.



Determination of the phase connection direction on a motor

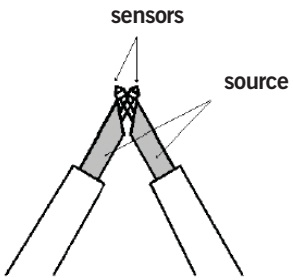
If you connect the motor's power supply phases to the tester and turn the rotor half a turn to the right by hand, the tester indicates whether or not the phase wires are connected in the right order.

Indication of solenoid valve activation without connection

On testers capable of testing without connection, the activation of a solenoid valve can be detected by placing the tester close to the valve. The clockwise or anticlockwise LED then indicates the direction of the field generated.

BATTERY CAPACITY MEASUREMENT

Research carried out by battery manufacturers has shown that **the internal impedance of a rechargeable battery increases with its age and the number of discharges which it has undergone.** By analysing the internal impedance, you can therefore assess the condition of the elements inside and determine whether the battery needs to be replaced or not.
Instead of the absolute value of the battery's internal resistance, it is the variation of the value which is important. Indeed, a 25% increase causes performance to fall by approximately 80%. These values may vary according to the battery technology involved. These values are compared with the instantaneous measurements made and noted when the batteries were installed.
Preventive maintenance equipment should simultaneously measure and display the internal resistance by means of a 4-wire method for AC at a frequency close to 1 kHz, **as well as the open-circuit voltage**. As the internal resistance values measured may be low, you have to compensate the resistance of the measurement leads and retractable test probes.



A large number of alarm comparison systems are used to quickly detect battery deterioration. On the basis of this comparison, the result is assessed and one of the LEDs (PASS, WARNING, FAIL) is then activated accordingly.

IEC 61557	■	■	■	■

C.A 6030

Ref. : P01191511

600 V CAT III | IP 54

STRENGTHS

- Dedicated to RCD testing
- Earth loop measurement without tripping the RCD
- Automatic detection of the L/N/PE positions on the mains socket
- Optical communication for data printing and transfer

SPECIFICATIONS

	C.A 6030
Voltage measurement	2 to 550 V (DC or RMS) at connection
Frequency	15.3 Hz to 450 Hz at connection
Wiring polarity: test + inversion	Yes
RCD tests	
Rated voltage / frequency of the installation	90 to 550 V / 15.3 to 65 Hz
IΔn	10 / 30 / 100 / 300 / 500 mA + variable from 6 mA to650 mA
No-trip test	½ IΔn
Trigger time	IΔn, 2 IΔn, 5 IΔn, 150 mA, 250 mA
Trigger current	Step mode
L-PE loop measurement (without RCD trip > 30 mA)	Measurement of Z and R
Rated voltage / frequency of the installation	90 to 550 V /15.3 to 65 Hz
Measurement range	0.1 Ω to 4,000 Ω
Accuracy	10 % of the value +15 cts
Measurement current	0.1 to 0.5 IΔn
Short-circuit current calculation (Isc)	Up to 2.75 kA
Live earth measurement (1 stake) (no RCD trip > 30 mA)	
Rated voltage / frequency of the installation	90 to 550 V / 15.3 to 65 Hz
Measurement range	0.1 Ω to 4000 Ω
Accuracy	10 % of value + 15 cts
Measurement current	0.1 to 0.5 IΔn
Phase rotation	90 < voltage present < 550 V
Current / leakage current (with optional current clamp)	
MN20 clamp	5 mA to 20 A
C172 clamp	5 mA to 20 A
C176 clamp	50 mA to 200 A
Cable compensation	Yes
Alarms	In each function
Memory	100 measurements
Communication output	Optical interface
Power supply /Electrical safety	6 x 1.5 V batteries / IEC 61010-1 - 600 V CAT III
Display	Backlit 4,000-count LCD
Dimensions / weight	211 x 108 x 60 mm / 0.9 kg

ADDITIONAL INFO

- The C.A 6030 is delivered as standard with a European mains power socket
- It can also be delivered with a 1P loop-measurement kit:
- C.A 6030 + 1P loop kit ____ P01299921

CONTENTS

- C.A 6030 delivered in a “neck-strap” bag with 1 shoulder bag for accessories containing 1 measurement lead with a European mains power socket,
- 1 measurement lead with 3 separate cables,
- 3 crocodile clips
- 3 test probes
- Data transfer software
- 1 optical communication cable

ACCESSORIES / REPLACEMENT PARTS

- C172 current clamp ____ P01120310
- C176 clamp ____ P01120330
- See all the accessories on page 100

INSTALLATION TESTERS

C.A 6113 - C.A 6116N - C.A 6117

Ref. : P01145445 P01145455 P01145460

600 V CAT III | IP 53

STRENGTHS

- Tests on RCDs (types AC, A and B)
- Battery life of up to 30 hours
- Testing according to IEC 60364-6, NF C 15-100, VDE 100, XP C 16-600…
- Automatic continuity measurement
- Colour screen (except C.A 6113)
- Measurements: voltage, current via clamp, power, waveforms and harmonics
- Loop measurement with 1 mΩ resolution

ADDITIONAL INFO

- Integrated fuse table for quick result readings on the instrument
- User-friendly interface
- Extra-wide graphical screen
- Integrated contextual help for each function
- ICT data export software provided
- Compatible with the DataView® software
- Delivered as standard with a three-point European mains lead

ACCESSORIES / REPLACEMENT PARTS

- Three-point lead with separated wires 2.5 m — P01295398
- Three-point lead for testing European mains sockets — P01295393
- See all the accessories on page 100

EFFECTIVE CONTEXTUAL HELP AND GUARANTEED SAFETY

These testers are equipped with **clear, detailed contextual help**. This makes them suitable for both experts and less-experienced users.
There is dedicated help for each measurement, including a guide to the connections to be set up and **help for interpreting the results**. For greater safety, if it is incorrectly connected or if a hazardous voltage is present, the instrument displays an error message in order to warn the user.

CONTENTS

- C.A 6113 delivered in a shoulder bag with:
- 1 x PA 30 W power pack
- 1 Euro 3-point lead - 3 safety leads (red, blue, green)
- 3 test probes Ø 4 mm (red, blue, green)
- 3 crocodile clips (red, blue, green)
- 2 elbowed-straight safety leads (red and black) 3 m long
- 1 three-point Euro mains lead
- 1 remote-control probe
- 1 anti-scratch film mounted on the instrument
- 1 wrist-strap
- 1 x 4-point hands-free strap
- 1 CD-ROM containing the user manual

- C.A 6116N and C.A 6117 delivered in a shoulder bag with:
- 1 mains power / charger pack (type 2)
- 1 Li-Ion rechargeable battery pack mounted on the instrument
- 1 USB A/B cable 1.80 m long with ferrite
- 1 three-point lead - 3 safety leads (red, green and blue)
- 3 test probes Ø 4 mm (red, green and blue)
- 3 crocodile clips (red, green and blue)
- 2 elbowed-straight safety leads 3 m long (red and black)
- 1 three-point EURO mains lead
- 1 two-point EURO mains lead
- 1 remote-control probe
- 1 anti-scratch film mounted on the instrument
- 1 wrist-strap
- 1 x 4-point hands-free strap
- ICT data export software on CD-ROM
- 1 CD-ROM containing the user manual

INSTALLATION TESTERS

SPECIFICATIONS

		C.A 6113	C.A 6116N	C.A 6117
Continuity / Resistance				
	Measurement current	I > 200 mA up to 39.99 Ω and 12 mA approx. up to 400 Ω		
	Accuracy	± (1.5% of measurement + 2 cts), with audible beep		
	Range	4kΩ / 40kΩ - 400kΩ		
Insulation				
	Test voltage	50 /100 / 250 / 500 / 1,000 V DC		
	Range / accuracy	0.01 MΩ to 2 GΩ / ±(5 % of measurement + 3 cts)		
	Short-circuit current	≤ 3mA		
Earth				
3P earth	Range	0.50 Ω to 15 kΩ		
	Accuracy	±(2 % of measurement + 2 cts)		
	Others	RH & RS auxiliary-stake resistance measurement (up to 40 kΩ)		
1P selective earth	Range / accuracy	0.20 Ω to 399.9 Ω ±(10 % of measurement + 10 cts) (ISel via clamp)		
Loop impedance (Zs (L-PE) and Zi (L-N or L-L)) – 1P live earth				
Live earth	Installation voltage / freq.	990 to 500 V / 15.8 to 17.5 Hz - 45 to 65 Hz		
High-current mode - Zs (L-PE) (TRIP) & Zi (L-N or L-L) Range / accuracy		Max. test current: 7.5 A 0.100 Ω to 399.99 Ω / ±(5% of measurement + 2 cts)		
NO TRIP mode (Zs (L-PE))		Test current: 6 mA – 9 mA – 12 mA (as required) - 0.20 Ω to 3,999 Ω ±(5% of measurement + 2 cts)		
Calculation of short-circuit current Ik (PFC (Zs)) , I Sc (PSCC (Zi))		Fault and short-circuit current: display range 0.1 A to 6 kA		
Integrated fuse table				Yes
Voltage drop ΔU% (Zi)				-40% to + 40%
Others		Measurement of the resistive and inductive components of the impedances Zs and Zi		
RCDs				
RCD types AC and A	Installation voltage / freq.	90 V to 500 V / 15.8 Hz to 17.5 Hz and 45 Hz to 65 Hz		
	IΔn	10/30/100/300/500/650/1000 mA (90V – 280V) or variable - 10/30/100/300/500 mA (280-550V) or variable Ramp and pulse test		
	No-trip test	½ IΔn – Duration: 1,000 ms or 2,000 ms		
	Trip current Ramp mode	0.3 x IΔn to 1.06 x IΔn per increment of 3.3% x IΔn		
	Trip time measurement Pulse mode	0.2 à 0.5 x IΔn (Uf) / 0.5 x IΔn / 2 x IΔn (selective) / 5 x IΔn. Pulse: 0 to 500 ms, Ramp mode: 0 to 200 ms		
Type-B RCDs	Installation voltage / freq.			90 V to 275 V / 15.8 Hz to 17.5 Hz and 45 Hz to 65 Hz
	IΔn: ramp / pulse 2 x IΔn pulse 4 x IΔn			10/30/100/300/500 mA 10/30/100 mA
	Test in Ramp mode			0.2 x IΔn to 2.2 x IΔn
	Trip test			1.1x2 or 2.2x2 or 2.2x4 x IΔn
Other measurements				
	Current	(1 mA*) 5.0 mA to 19.99 A (MN77 clamp) / 5.0 mA to 199.9 A (C177A clamp)		
	Voltage	0 to 550 V AC/DC / DC and 15.8 to 500 Hz		
	Frequency	10 to 500 Hz		
	Phase rotation	20 to 500 V_{AC}		
	Active power		0 to 110 kW single-phase - 0 to 330 kW three-phase Simultaneous display of the voltage and current waveforms	
	Harmonics		Voltage and current / up to 50th order / THD-F / THD-R	
General specifications				
	Large backlit LCD screen, 320 x 240 pts	monochrome graphical 5.7 ''	colour graphical 5.7''	
	Memory/Communication		1,000 tests, via USB for data transfer and report creation	
	Power supply: rechargeable battery	NiMH 9.6 V rated 4 Ah.	Lithium-ion 10.8 V rated 5.8 Ah	
	Battery life	up to 24 hours	up to 30 hours	
	Dimensions / weight	280 x 190 x 128 mm / 2,2 kg		
	Ingress protection / EMC	IP 53 / IK04 / IEC 61326-1		
	Electrical safety / standards	IEC 61010 -1 – 600 V CAT III – 300 V CAT IV – IEC 61557		

*if a voltage is connected to the instrument

HAND-CRANKED INSULATION TESTERS

C.A 6501 - C.A 6503

Ref. : P01132503 P01132504

300 V CAT III

IP 54

STRENGTHS

- Rugged plastic casing ideal for all-terrain use
- Special for on-site use
- No power supply required

CONTENTS

- C.A 6501 delivered in a shoulder bag
- 2 elbowed / straight PVC leads 1.5 m long (black/red)
- 2 crocodile clips (black/red)
- 1 black test probe

- C.A 6503 delivered in a shoulder bag
- 3 elbowed/straight PV leads 1.5 m long (black/red/blue)
- 3 crocodile clips (black/red/blue)
- 1 black test probe

SPECIFICATIONS

	C.A 6501	C.A 6503
Insulation		
Test voltage (DC)	500 V	250 V / 500 V / 1000 V
Range	0.5 to 200 MΩ	1 to 5,000 MΩ
Accuracy	2.5 % of full scale	2.5 % of full scale
Resistance		
Range	45 to 500 kΩ	-
Accuracy	2.5 % of full scale	
Continuity		
Range	0 to 100 Ω	-
Accuracy	2.5 % of full scale	
Voltage		
Range	0… 600 VAC	
Frequency	45 to 450 Hz	
Accuracy	3 % of full scale	
Display	Analogue	
Dimensions / weight	120 x 120 x 130 mm / 1.06 kg	
Power supply	Hand-cranked magneto providing a stable voltage	
Ingress protection	IP 54 with cover IP 52 without cover	
Electrical safety	IEC 61010 - 600 V CAT II / 300 V CAT III	

ACCESSORIES / REPLACEMENT PARTS

- Shoulder bag no. 2 — P01298006
- C.A 846 thermo-hygrometer — P01156301Z
- See all the accessories on page 100

ANALOGUE INSULATION TESTERS

C.A 6511 - C.A 6513

Ref. : P01140201 P01140301

600 V CAT III

IP 40

STRENGTHS

- Simple to use
- Rugged thanks to their shockproof sheath

SPECIFICATIONS

	C.A 6511	C.A 6513
Insulation		
Test voltage (DC)	500 V	500 V / 1000 V
Range	0.1 to 1,000 MΩ	
Accuracy	± 5 % of measurement	
Resistance		
Range	-	0 to 1,000 Ω
Accuracy	-	± 3 % of full scale
Continuity		
Range	–10 Ω to +10 Ω	
Accuracy	± 3 % of full scale	
Measurement current	≥ 200 mA	
Current reversal	Yes	
Voltage		
Range	0… 600 VAC	
Frequency	45 to 400 Hz	
Accuracy	± 3 % of full scale	
Display	Analogue	
Dimensions / weight	167 x 106 x 55 mm / 500 g (excl. sheath)	
Power supply	4 x 1.5 V LR06 batteries	
Electrical safety	IEC 61010 - 600 V CAT III	

ADDITIONAL INFO

- C.A 6511 : insulation at 500 V, continuity at 200 mA
- C.A 6513 : insulation at 1,000 V, continuity at 200 mA and resistance

CONTENTS

- C.A 6511 and C.A 6513 delivered mounted in their shockproof sleeves
- 2 elbowed/straight PVC leads 1.5 m long (black/red)
- 1 black test probe
- 1 red crocodile clip
- 4 x 1.5 V LR06 batteries
- 1 replacement fuse

ACCESSORIES / REPLACEMENT PARTS

- C.A 861 thermometer + K thermocouple P01650101Z
- C.A 846 thermo-hygrometer P01156301Z
- See all the accessories on page 100

DIGITAL INSULATION TESTERS

C.A 6522 - C.A 6524 - C.A 6526

Ref. : P01140822 P01140824 P01140826

600 V CAT IV | IP 54 | IEC 61557 | Bluetooth | TRMS

STRENGTHS

- Test voltage from 50 to 1,000 V
- Measurement range from 10 kΩ to 200 GΩ
- PI and DAR ratios to determine the quality of the insulation
- Alarms and Pass/Fail indicator LEDs (C.A 6526)
- Storage of up to 1,300 measurements

CONTENTS

- C.A 6522, C.A 6524 or C.A 6526
- 1 "hands-free" bag
- 2 elbowed-straight safety leads (red and black) 1.50 m long
- 1 red crocodile clip
- 1 black test probe
- 6 x LR6 batteries
- 1 CD-ROM containing the multilingual user manual
- 1 safety datasheet in 20 languages
- In addition, for the C.A 6526: 1 CD-ROM containing the Megohmmeter Transfer software

ACCESSORIES / REPLACEMENT PARTS

- Type-3 remote-control probe ____ P01102092A
- 2 elbowed-straight safety leads (red and black) 1.50 m long ____ P01295453Z
- See all the accessories on page 100

SPECIFICATIONS

	C.A 6522	C.A 6524	C.A 6526
	Industrial maintenance		
Voltage			
Measurement range / resolution	0.3 V - 399.9 V / 0.1 V; 400 V - 700 V / 1 V

Test current accuracy	-	± (10 % + 3 cts)	
PI/DAR ratios	-	10 min / 1 min - 1 min / 30 s	
Timer (min:s)	0:00 - 39:59		
Discharge time (at 25 V)	< 2 s/µF		
Alarms	-	2 fixed thresholds + 1 prog. threshold	
Continuity			
Continuity measurement range	0.00 Ω -10.00 Ω (200 mA)	0.00 Ω - 10.00 Ω (200 mA) 0.0 - 100.0 Ω (20 mA)	
Accuracy / Open-circuit voltage	± (2 % + 2 cts) / ≥ 6 V		
Measurement current	200 mA : 200 mA (-0 mA +20 mA) - 20 mA : 20 mA ± 5 mA		
Continuity thresholds (fast beep)	2 Ω fixe	2 Ω, 1 Ω , programmable threshold	
Cable compensation	Up to 9.99 Ω		
Resistance			
Measurement range / resolution	-	0 - 3,999 Ω / 1 Ω 4.00 kΩ - 39.99 kΩ / 10 Ω 40.0 kΩ - 399.9 kΩ / 100 Ω 400 kΩ - 1,000 kΩ / 1 kΩ	
Accuracy	± (3 % + 2 cts)		
Capacitance			
Measurement range / resolution	-	-	0.1 nF - 399.9 nF / 0.1 nF 400 nF - 3,999 nF / 1 nF 4.00 µF - 10.0 µF / 10 nF
Accuracy	-	-	± (3 % + 2 cts)
Line length			
General specifications			
Display	2 x 4,000 cts + logarithmic bargraph		
Storage	-	300 measurements	1,300 measurements
Communication	-	-	Bluetooth® Class II
Power supply / automatic power-off	6 x LR6 batteries / 5 min, deactivatable		
Battery life	1,500 measurements : U_N x 1 kΩ @ U_N (5 s ON / 55 s OFF) 3,000 continuity measurements (5 s ON / 55 s OFF)		
Dimensions / weight / IP rating	211 x 108 x 60 mm / 850 g / IP 54 / IK 04		
EMC / Electrical safety	IEC 61326-1 / IEC 61010-1 and IEC 61010-2-030, 600 V CAT IV		
Compliance with standards	IEC 61557 parts 1, 2, 4 and 10		

(1): 2 kΩ for the C.A 6532, C.A 6534 and C.A 6536.
(2): To be added: 10 V: 1 % per 0.1 GΩ; 25 V: 0.4 % per 0.1 GΩ, 50 V: 2 % per GΩ, 100 V: 1 % per GΩ; 250 V : 0.4 % per GΩ; 500 V: 0.2 % per GΩ; 1,000 V: 0.1 % per GΩ.

C.A 6532 - C.A 6534 - C.A 6536

Ref. : P01140832 P01140834 P01140836

600 V CAT IV | IP 54 | IEC 61557 | TRMS

STRENGTHS

- Test voltage from 50 to 500 V
- Measurement range from 2 kΩ to 50 GΩ
- ΔRel mode and configurable alarms
- Measurement of capacitance per unit length in nF/km (C.A 6532)
- 200 mA / 20 mA continuity with active fuseless protection

CONTENTS

- C.A 6532, C.A 6534 ou C.A 6536
- 1 “hands-free” bag
- 2 elbowed-straight safety leads (red and black) 1.50 m long
- 1 red crocodile clip
- 1 black test probe
- 2 wire grips (red/black)
- 6 x LR6 batteries
- 1 CD-ROM containing the multilingual user manual
- 1 safety datasheet in 20 languages
- 1 CD-ROM containing the Megohmmeter Transfer software (except C.A 6536)

ACCESSORIES / REPLACEMENT PARTS

- Type 3 remote-control probe — P01102092A
- 2 elbowed-straight safety leads (red and black) 1.50 m long — P01295453Z
- See all the accessories on page 100

SPECIFICATIONS

	C.A 6532 Telecom	C.A 6534 Electronics	C.A 6536 Avionics, aerospace, defence
Voltage			
Measurement range / resolution	0.3 V - 399.9 V / 0.1 V; 400 V - 700 V / 1 V		
Accuracy / input impedance	± (3 % + 2 cts) / 400 KΩ		
Operating frequency	DC ; 15.3 - 800 Hz		
Frequency			
Measurement range / resolution / Accuracy	15.3 Hz - 399.9 Hz / 0.1 Hz / ± (1 % + 2 cts) 400 - 800 Hz / 1 Hz / ± (1 % + 1 ct)	-	-
Insulation			
Test voltage	50 - 100 V	10-25-100-250-500 V	10 to 100 V 1 V increments
Range at maximum test voltage	20 GΩ	50 GΩ	20 GΩ
Compliance with IEC 61557-2 std		2 GΩ	
Measurement range: 10 V		2 kΩ - 1 GΩ	2 kΩ - 2 GΩ
25 V		5 kΩ - 2 GΩ	(UN/5) kΩ to (UN/5) GΩ
50 V	10 kΩ - 10 GΩ		
100 V	20 kΩ - 20 GΩ	20 kΩ - 10 GΩ	20 kΩ - 20 GΩ
250 V		50 kΩ - 25 GΩ	
500 V		100 kΩ - 50 GΩ	
Variable test voltage			10 to 100 V
Measurement range / resolution	10(1) - 999 KΩ and 1.000 - 3.999 MΩ / 1 KΩ; 4.00 - 39.99 MΩ / 10 KΩ 40.0 - 399.9 MΩ / 100 KΩ; 400 - 3,999 MΩ / 1 MΩ 4.00 - 39.99 GΩ / 10 MΩ; 40.0 - 200 GΩ / 100 MΩ		
Accuracy	± (3 % + 2 cts)(2)		± (3 % + 2 cts)(3)
Test voltage (I < 1 mA)	-0 % + 20 %		± 0.5 V
Test voltage display	± (3 % + 3 cts)		
Test current / resolution	0.01 µA - 39.99 µA / 10 nA; 40.0 - 399.9 µA / 100 nA 0.400 - 2.000 mA / 1 µA		
Accuracy of test current	± (10 % + 3 cts)		
PI/DAR ratios	10 min / 1 min - 1 min / 30 s	-	-
Timer (min:s)	0:00 - 39:59		
Discharge time (at 25 V)	< 2 s/µF		
Alarms	2 fixed thresholds + 1 programmable threshold		
Continuity			
Continuity measurement range	0.00 Ω - 10.00 Ω (200 mA); 0.0 - 100.0 Ω (20 mA)		
Accuracy / open-circuit voltage	± (2 % + 2 cts) / ≥ 6 V		
Measurement current	200 mA : 200 mA (-0 mA +20 mA) - 20 mA : 20 mA ± 5 mA		
Continuity thresholds (fast beep)	2 Ω, 1 Ω , programmable threshold		
Cable compensation	up to 9.99 Ω		
Resistance			
Measurement range / resolution	0 - 3,999 Ω / 1 Ω ; 4.00 kΩ - 39.99 kΩ / 10 Ω / ± (3 % +2 cts) 40.0 kΩ - 399.9 kΩ / 100 Ω 400 kΩ - 1,000 kΩ / 1 kΩ / ± (3 % + 2 cts)		
Capacitance			
Measurement range / resolution	0.1 nF - 399.9 nF / 0.1 nF 400 nF - 3,999 nF / 1 nF 4.00 µF - 10.0 µF / 10 nF	-	-
Accuracy	± (3 % + 2 cts)	-	-
Line length	0 - 100 km	-	-
General specifications			
Display	2 x 4,000 cts + logarithmic bargraph		
Storage	1,300 measurements		-
Communication	Bluetooth® Class II		-
Power supply / Automatic power-off	6 x LR6 battery / 5 min, deactivatable		
Battery life	1,500 measurements: UN x 1 kΩ @ UN (5 s ON / 55 s OFF) 3,000 continuity measurements (5 s ON / 55 s OFF)		
Dimensions / weight / IP rating	211 x 108 x 60 mm / 850 g / IP 54 / IK 04		
EMC / electrical safety	IEC 61326-1 / IEC 61010-1 and IEC 61010-2-030, 600 V CAT IV		
Compliance with standards	IEC 61557 parts 1, 2, 4 and 10		

(1) : 2 kΩ for the C.A 6532, C.A 6534 and C.A 6536.
(2) : To be added: 10 V: 1 % per 0.1 GΩ; 25 V: 0.4 % per 0.1 GΩ, 50 V: 2 % per GΩ, 100 V: 1 % per GΩ; 250 V: 0.4 % per GΩ; 500 V: 0.2 % per GΩ; 1,000 V: 0.1 % per GΩ.
(3) : To be added: 10 % /UN per 100 MΩ

DIGITAL INSULATION TESTERS

C.A 6541 - C.A 6543

Ref. : P01138901 P01138902

600 V CAT III

IP 53

STRENGTHS

- Test voltages from 50 V to 1,000 V
- Wide measurement range from 2 kΩ to 4 TΩ
- Automatic calculation of DAR / PI quality ratios
- Communication for C.A 6543

SPECIFICATIONS

	C.A 6541	C.A 6543
Insulation		
Test voltage		
50 V	2 kΩ to 200 GΩ	
100 V	4 kΩ to 400 GΩ	
250 V	10 kΩ to 1 TΩ	
500 V	20 kΩ to 2 TΩ	
1,000 V	40 kΩ to 4 TΩ	
Accuracy		
2 kΩ to 40 GΩ	±5 % of value ± 3 cts	
40 GΩ to 4 TΩ	±15 % of value ± 10 cts	
Programming of test duration	1 to 59 min.	
DAR (1 min. / 30 sec.)	0.000 to 9.999	
PI (10 min. / 1 min.)	0.000 to 9.999	
Adjustable PI	Time adjustable from 30 s to 59 min.	
Voltage test / safety	0 to 1,000 $V_{AC/DC}$	
Voltage alert indicator	Yes > 25 V	
Test inhibition	Yes > 25 V	
Smooth function	Yes	
Continuity		
Range	0.01 to 39.99 Ω	
Measurement current	≥ 200 mA up to 20 Ω	
Resistance		
Range	0.01 to 400 kΩ	
Capacitance		
Range	0.005 to 4.999 µF	
Memory - Communication		
Storage of R(t)	20-kbyte memory	128-kbyte memory
Storage of measurements	20 measurement results	Up to 1,500 measurement results
Direct report printing	-	On locally-connected printer, fixed format
Communication port	No	RS232
PC software	No	DataView® (option)
Display	Giant LCD + bargraph	Giant LCD + bargraph
Power supply	8 x LR14 batteries	NiMH rechargeable battery
Dimensions / weight	240 x 185 x 110 mm / 3.4 kg	240 x 185 x 110 mm / 3.4 kg
Electrical safety	IEC 61010 600 V CAT III – IEC 61557	IEC 61010 600 V CAT III – IEC 61557

ADDITIONAL INFO

- Site-proof casing with highly shock-resistant lid
- Delivered with an accessories bag which can be clipped onto the site-proof casing

CONTENTS

- C.A 6541 delivered with an accessories bag containing:
- 1 set of 2 leads 1.5 m long (red/blue)
- 1 black guarded lead 1.5 m long
- 3 crocodile clips (red/blue/black)
- 1 test probe (black)
- 8 x LR14 batteries
- C.A 6543 delivered with an accessories bag containing:
- 1 set of 2 leads 1.5 m long (red/blue)
- 1 black guarded lead 1.5 m long
- 3 crocodile clips (red/blue/black)
- 1 test probe (black)
- 1 power-supply lead 2 m long
- 1 communication cable

ACCESSORIES / REPLACEMENT PARTS

- Remote-control probe P01101935
- C.A 861 thermometer + K thermocouple P01650101Z
- See all the accessories on page 100

C.A 6505

Ref. : P01139704

1000 V CAT III | IP 53

STRENGTHS

- Fixed and programmable test voltages from 40 V to 5,100 V
- Wide measurement range from 10 kΩ to 10 TΩ
- Large LCD screen
- Automatic calculation of the DAR / PI quality ratios
- Measurement of voltage, capacitance and leakage current

SPECIFICATIONS

	C.A 6505
Insulation	
Test voltage	
500 V	10 kΩ to 2 TΩ
1,000 V	100 kΩ to 4 TΩ
2,500 V	100 kΩ to 10 TΩ
5,000 V	300 kΩ to 10 TΩ
Voltage programming	40 V to 1,000 V: 10 V increments 1,000 V to 5,100 V: 100 V increments
Accuracy	
1 kΩ to 400 GΩ	±5 % of value ± 3 cts
400 GΩ to 10 TΩ	±15 % of value ± 10 cts
Programming of test duration	1 to 59 min.
DAR (1 min. / 30 sec.)	0.02 to 50.00
PI (10 min. / 1 min.)	0.02 to 50.00
Customizable PI	Time adjustable from 30 s to 59 min.
Voltage test / Safety	0 to 1,000 VAC/DC
Voltage alert indicator	Yes > 25 V
Test inhibition	Yes > 25 V
Capacitance	0.001 to 49.99 µF
Leakage current measurement	0.001 nA to 3 mA
Display	Giant LCD + bargraph
Power supply	NiMH rechargeable battery
Dimensions / weight	270 x 250 x 180 mm / 4.3 kg
Electrical safety	IEC 61010 1000 V CAT III – IEC 61557

ADDITIONAL INFO

- Site-proof casing with highly shock-resistant lid
- Delivered with a shoulder bag

CONTENU

- C.A 6505 delivered with a shoulder bag containing:
- 2 simplified measurement leads 2 m long, equipped with an HV plug at each end
- 1 guarded safety lead 2 m long, equipped with an HV plug at one end and an HV plug with rear connection at the other end
- 1 guarded safety lead 0.35 m long, equipped with an HV plug at one end and an HV plug with rear connection at the other end
- 3 crocodile clips (red, blue and black)
- 1 mains power-supply lead 1.80 m long

ACCESSORIES / REPLACEMENT PARTS

- C.A 846 thermohygrometer ____ P01156301Z
- C.A 846 thermometer + K thermocouple ____ P01650101Z
- See all the accessories on page 100

DIGITAL INSULATION TESTERS

C.A 6545 - C.A 6547

Ref. : P01139701 P01139702

1000 V CAT III

IP 53

STRENGTHS

- Fixed and programmable test voltages from 40 V to 5,100 V
- Wide measurement range from 30 kΩ to 10 TΩ
- Measurement filtering functions
- Automatic calculation of DAR / PI / DD ratios
- Storage and communication with the C.A 6547

SPECIFICATIONS

	C.A 6545	C.A 6547
Insulation		
Test voltage		
500 V	30 kΩ to 2 TΩ	
1,000 V	100 kΩ to 4 TΩ	
2,500 V	100 kΩ to 10 TΩ	
5,000 V	300 kΩ to 10 TΩ	
Voltage programming	40 V to 1,000 V: 10 V increments 1,000 V to 5,100 V: 100 V increments

C.A 6549

Ref. : P01139703

1000 V CAT III | IP 53

STRENGTHS

- Calculation of the resistance at a reference temperature
- Graphical display of R(t) curves
- Fixed and programmable test voltages from 40 V to 5,100 V
- Wide measurement range from 30 kΩ to 10 TΩ
- Test by voltage ramp

SPECIFICATIONS

	C.A 6549
Insulation	
Test voltage	
500 V	30 kΩ to 2 TΩ
1,000 V	100 kΩ to 4 TΩ
2,500 V	300 kΩ to 10 TΩ
5,000 V	300 kΩ to 10 TΩ
Voltage programming	40 V to 1,000 V: 10 V increments 1,000 V to 5,100 V: 100 V increments
Automatic voltage increments	Programmable value and duration up to 5 steps, three profiles stored
Accuracy	
30 kΩ to 40 GΩ	±5 % of value ± 3 cts
40 GΩ to 10 TΩ	±15 % of value ± 10 cts
test duration programming	1 to 59 min.
DAR (1 min. / 30 sec.)	0.02 to 50.00
PI (10 min. / 1 min.)	0.02 to 50.00
Customizable PI	Time adjustable from 30 s to 59 min.
DD	0.02 to 50.00
Voltage test / Safety	0 to 1,000 VAC/DC
Voltage alert indicator	Yes > 25 V
Test inhibition	Yes – Adjustable according to test voltage
Smoothing function	Configurable – Digital filtering stabilizing the measurements
Capacitance	0.005 to 49.99 µF
leakage current measurement	0.001 nA to 3 mA
Memory– Communication	
Storage of R(t)	Viewing on display + Storage of the samples
Storage of measurements	Up to 1,500 measurement results
Direct report printing	On locally-connected printer, fixed format
Communication port	RS-232
PC software	DataView® (option)
Display	Wide graphical screen
Power supply	NiMH rechargeable battery
Dimensions / weight	270 x 250 x 180 mm / 4.3 kg
Electrical safety	IEC 61010 1000 V CAT III – IEC 61557

ADDITIONAL INFO

- Compatible with the DataView® software
- Delivered with a shoulder bag

CONTENTS

- C.A 6549 delivered with a shoulder bag containing:
- 2 safety leads 3 m long with HV plug and HV crocodile clip (red/blue)
- 1 guarded safety lead 3 m long with rear-connection HV plug and HV crocodile clip (black)
- 1 cable with rear connection (blue) 0.35 m long
- 1 mains power cable 2 m long
- 1 communication cable

DIGITAL INSULATION TESTERS

C.A 6550 - C.A 6555

Ref. : P01139705 P01139706

1000 V CAT IV

IP 54

STRENGTHS

- Fixed and programmable test voltages from 40 V to 10/15 kV
- Wide measurement range from 10 kΩ to 30 TΩ
- 5 mA charging current
- Digital graphical display and bargraph of the R(t) + U(t), i(t) and i(u) curves in real time
- Ramp and voltage step tests

ADDITIONAL INFO

- Resistance calculation at a reference temperature
- memory capacity: 80,000 measurements
- Optically-isolated USB communication
- 2 levels of diagnostics available :
  - Go / No go
  - Qualitative measurement for preventive maintenance

CONTENTS

- C.A 6550 and C.A 6555 delivered with a shoulder bag containing:
- 2 safety leads 3 m long equipped with an HV plug at each end (red/blue)
- 1 guarded safety lead 3 m long equipped with an HV plug at one end and an HV plug with rear connection at the other end (black)
- 3 crocodile clips (red, blue, black)
- 2 x CAT IV 1000 V test probes (red/black) for voltage measurement
- 1 blue lead 0.5 m long with rear connection
- 1 mains power cable 2 m long
- DataView® software
- 1 optical / USB communication cable
- 1 CD-Rom containing the user manual

ACCESSORIES / REPLACEMENT PARTS

- 2 red/black test probes — P01295454Z
- 3 crocodile clips (red/blue/black) — P01103062
- See all the accessories on page 100

SPECIFICATIONS

	C.A 6550	C.A 6555
Test voltages	10 kV	15 kV
Insulation measurement		
Ranges	500 V : 10 kΩ to 2 TΩ	
	1,000 V : 10 kΩ to 4 TΩ	
	2,500 V : 10 kΩ to 10 TΩ	
	5,000 V : 10 kΩ to 15 TΩ	
	10,000 V : 10 kΩ to 25 TΩ	
		15,000 V : 10 kΩ to 30 TΩ
Fixed test voltages	500 / 1,000 / 2,500 / 5,000 / 10,000 V	500 / 1,000 / 2,500 / 5,000 / 10,000 / 15,000 V
Variable test voltages	40 V - 10,000 V 3 preconfigurable voltage values	40 V - 15,000 V 3 preconfigurable voltage values
Adjustment increment for variable voltages	Variable: 40-10 kV Increment: 40 V - 1 kV: 10 V 1 kV - 10 kV: 100 V	Variable: 40-15 kV Increment: 40 V - 1 kV: 10 V 1 kV - 15 kV: 100 V
Ramp mode	3 preconfigurable ramps: start voltage / end voltage / duration	
Ramp configuration range	40-1,100 V / 500-10,000 V	40-1,100 V / 500-15,000 V
Step mode	Up to 10 plateaux (values and duration configurable for each plateau)	
Voltage measurement before and after test	AC : 0 - 2,500 V DC : 0 - 4,000 V	
Capacitance measurement (> 500 V)	0.001-9.999 µF / 10.00-49.99 µF	
Leakage current measurement	0 - 8 mA	
Discharge after test	Yes / automatic	
Additional test stop modes		
I-limit	Programmable 0.2 - 5 mA	
Early-break	di/dt	
Timer	Up to 99:59 minutes	
Debug mode		
Burn-in	Permanent test	
Calculation of ratios	PI, DAR, DD, SV, ΔR (ppm/V)	
Calculation of R at ref. temp.	Yes	
Measurement display filter	3 filters with variable time constant	
Graphs on display	R(t)+u(t) ; i(t) ; i(u)	
Storage	256 recordings, 80,000 cts R, U, I and date-stamp	
Communication	Optically-isolated port for USB and RS232 connection	
PC software	DataView®	
Power supply	NiMH rechargeable batteries, 8 x 1.2 V / 4,000 mAh Charging by 90-260 V 50/60 Hz external voltage	
Electrical safety	1000 V CAT IV - IEC 61010-1 and IEC 61557	
Dimensions / weight	406 x 330 x 174 mm, 6 kg approx.	

MULTIMETER CLAMPS FOR LEAKAGE CURRENT

F62 - F65

Ref. : P01120760 P01120761

10 µA | **10,000 counts**

STRENGTHS

- Quick leakage-current testing
- Troubleshooting of insulation faults on live installations
- 50/60 Hz filter

CONTENTS

- F62 & F65 delivered with 1 shoulder bag
- 1 set of straight banana/elbowed banana leads
- 1 set of safety test probes
- 2 x 1.5 V LR03 batteries

ACCESSORIES / REPLACEMENT PARTS

- Red + black crocodile clips in blister pack (set of 2) P01295457Z
- Elbowed test-probe leads, 1.5 m (1 red /1 black) P01295456Z
- See all the accessories on page 100

*Used with the C.A 6474

C.A 6421 - C.A 6423

Ref. : P01123011 P01127013

IP 54

STRENGTHS

- 2-pole and 3-pole methods
- Simple to use
- Confirmation of the measurement by self-diagnosis
- Designed for use in the field with leakproof on-site casing and easy-to-read display

SPECIFICATIONS

	C.A 6421	C.A 6423
Measurement	Earth	
Type	2P & 3P	
Resistivity	No	
Measurement range	0.5 to 1,000 Ω	0.01 to 2,000 Ω (in 3 automatic calibres)
Resolution	-	10 mΩ / 100 mΩ / 1 Ω (depending on calibre)
Accuracy	± (5 % + 0.1 % at full scale)	± (2 % + 1 pt)
No-load voltage	≤ 24 V	≤ 48 V
Frequency	128 Hz	
Alarms	3 fault indicator LEDs	
Power supply	8 x 1.5 V LR06 batteries	
Display	Analogue	2,000-count digital LCD
Electrical safety	IEC 61010 & IEC 61557	
Dimensions / weight	238 x 136 x 150 mm / 1.3 kg	

CONTENTS

- C.A 6421 and C.A 6423 delivered with transport strap
- 8 x 1.5 V LR06 batteries

ACCESSORIES / REPLACEMENT PARTS

- Transport strap P01298005
- HRC fuse, 0.1 A - 250 V (x 10) P01297012
- See all the accessories on page 100

C.A 6416 - C.A 6417

Ref. : P01122015 P01122016

STRENGTHS

- Quick earth-loop testing
- OLED screen and force compensation system
- Simultaneous display of Ω and A
- Contact voltage alarm

ADDITIONAL INFO

- Automatic measurement HOLD when the clamp is opened
- Android application downloadable from Google Play

CONTENTS

- 1 clamp delivered in a shoulder bag
- 4 x 1.5 V LR06 batteries
- 1 verification certificate
- 1 CD-ROM containing the user manual
- The C.A 6417 is delivered with the simplified GTC driver as well

ACCESSORIES / REPLACEMENT PARTS

- Bluetooth USB modem ____ P01102112
- CL1 calibration loop ____ P01122301
- See all the accessories on page 100

SPECIFICATIONS

	C.A 6416	C.A 6417
Loop ohmmeter 1,500-count display	Measurement ranges (Ω) / Resolution (Ω) / Accuracy	
	0.010 to 0.099 / 0.001 / ±1.5 % ±0.01	
	0.10 to 0.99 / 0.01 / ±1.5 % ±2 r (r = resolution)	
	1.0 to 49.9 / 0.1 / ±1.5 % ±r	
	50.0 to 99.5 / 0.5 / ±2 % ±r	
	100 to 199 / 1 / ±3 % ±r	
	200 to 395 / 5 / ±5 % ±r	
	400 to 590 / 10 / ±10 % ±r	
	600 to 1,150 / 50 / Approx. 20 %	
	1,200 to 1,500 / 50 / Approx. 25 %	
Frequencies	Measurement frequency: 2,083 Hz Translation frequency: 50, 60, 128 or 2,083 Hz	
Loop inductance measurement	Measurement ranges (µH) / Resolution (µH) / Accuracy	
	10 to 100 / 1 / ±5 %±r	
	100 to 500 / 1 / ±3 %±r	
Contact voltage (calculated)	Measurement ranges (V) / Resolution (V) / Accuracy	
	0.1 to 4.9 / 0.1 / ±5 %+r	
	5.0 to 49.5 / 0.5 / ±5 %+r	
	50.0 to 75.0 / 1 / ±10 %+r	
Ammeter 4,000-count display	Measurement ranges (A) / Resolution (A) / Accuracy	
	0.200 to 0.999 mA / 1 µA / ±2 % ±50 µA	
	1.000 to 2.990 mA - 3.00 to 9.99 mA / 10 µA / ±2 % ±50 µA	
	10.00 to 29.90 mA - 30.0 to 99.9 mA / 100 µA / ±2 %±r	
	100.0 to 299.0 mA - 0.300 to 0.990 A / 1 mA / ±2 %±r	
	1.000 to 2.990 A - 3.00 to 39.99 A / 10 mA / ±2 %±r	
Setup		
Modes	Standard or advanced	
Alarms	Configurable on Z, V and A	
Buzzer	Active / Inactive	
HOLD	Manual or automatic PRE-HOLD	
Automatic power-off	Active / Inactive	
General specifications		
Display	152-segment OLED. Active area: 48 x 39 mm	
Max. clamping diam.	Ø 35 mm	
Storage	300 time/date-stamped measurements	2,000 time/date-stamped measurements
Communication		Bluetooth® Class 2
Power supply	4 x 1.5 V LR06 alkaline batteries or 4 x Ni-MH rechargeable batteries	
Battery life	1,440 x 30-second measurements	
Calibration	Automatic at startup	
Electrical safety	IEC 61010 600 V CAT IV	
Ingress protection	IP40	
Dimension / weight	55 x 95 x 262 mm / Approx. 935 g with batteries	

EARTH AND RESISTIVITY TESTERS

EARTH / RESISTIVITY / COUPLING TESTERS

C.A 6460 - C.A 6462

Ref. : P01126501 P01126502

IP 53

STRENGTHS

- 3-in-1 testers: resistivity, earth and coupling
- Validation of the measurement by self-diagnosis: 3 LEDs indicating the presence of faults liable to make the measurement result invalid
- Highly-resistant site-proof casing with lid for use in severe field conditions
- Large LCD display with backlighting

CONTENTS

- C.A 6460 delivered with 8 x 1.5 V LR06 batteries
- C.A 6462 delivered with 1 mains lead for recharging

SPECIFICATIONS

	C.A 6460	C.A 6462
Measurement	Earth / resistivity / coupling	
Type	3P & 4P	
Measurement range	0.01 to 2,000 Ω (in 3 automatic calibres)	
Resolution	10 mΩ / 100 mΩ / 1 Ω (depending on calibre)	
Accuracy	± (2 % + 1 ct)	
No-load voltage	≤ 42 V peak	
Frequency	128 Hz	
Alarms	3 fault indicator LEDs	
Power supply	8 x 1.5 V LR06 batteries	NiMH rechargeable battery
Display	2,000-count digital LCD	
Electrical safety	IEC 61010 & CEI 61557	
Dimensions	273 x 247 x 127 mm (handle folded away)	
Weight	2.8 kg	3.3 kg

ACCESSORIES / REPLACEMENT PARTS

- European 2P mains lead — P01295174
- HRC fuse, 0.1 A - 250 V (x 10) — P01297012
- See all the accessories on page 100

EARTH / RESISTIVITY / COUPLING / CONTINUITY TESTER

C.A 6470N

Ref. : P01126506

IP 53 | 50 V CAT IV

STRENGTHS

- 4-in-1 tester: Earth / Resistivity / Coupling / Continuity
- Suitable for industry, housing and electricity companies

SPECIFICATIONS

	C.A 6470N
3P method	
Range (automatic selection)	0.01 Ω to 99.9 kΩ
Resolution	0.01 to 100 Ω
Test voltage	16 or 32 V, selectable
Measurement frequency	41 to 513 Hz, automatic or manual
Test current	Up to 250 mA
Accuracy	± 2 % of value ± 1 ct
4P method	
Range	0.001 Ω to 99.99 kΩ
Resolution	0.001 to 10 Ω
Test voltage	16 V or 32 V
Measurement frequency	41 to 513 Hz, automatic or manual
Test current	Up to 250 mA
Measurement accuracy	± 2 % of value ± 1 ct
Soil resistivity measurement - 4P method	
Measurement method	Wenner or Schlumberger method with automatic calculation of the results and display in Ω-metre
Range (automatic selection)	0.01 Ω to 99.99 kΩ
Resolution	0.01 Ω to 100 Ω
Test voltage	16 or 32 V, selectable
Measurement frequency	41 to 128 Hz
External voltage measurement	
Range (automatic selection)	0.1 to 65.0 VAC/DC - DC and 15-440 Hz
Accuracy	± 2 % of value + 1 ct
Resistance / continuity measurement - earth connection test)	
Measurement type	2P or 4P method, selectable
Range (automatic selection)	2P : 0.01 Ω to 99.9 kΩ 4P : 0.001 Ω to 99.99 kΩ
Accuracy	± 2 % of value + 3 cts
Test voltage	16 VDC (polarity +, – or auto)
Test current	> 200 mA for R < 20 Ω
Storage	
Memory capacity	512 test results
Communication	Optically-isolated USB
Power supply	Rechargeable battery
Charger power supply	External power supply with 18 VDC / 1.5 A output or 12 VDC vehicle power supply
Dimensions / weight	272 x 250 x 128 mm / 3.2 kg
Electrical safety	50 V CAT IV

CONTENTS

- C.A 6470N delivered with:
- 1 mains adapter
- 1 x 2-pole mains power cable for battery recharging on the mains
- Data export software
- 1 optical / USB communication cable
- 1 CD-Rom containing the user manual
- 5 specifications labels

ACCESSOIRES / RECHANGES

- DataView® report generation software ____ P01102095
- Adapter for battery-charging on vehicle cigarette-lighter ____ P01102036
- See all the accessories on page 100

EARTH AND RESISTIVITY TESTERS

EARTH / SELECTIVE EARTH / RESISTIVITY / COUPLING / CONTINUITY TESTER

C.A 6471

Ref. : P01126505

IP 53 | 50 V CAT IV

STRENGTHS

- 5-in-1 tester: Earth / Selective earth / Resistivity / Coupling / Continuity
- Ideal for industry and electricity companies

CONTENTS

- C.A 6471 delivered with:
- 1 mains adapter
- 1 x 2-pole main power cable for battery recharging on the mains
- Data export software
- 1 optical / USB communication cable
- 2 x C182 clamps with 2 safety leads
- 1 carrying bag
- 1 CD-Rom containing the user manual
- 5 specifications labels

ACCESSORIES / REPLACEMENT PARTS

- DataView® report generation software ____ P01102095
- Adapter for battery recharging on vehicle cigarette lighter _ P01102036
- See all the accessories on page 100

SPECIFICATIONS

	C.A 6471
Measurements with 2 clamps	
Range	0.01 to 500 Ω
Resolution	0.01 to 1 Ω
Measurement frequency	Auto : 1,611 Hz Manual : 128 Hz - 1,367 Hz - 1,611 Hz - 1,758 Hz
3P method	
Range (automatic selection)	0.01 Ω to 99.9 kΩ
Resolution	0.01 Ω to 100 Ω
Test voltage	16 V or 32 VRMS rated voltage, selectable
Measurement frequency	41 to 513 Hz, automatic or manual
Test current	Up to 250 mA
Accuracy	± 2 % of value + 1 ct at 128 Hz
4P method / 4P+clamp measurement	
Range	0.001 Ω to 99.99 kΩ
Resolution	0.001 to 100 Ω
Test voltage	16 V or 32 V, selectable
Measurement frequency	41 to 513 Hz, automatic or manual
Test current	Up to 250 mA
Measurement accuracy	± 2 % of value ± 1 ct
Soil resistivity measurement	
Measurement method	Wenner or Schlumberger method with automatic calculation of the results and display in Ω-metre
Range (automatic selection)	0.01 to 99.99 kΩ ; ρ max. 999 kΩm
Resolution	0.01 Ω to 100 Ω
Test voltage	16 or 32 V, selectable
Measurement frequency	41 to 128 Hz, selectable
External voltage measurement	
Range (automatic selection)	0.1 to 65.0 VAC/DC - DC and 15-440 Hz
Accuracy	± 2 % of value + 1 ct
Resistance / Continuity measurement - (earth connection test)	
Measurement type	2P or 4P method, selectable
Range (automatic selection)	2P: 0.01 Ω to 99.9 kΩ; 4P : 0.001 Ω to 99.99 kΩ
Accuracy	± 2 % of value + 2 cts
Test voltage	16 VDC (polarity +, – or auto)
Test current	> 200 mA for R < 20 Ω
Storage	
Memory capacity	512 test results
Communication	Optically-isolated USB
Power supply	Rechargeable battery
Charger power supply	External power supply with 18 VDC / 1.9 A output or 12 VDC
Dimensions / weight	272 x 250 x 128 mm / 3.2 kg
Electrical safety	50 V CAT IV

EARTH / SELECTIVE EARTH / RESISTIVITY / COUPLING / CONTINUITY / PYLON EARTH TESTER

C.A 6472

Ref. : P01126504

IP 53 | 50 V CAT IV

STRENGTHS

- All types of earth resistance measurement & pylon earth measurement (with the C.A 6474)
- Resistivity (Wenner + Schlumberger methods)
- Earth coupling
- Soil potential measurement
- Continuity / resistance

CONTENTS

- C.A 6472 delivered with:
- 1 mains adapter
- 1 x 2-pole mains power cable for battery recharging on the mains
- Data export software
- 1 optical / USB communication cable
- 2 x C182 clamps with 2 safety leads
- 1 carrying bag
- 1 CD-Rom containing the user manual
- 5 specifications labels

ACCESSORIES / REPLACEMENT PARTS

- DataView® report generation software ____ P01102095
- Adapter for battery charging on vehicle cigarette lighter ____ P01102036
- See all the accessories on page 100

SPECIFICATIONS

	C.A 6472
3P measurements	
Range (automatic selection)	0.01 Ω to 99.9 kΩ
Resolution	0.01 Ω to 100 Ω
Test voltage	16 V or 32 VRMS rated voltage, selectable
Measurement frequency	41 to 5.078 Hz, automatic or manual
Test current	Up to 250 mA
Accuracy	± 2 % R +1 ct at 128 Hz
Measurements with 2 clamps	
Range	0.01 to 500 Ω
Resolution	0.01 to 1 Ω
Measurement frequency	Auto: 1,611 Hz - Manual: 128 Hz - 1,367 Hz - 1,611 Hz - 1,758 Hz
4P method / 4P+clamp measurement	
Range	0.001 Ω to 99.99 kΩ
Resolution	0.001 to 10 Ω
Test voltage	16 V or 32 V, selectable
Measurement frequency	41 to 5,078 Hz, automatic or manual
Test current	Up to 250 mA
Measurement accuracy	± 2 % of value ± 1 ct
Soil resistivity measurement - 4P method	
Measurement method	Wenner or Schlumberger method with automatic calculation of the results and display in Ω-metre
Range (automatic selection)	0.01 to 99.99 kΩ ; ρ max. 999 kΩm
Resolution	0.01 Ω to 100 Ω
Test voltage	16 or 32 V, selectable
Measurement frequency	41 to 512 Hz, selectable
Earth potential measurement	
Measurement range	0.00 to 65.00 V
Resolution	0.01mV to 10 mV
Measurement frequency	41 to 5,078 Hz
Accuracy	± 5% + 1 ct at 128 Hz
External voltage measurement	
Range (automatic selection)	0.1 to 65.0 VAC/DC - DC and 15-450 Hz
Accuracy	± 2 % of value + 1 ct
Resistance / Continuity measurement	
Measurement type	2P or 4P method, selectable
Range (automatic selection)	2P : 0.01 Ω to 99.9 kΩ 4P : 0.001 Ω to 99.99 kΩ
Accuracy	± 2 % of value + 2 cts
Test voltage	16 VDC (polarity +, – or auto)
Test current	> 200 mA for R < 20 Ω
Storage	
Memory capacity	512 test results
Communication	Optically-isolated USB
Power supply	Rechargeable battery
Charger power supply	External power supply with 18 VDC / 1.9 A output or 12 VDC vehicle power supply
Dimensions / weight	272 x 250 x 128 mm / 3.2 kg
Electrical safety	50 V CAT IV

SPECIALLY FOR MEASUREMENTS ON PYLONS

C.A 6474

Ref. : P01126511

IP 53

STRENGTHS

- **Used with the C.A 6472 for measurements on pylons**
- Overall line impedance
- Pylon earth resistance
- Resistance of each pylon footing
- Quality of overhead earth wire connection

SPECIFICATIONS

	C.A 6474 / PYLON BOX
Measurements	
Measurement type	Overall pylon earth resistance Earth resistance of each pylon footing Overall line impedance Quality of overhead earth wire connection. Active measurement (injection by the C.A 6472) Passive measurement (use of eddy currents)
Range	0.067 Ω to 99.99 kΩ
Accuracy	± (5 % + 1 ct)
Frequency	41 to 5,078 Hz
Frequency sweep	Yes
Dimensions	272 x 250 x 128 mm
Weight	2.3 kg
Power supply / Storage / Display	Provided by the C.A 6472

ADDITIONAL INFO

The complete Pylon Earth Kit is available to order with the code P01299930. It comprises:

- C.A 6472
- C.A 6474
- 5 m AmpFlex®
- 100 m earth kit

Possibility of connecting several AmpFlex® sensors in series for a length > 8 metres

Available with 8 m AmpFlex® sensor

CONTENTS

- C.A 6474 delivered with an accessories bag containing:
- 1 connection cable
- 6 BNC/BNC cables 15 m long
- 4 AmpFlex® flexible current sensors 5 m long
- 1 set of 12 identification rings for AmpFlex®
- 2 cables (5 m green, 5 m black) with safety plugs on winder
- 5 spade lug/Ø 4 mm banana plug adapters
- 3 adjustable clamps
- 1 calibration loop
- 5 specifications labels

ACCESSORIES / REPLACEMENT PARTS

- Connection cable between the C.A 6472 and C.A 6474 — P01295271
- 15 m BNC/BNC cable — P01295272
- See all the accessories on page 100

- Leakage current

SPECIFICATIONS

	C.A 6160
Insulation	
Test voltage	250 / 500 / 1,000 VDC
Measurement range	0.000 MΩ to 999 MΩ
Accuracy	0.000 to 1.999 MΩ: ±(5 % R + 10 cts) 2.000 to 199.9 MΩ: ±(3 % R + 3 cts) 200 to 999 MΩ: ±(10 % R + 10 cts)
Dielectric test	
Test voltage	100 to 5,000 VAC - 50 Hz/60 Hz for Umains = 230 V at 500 VA
Trigger current	0.5 to 500 mA up to 500 VA
Continuity	
Test current	0.1 / 0.2 / 10 / 25 A
Measurement range	0.000 to 9.999 Ω for I = 10 A or 25 A 0.00 to 100.0 Ω for I = 0.1 A
Accuracy at 10 / 25 A	(3 % R + 3 cts)
Voltage drop	0.00 to 99.99 V at 10 A
Discharge time	External (at mains socket) Internal (components)
Leakage current	
Measurement range	0.00 to 20.0 mA
Accuracy	±(5 % R + 3 cts)
Residual leakage current	
Measurement range	0.00 to 20.0 mA
Accuracy	±(5 % R + 3 cts)
Contact leakage current	
Measurement range	0.00 to 2.00 mA
Accuracy	±(5 % R + 3 cts)
Functional testing	Active power, apparent power, current, voltage, frequency, cos φ
Storage	1,600 measurements
Communication output	RS232
Power supply	Mains 230 V / 50-60 Hz
Dimensions / weight	410 x 175 x 370 mm / 13.5 kg
Ingress protection	IP 50: closed product
Electrical safety	IEC 61010-1 - 600 V CAT II - 300 V CAT III

ADDITIONAL INFO

- AUTOTEST function for automatic execution of a measurement sequence
- Storage of up to 1,600 measurements
- Checking and certification according to the European standards

CONTENTS

- C.A 6160
- 1 bag
- 2 dielectric test guns with 2 m cable
- 2 insulation test leads 3 m long
- 4 crocodile clips
- 2 test probes
- 4 continuity test leads 2.5 m long
- 1 discharge-time cable
- 1 power supply cable

ACCESSORIES / REPLACEMENT PARTS

- CE- LINK processing software — P01101996
- DB9F-DB25M adapter — P01101841
- See all the accessories on page 100

CE Link software (option) for C.A 6160

- download the recorded data
- create measurement sequences and upload them into the instrument
- perform tests remotely and recover the data directly in the software
- create and print measurement reports

ELECTRICAL EQUIPMENT TESTERS

C.A 6155

Ref. : P01146001

300 V CAT III

IP 50

STRENGTHS

- Integration of all the measurements required by the new editions of the IEC 60204 (edition5), VDE0701/0702 and IEC 61439 (ex-IEC 60439) standards
- Preprogrammed test sequences based on the standards or customizable
- Extended memory, up to 6,000 measurements stored

ADDITIONAL INFO

- Large backlit graphical display with an intuitive user interface
- Contextual help for each function
- Built-in keypad for quick, simple customization of the measurements recorded
- Possibility of connecting a barcode reader

CONTENTS

- C.A 6155
- 1 accessories bag containing 1 high-voltage test probe
- 1 test cable for mains power socket
- 1 test cable with separated wires
- 1 red lead 1.5 m long
- 1 black lead 1.5 m long
- 1 green lead 1.5 m long
- 1 red lead 4 m long
- 4 test probes
- 3 crocodile clips
- 1 USB communication cable
- 1 RS232 communication cable
- CALink data transfer software

SPECIFICATIONS

		C.A 6155
Dielectric test	Test voltage	1,000 V / 1,890 V / 2,500 V
	I limit	0.1 to 100 mA (1,890 V / 2,500 V) 0.1 to 200 mA (1,000 V)
	Timer	2, 3, 5, 10, 30 s
Insulation resistance measurement	U test	250 / 500 Vdc
	Range	up to 200 MΩ
	Timer	5, 10, 30, 60, 120 s
Continuity test	Range	0.01 to 1.99 Ω - Indication range: 2.00 Ω to 19.9 Ω
	I test	0.20 / 10 A
	U test	< 9 V
	Timer	5, 10, 30, 60, 120, 180 s
Leakage current measurement	Substitution method	0.00 to 20.0 mA
	Differential method	0.00 to 9.99 mA
	Accuracy	± (5 % R + 5 cts)
Contact leakage current measurement	Measurement range	0.00 to 2.50 mA
	Accuracy	± (10 % R + 5 cts)
Measurement of 60 V / 120 V discharge time		10 % R
	Voltage range (peak value)	0 to 550 V
	Time range	0 to 10 s
Functional testing	Apparent power	0.00 to 4.00 kVA
Power-cable polarity test		Yes
Current measurement with clamp		0.00 mA to 24.9 A
PRCD test	Calibre	10, 15, 30 mA
	Test current	0,5 x IΔn, IΔn, 5 x IΔn
	Other	Automatic PRCD test
RCD test	Calibre	10, 30, 100, 300, 500, 1,000 mA
	Test current	0.5 x IΔn, IΔn, 2 x IΔn, 5 x IΔn
	Current range	AC / AC (pulsed) / DC
	Type of RCD	General / Selective
	Type of test	Ramp / Pulse
	Uc contact voltage measurement	Yes
	Other	Automatic RCD test
High-current Zs loop measurement	Measurement current	6.5 A
	Range	0.00 to 1,999 Ω
	Accuracy	±(5 % R + 5 digits)
	Calculation of Ik	0.00 to 23.0 kA
Zs loop measurement (no RCD trip)	Range	0.00 to 1,999 Ω
	Accuracy	±(5 % R + 10 digits)
	Calculation of Ik	0.00 to 23.0 kA
Zi loop measurement	Measurement current	6.5 A
	Range	0.00 to 1,999 Ω
	Accuracy	±(5 % R + 5 digits)
	Calculation of Ik	0.00 to 199 kA
Voltage / frequency		0 to 550 V / DC, 14.0 to 499.9 Hz
Phase rotation	Voltage	100 to 550 V AC
	Frequency	14 to 500 Hz
Communication	RS 232	1 barcode/ RFID reader connection + 1 printer / PC connection
	USB	1 printer / PC connection
Alarms		Yes for all functions
Storage		6,000 memory locations
Software		Yes, delivered as standard, Pro version available as an option
Power supply		230 V / 50-60 Hz
Dimensions / weight		33.5 cm × 16.0 cm × 33.5 cm / 8.4 kg
Functional standards		VDE 701 702 / IEC 60204 Ed.5 / IEC 60439 / IEC 61439
Electrical safety		IEC 61010-1 / IEC 61557 (parts 1, 2, 3, 4, 6, 7, 10) 300 V CAT II, 300 V CAT III (TP1)
Ingress protection		IP 50: closed product

MICRO-OHMMETERS

	C.A 6240 page 91	C.A 6250 page 92	C.A 6292 page 93
4-wire measurement method (Kelvin)	■	■	■

Operation with/without voltage	
Location of a short-circuit / circuit break	
Location of cables, conductors or metal pipes	

BATTERY CAPACITY TESTERS

	C.A 6630 page 97
Min / max measurement range	40 mΩ / 40 Ω
Min / max resolution	10 µΩ / 10 mΩ
Measurement frequency	1 kHz
Comparison function	99 sets of settings
Manual storage (number of locations)	999
Automatic storage (number of locations)	9,600

C.A 6240

Ref. : P01143200

50 V CAT III | IP 53

STRENGTHS

- 4-wire measurement method
- Automatic current reversal
- Test current up to 10 A
- 1 µΩ resolution
- Automatic recording “on the fly” or manual recording

SPECIFICATIONS

	C.A 6240					
Measurement method	4-wire method

Power supply	Rechargeable NiMH battery					
Dimensions / weight	273 x 247 x 280 mm / 5 kg					
Electrical safety	IEC 61010 - 50 V CAT III					

ADDITIONAL INFO

- The C.A 6240 is compatible with the DataView® software

CONTENTS

- C.A 6240
- 1 shoulder bag
- 1 set of 2 x 10 A Kelvin clamps with 3 m cable
- 1 European 2P mains power cable
- Data export software
- 1 optical / USB communication cable

ACCESSORIES / REPLACEMENT PARTS

- Double 1 A test probes (x 2) — P01102056
- Mini Kelvin clamp (set of 2) — P01101783
- See all the accessories on page 100

MICRO-OHMMETERS

C.A 6250

Ref. : P01143201

50 V CAT III

IP 53

STRENGTHS

- 4-wire measurement method
- Automatic compensation of stray currents
- Test current up to 10 A
- 0.1 µΩ resolution
- Integrated «temperature compensation» function

SPECIFICATIONS

	C.A 6250						
Measurement method	4-wire method						
Range	5,000mΩ	25,000 mΩ	250,00 mΩ	2500,0 mΩ	25,000 Ω	250,00 Ω	2500,0 Ω

Communication output	RS232 link						
Power supply	Rechargeable NiMH battery						
Dimensions	270 x 250 x 180 mm / 4 kg						
Electrical safety	IEC 61010 - CAT III 50 V						

ADDITIONAL INFO

- The C.A 6250 is compatible with the DataView® software
- Possibility of connecting the Pt100 sensor (option) directly to the instrument

CONTENTS

- C.A 6250
- 1 shoulder bag with 1 power cable 2 m long
- 1 set of 2 x 10 A Kelvin clamps with 3 m cables
- Data export software
- 1 RS 232 communication cable

ACCESSORIES / REPLACEMENT PARTS

- Doubles 1 A test probes (x 2) ____ P01102056
- Mini Kelvin clamp (set of 2) ____ P01101783
- See all the accessories on page 100

C.A 6292

Ref. : P01143300

IP 54 | BSG

STRENGTHS

- Permanent test at 100 A and for up to 120 s at 200 A
- Test current up to 200 A
- Resistance from 0.1 µΩ to 1 Ω
- Safe measurements: BSG method (Both Sides Grounded)
- Storage of up to 8,000 measurement results

SPECIFICATIONS

	C.A 6292		
Test current	Programmable from 20 to 200 A		
Resistance	0.1 µΩ to 2 mΩ	2 to 200 mΩ	200 mΩ to 1 Ω
Resolution	0.1 µΩ (200 A max)	10 µΩ (25 A max to 200 mΩ)	1 mΩ (5 A max to 1 Ω)
Output voltage	110 VAC : 4.2 V @ 200 A 220 VAC : 8.6 V @ 200 A		
Maximum load resistance	110 VAC : 20 mΩ @ 200 A 220 VAC : 42 mΩ @ 200 A		
Measurement method	4 Kelvin-type connection terminals		
Test mode	Normal or BSG		
Test duration	Adjustable from 5 to 120 s @200 A, unlimited below 100 A		
Storage	Up to 8,000 measurement results		
Interface	USB 2.0		
Software	DataView®		
Power supply	100 to 240 VAC - 50/60 Hz		
Dimensions	502 x 394 x 190 mm		
Weight	13 kg approx.		
Operating temperature	0 °C to +55 °C		
Storage temperature	-10 °C to +70 °C		
Humidity	95% RH		
Protection	Protected against voltage surges, short-circuits, overheating and overvoltage on the safety terminals		
Ingress protection	IP54		
Electrical safety	IEC 61010-1		
Current measurement with the optional MR6292 clamp			
Measurement range	1.0 - 50.0 ADC		
Resolution	0.1 mA		
Intrinsic uncertainty	± (1.5% + 2 cts)		
Output signal	10 mV / ADC		
Load impedance	> 100 kΩ // 100 pF		
Influence of conductor position in jaws	0.50 %		

ADDITIONAL INFO

- The backlit LCD screen with its 4 lines of 20 characters is easy to read whatever the environment.

CONTENTS

- C.A 6292 delivered with a hard case containing:
- 1 set of 2 Kelvin leads 6 m long (red / black) with adjustable-clamp connections
- 1 green earth lead 3m long with 1 crocodile clip
- 1 USB cable 1.5 m long
- 1 T1 5 A 250 V fuse mounted in the instrument
- 1 European mains power lead
- 1 CD-ROM containing the DataView® software
- 1 CD-ROM containing the user manual in 5 languages

ACCESSORIES / REPLACEMENT PARTS

- 1 set of 2 Kelvin leads 6 m long (red / black) adjustable-clamp connections — P01295486
- 1 green earth lead with crocodile clip — P01295488
- See all the accessories on page 100

RATIOMETER

DTR 8510

Ref. : P01157702

50 V CAT IV | IP 53

STRENGTHS

- Measurement of the transformation ratio of power, voltage and current transformers
- Storage of up to 10,000 measurement results
- Displays the transformation ratio, the excitation current, the winding polarity and the percentage deviation from the rated values
- Direct reading of the transformation ratio from 0.8000:1 and up to 8000.0:1
- Tests performed by excitation of the primary with measurement on the secondary

SPECIFICATIONS

	DTR 8510	
Range of ratios (VT/PT)	Automatic: 0.8000 to 8000:1	
Accuracy (VT/PT)	Range of ratios	Accuracy (% of reading)
	0.8000 to 9.9999	± 0.2 %
	10.000 to 999.99	± 0.1 %
	1000.0 to 4999.9	± 0.2 %
	5000.0 to 8000.0	± 0.25 %
Range of ratios (CT)	Autoranging: 0.8000 to 1000.0	
Accuracy (CT)	± 0.5 % of reading	
Excitation signal	VT/PT mode: 32 Vrms max CT mode: auto-level 0 to 1 A, 0.1 to 4.5 Vrms	
Display of excitation current	Range: 0 to 1,000 mA; Accuracy: ± (2 % of reading + 2 mA)	
Excitation frequency	70 Hz	
Display	Alphanumeric LCD, 2 lines of 16 characters with adjustment of the contrast and backlighting. Easy to read in both day and night conditions	
Languages available	French, English, Spanish, Italian, German, Portuguese	
Measurement method	As per IEEE Std C57.12.90™	
Power supply	Two 12 V rechargeable NiMH batteries, 1,650 mAH	
Battery life	Up to 10 hours in continuous operation; low-battery alert	
Battery charger	Universal input (90 to 264 Vrms), smart charger	
Charging time	< 4 hours for full charge	
Memory	10,000 tests	
Date / time	Powered by dedicated battery, real-time clock	
Communication	USB 2.0, optical isolation, 115.2 kB	
Software	Delivered with the DataView® analysis software	
Dimensions / weight	272 x 248 x 130 mm / 3.7 kg	
Connection	XLR connectors	
Cables	Shielded H and X cables 4.6 m (15 ft) long, equipped with colour-coded crocodile clips	
Casing	Rugged polypropylene casing, UL 90 V0	
Vibrations	IEC 68-2-6 (1.5 mm at 55 Hz)	
Shocks	IEC 68-2-27 (30 G)	
Falls	IEC 68-2-32 (1 m)	
Ingress protection	IP 40 with lid open as per EN 60529 IP 53 with lid closed as per EN 60529	
Safety	EN 61010-1, 50 V CAT IV; pollution degree 2	

ADDITIONAL INFO

- Up to 10 hours' continuous operation thanks to the rechargeable NiMH batteries

CONTENTS

- DTR 8510
- 1 shoulder bag
- 1 set of leads 4.6 m long with crocodile clips
- 1 external battery charger with mains lead
- 1 USB cable
- 1 NiMH battery datasheet
- DataView software on CD-Rom

ACCESSORIES / REPLACEMENT PARTS

- Set of 2 leads 4.6 m long ____ P01295143A
- USB cable ____ P01295293
- See all the accessories on page 100

PHASE ROTATION AND/OR MOTOR TESTERS

C.A 6608, C.A 6609

Ref. : P01191304 P01191305

600 V CAT III

IP 40

STRENGTHS

- Indication of phase presence or absence
- Determination of a motor's rotation direction with or without contact (C.A 6609 only)
- Automatic tests as soon as the connections have been set up
- Terminals and cables identified by colour coding to simplify connection

SPECIFICATIONS

	C.A 6608	C.A 6609
Operating voltage for phase rotation function	40 to 850 VAC between phases	With connection: 40 to 600 VAC between phases Without connection: 120 to 400 VAC between phases
Frequency range	15 to 400 Hz	
Power supply	Self-powered via measurement inputs	9 V battery
Dimensions	130 x 69 x 32 mm	
Weight	130 g	170 g
Electrical safety	IEC 61010-1 600 V CAT III IEC 61557-7	

CONTENTS

- C.A 6608 phase rotation testers delivered in a shoulder bag with:
- 3 test leads
- 3 crocodile clips
- C.A 6609 phase rotation and motor tester delivered in a shoulder bag with:
- 3 test leads
- 3 crocodile clips

CABLE AND METAL CONDUCTOR LOCATOR

C.A 6681

Ref. : P01141626

STRENGTHS

- Can be used on live or non-current-carrying installations
- Digital, visual and audible indication to track the conductor intuitively
- Large LCD screen with indication of the transmission power, the digital identification code and the voltage present on the circuit tested.

SPECIFICATIONS

	C.A 6681 E
Transmitted signal frequency	125 kHz
External voltage measurement	12~300 V DC/AC(50~60 Hz)
Dimensions	190 × 89 × 42.5 mm
Weight	420 g approx. with battery

	C.A 6681 R
Detection depth	Single-pole application: 0 to 2 m approx. Two-pole application: 0 to 0.5 m approx. Simple looping line: up to 2.5 m
Identification of network voltage	0~0.4 m approx.
Dimensions	241.5 × 78 × 38.5 mm
Weight	360 g approx. with battery

ADDITIONAL INFO

- Automatic or manual adjustment of signal reception sensitivity
- The transmitter and receiver units are equipped with:
  - A battery status indicator
  - An additional lighting system (torch) for use in dark environments

CONTENU

- 1 hard case containing 1 C.A 6681E transmitter
- 1 C.A 6681R receiver
- 1 set of 2 red/black leads, straight male isolated Ø 4 mm banana / elbowed make isolated Ø 4 mm banana, 1.5 m long
- 1 set of 2 red/black crocodile clips
- 1 earthing stake
- 1 adapter for mains power socket
- 1 male plug adapter for B22 bayonet socket
- 1 male plug adapter for E27 screw socket
- 1 x 9 V 6LR61 battery
- 6 x 1.5 V LR03 batteries

ACCESSORIES / REPLACEMENT PARTS

- 33 m reel of green wire with battery clip/4 mm male banana on winder with handle — P01295268
- 15 m reel of green wire with battery clip/4 mm male banana on H winder with 1 stake — P01102019
- See all the accessories on page 100

BATTERY CAPACITY TESTERS

C.A 6630

Ref. : P01191303

STRENGTHS

- Zero adjustment function for compensation of the voltage circuit displayed
- 2-display LCD screen
- 7-hour battery life in continuous operation with 6 x 1.5 V batteries (not supplied)
- Capacity test from 35 Ah to 500 Ah
- Lead and AGM batteries

SPECIFICATIONS

	C.A 6630			
Resistance measurement				
Range	40 mΩ	400 mΩ	4 Ω	40 Ω
Resolution	10 µΩ	100 µΩ	1 mΩ	10 mΩ
Measurement current	37.5 mA	3.75 mA	375 µA	37.5 µA
Accuracy	± (1 % R + 8 digits) Temp. coeff.: ± (0.1 % R + 0.5 digit) / °C			
Measurement voltage	1.5 mV_{AC}			
Measurement frequency	1 kHz ± 10 %			
Voltage measurement				
Range	4 V		40 V	
Resolution	1 mV		10 mV	
Accuracy	± (0.1 % R + 6 digits)			
Max. consumed power	1 VA			
Mechanical specifications				
Dimensions	250 x 100 x 45 mm			
Weight	500 g including batteries			

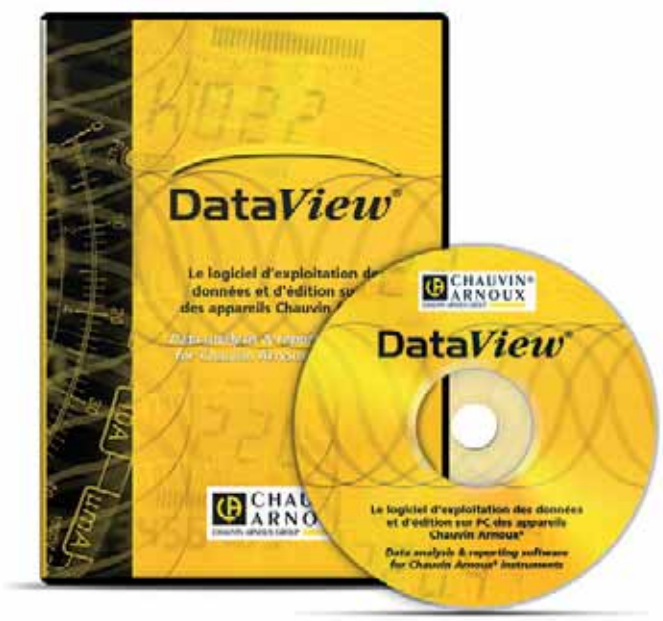
CONTENTS

- 1 hard case containing:
- C.A 6630
- 1 set of 2 measurement leads 1 m long terminated by retractable test probes
- PC data transfer software to export and process the stored data
- 1 C.A 6630 / PC connection cable

ACCESSORIES / REPLACEMENT PARTS

- Set of 2 leads with retractable test probes _____ P01102103
- See all the accessories on page 100

DATA PROCESSING SOFTWARE



DATAVIEW®

Réf. : P01102095

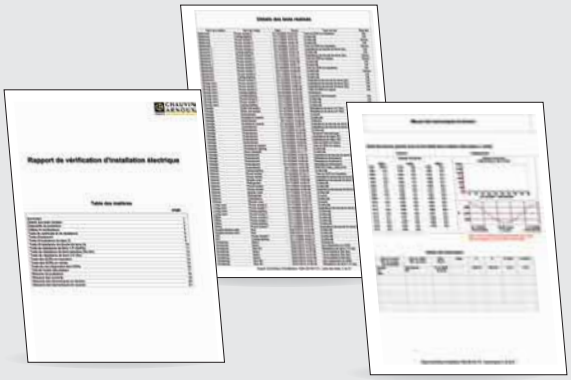
ICT | MEG | GTT | GTC | MOT | DTR

FUNCTIONS

- Configuration of all the functions of instruments connected to a PC or via Bluetooth®
- Recovery of the recorded measurement data
- Backup of measurement files
- Opening of saved files
- Processing and creation of reports
- Export into an Excel spreadsheet
- Export in .pdf format
- Database management
- Remote test activation by simply pressing a button
- Data capture and display in real time
- Display of DAR, PI and DD ratios
- Graphical plotting of programmed-duration tests and voltage ramp tests in real time
- Possibility of creating a library of configurations for specific applications
- Printing of measurement reports

ICT REPORTS ACCORDING TO THE APPLICABLE STANDARDS

The ICT module of DataView® proposes to **define the tree-structure** which will be used during the actual test campaign (sites, parts, objects), as well as the tests to be performed for each of them. Once defined in this way, the campaign can be recorded in the instrument via the communication link. This **saves significant time in the field.**



REQUIRED CONFIGURATION

- Windows XP / 256MB of RAM
- Windows Vista & Windows 7/8/10 (32/64 bit)
- 1 GB of RAM for Windows Vista & Windows 7/8 (32 bit)
- 2 GB of RAM for Windows Vista & Windows 7/8 (64 bit)
- 80 MB available space on hard disk (200 MB recommended)

ADDITIONAL INFO

- The DataView® software:
- Automatically recognizes the instrument connected when it is hooked up to the PC and opens the corresponding menu. Users then have direct access to the configuration and the recorded data
- Is equipped with a large number of predefined report templates for quick generation in compliance with the applicable standards. Users can also create their own templates, as required, and directly add their own comments.

- RS 232 printer DB 9F - DB 9M cable no. 01 — P01295173

C.A 6550 and C.A 6555

- 2 red/black test probes — P012954547
- 3 red/blue/black crocodile clips — P01103062
- USB optical cable — HX0056-Z
- Shoulder bag — P01298066
- C.A 861 thermocouple thermometer — P016501017
- C.A 846 thermo-hygrometer — P011563017
- European 2P mains lead — P01295174

MULTIMETER CLAMPS FOR LEAKAGE CURRENT

F62 and F65

- Red / black crocodile clamps (set of 2) — P012954577
- Elbowed test-probe leads, 1.5 m, (1 red/1 black) — P012954567
- Soft case 200 x 100 x 40 mm with belt clip — P012980657
- CMI214S current measurement lead — P03295509
- I/R probe for C.A 1871 multimeter — P016516107
- C.A 801 single-channel temperature adapter — P016524017
- 2-channel temperature adapter with differential measurement for C.A 803 multimeter — P016524117
- Shoulder bag no. 21 (250 x 165 x 60 mm) with strap — P06239502

EARTH AND RESISTIVITY TESTERS

C.A 6421 and C.A 6423

- Carrying bag — P01298005
- Fuse HRC 0.1 A - 250 V (x 10) — P01297012
- 1.5 V LR06 battery — P01296033
- Shoulder bag no. 2 — P01298006

C.A 6416 and C.A 6417

- DataView® software — P01102095
- Bluetooth® / USB modem — P01102112
- Hard case — P01298080
- CL1 calibration loop — P01122301

C.A 6460 and C.A 6462

- European 2P mains lead — P01295174
- Fuse HRC 0.1 A - 250 V (x 10) — P01297012
- Battery pack — P01296021
- 1.5 V LR06 battery — P01296033
- Standard bag — P01298066

C.A 6470N, C.A 6471 and C.A 6472

- DataView® report generation software — P01102095
- Adapter for battery charging on vehicle cigarette lighter — P01102036
- Optical / RS communication cable — P01295252
- UK mains lead — P01295253
- Set of 10 fuses: F 0.63 A - 250 V - 5 x 20 mm - 1.5 kA — AT0094
- Adapter for battery charging on the mains supply — P01102035
- Battery pack — P01296021
- Optical / USB communication cable — HX0056-Z

ACCESSORIES / REPLACEMENT PARTS

EARTH AND RESISTIVITY TESTERS

C.A 6471 and C.A 6472

▪ MN82 clamp (diam. 20 mm) delivered with 2 m cable for connection to ES terminal	P01120452
▪ C182 clamp (diam. 52 mm) delivered with 2 m cable for connection to ES terminal	P01120333
▪ Standard bag	P01298066

C.A 6474

▪ Connection cable	P01295271
▪ 15 m BNC/BNC cable	P01295272
▪ 5 m AmpFlex® flexible current sensor	P01120550
▪ 8 m AmpFlex® flexible current sensor	P01120551
▪ Set of 12 identification rings for AmpFlex®	P01102045
▪ Set of 3 adjustable clamps	P01102046
▪ 5 m green cable (E terminal connection)	P01295291
▪ 5 m black cable (E terminal connection)	P01295292
▪ Spade lug/banana plug adapter	P01102028
▪ Calibration loop	P01295294
▪ Prestige bag	P01298067

ELECTRICAL EQUIPMENT TESTERS

C.A 6121

▪ Machine Link Windows processing software (supplied with communication cable)	P01101915
▪ Series printer no. 5	P01102903
▪ DB9F-DB25M adapter	P01101841
▪ Remote-control pedal	P01101916
▪ Indicator lamps (green/red)	P01101917
▪ Roll of paper for series printer (set of 5)	P01101842
▪ 2 crocodile clips (red/black)	P01295457Z
▪ 2 test probes (red/black)	P01295458Z
▪ 2 dielectric test guns with 6 m cable	P01101918
▪ 2 dielectric test guns with 2 m cable	P01101919
▪ 2 safety leads 3 m long (red/black)	P01295097
▪ Continuity test lead 2.5 m long (black)	P01295137
▪ Continuity test lead 2.5 m long (red)	P01295140
▪ Discharge-time cable (European)	P01295141

C.A 6160

▪ CE- Link processing software	P01101996
▪ DB9F-DB25M software	P01101841
▪ Remote-control pedal	P01101916
▪ Indicator lamps (green/red)	P01101917
▪ 2 dielectric test guns with 6 m cable	P01101918
▪ 2 dielectric test guns with 2 m cable	P01101919
▪ 2 safety leads 3 m long (red/black)	P01295097
▪ European power cable	P01295234
▪ RS232 DB9F-DB9F communication cable	P01295172
▪ Set of 10 fuses: 2.5 A-250 V 5 x 20 T	P01297085
▪ Set of 10 fuses: 16 A-250 V 6 x 32 T	P01297086
▪ Standard bag	P01298066
▪ Discharge-time cable	P01295141
▪ 2 crocodile clips (red/black)	P01295457Z
▪ 2 test probes (red/black)	P01295458Z

C.A 6155

▪ 4 m red test lead	P01102139
▪ Red + black 1.5 m test lead	P01102138
▪ Red 1.5 m test lead	P01102140
▪ 1.5 m plug-in test cable	P01102136
▪ 3 m test cable with separate wires	P01102137
▪ Black test probe	P01101141
▪ Red test probe	P01102142
▪ Green test probe	P01102143
▪ Blue test probe	P01102144
▪ Set of 3 black crocodile clips	P01102145
▪ HV test probe	P01102135
▪ Set of 10 fuses: 16 A-250 V 6 x 32 T	P01297086

ACCESSORIES / REPLACEMENT PARTS

OTHER TESTERS

C.A 6240 and C.A 6250

- 1 A double test probe (x 2) — P01102056
- Mini Kelvin clamp (set of 2) — P01101783
- UK mains lead — P01295253
- C.A 846 thermo-hygrometer — P01156301Z
- European 2P mains lead — P01295174
- Standard bag — P01298066
- 10 A-P clamp (set of 2) — P01101794
- DataView® — P01102095
- Straight probe with 10 A double pivoting retractable test probe (x 2) — P01103063
- Gun with 10 A double retractable test probe (x 2) — P01103065

C.A 6240

- Set of 10 fuses: 6.3 x 32 / 12.5 A / 500 V — P01297091
- Optical / USB communication cable — HX0056-Z

C.A 6250

- Pt 100 temperature sensor — P01102013
- 2 m cable for remote Pt 100 — P01102014
- Series printer no. 5 — P01102903
- RS 232 PC DB 9F – DB 25F cable x 2 — P01295172
- Set of 10 fuses: 6.3 x 32 / 16 A / 250 V — P01297089
- Set of 10 fuses: 5.0 x 20 / 2 A / 250 V — P01297090

C.A 6292

- 1 set of 2 Kelvin leads 6 m long (red / black) with adjustable-clamp connections — P01295486
- 1 set of 2 Kelvin leads 15 m long (red / black) with adjustable-clamp connections — P01295487
- 1 green earth lead with crocodile clip — P01295488
- 1 set of 5 fuses: T1 5 A 250 V 5x20 mm — P01297101
- 1 USB-A USB-B cable 1.5 m long — P01295293
- 1 MR6292 clamp — P01120470

DTR 8510

- Set of 2 replacement leads 4.6 m long — P01295143A
- Set of 2 replacement leads 10 m long — Contact us
- USB cable — P01295293
- Shoulder bag — P01298066

C.A 6681

- 33 m reel of green wire, battery clip/4 mm male banana on winder with handle — P01295268
- 15 m reel of green wire, battery clip/4 mm male banana on H winder with 1 stake — P01102019
- 10 m reel of green wire, battery clip/4 mm male banana on H winder — P01102026
- Kit of 3 measurement adapters for housing (B22, E27, mains socket) — P01102114Z

C.A 6630

- Set of 2 leads with retractable test probes — P01102103

ENERGY QUALITY & INSTALLATION MONITORING

POWER AND DISTURBANCES

A phase of analysis is essential to precisely identify the behaviour of the installations and determine which solutions to implement.

The measurements made help to ensure that the solutions are pertinent and that the gains achieved are maintained over the long term in the context of an energy optimization programme.

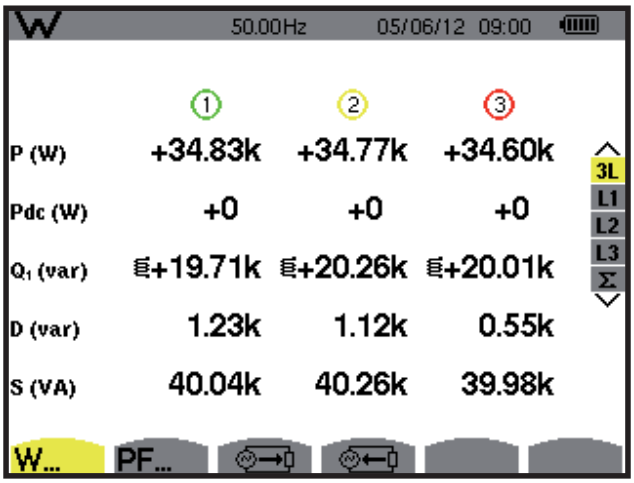
So **measurement** provides **the foundation for optimizing your installations' energy efficiency**, supervising your electrical networks and fairly allocating the costs.

POWER MEASUREMENTS

Power measurement is a key element for the definition, success and long-term effects of an energy optimization programme. Reducing electricity consumption is also a simple, painless way of saving money. Electricity is a clean energy source which is less harmful for the environment, but it does affect it nevertheless.

The various parameters of the installation are measured regularly, including the different power values used to size the electrical network and the phase shift data, as well as the voltage, current and frequency measurements.

For private customers, reactive power is neither measured nor billed separately. Instead is it included at a flat rate in the active power price. Things are very different for industrial customers, however. Electricity suppliers penalize consumers whose displacement power factor (cos phi or DPF) is lower than 0.93 (in France) or whose tan phi is higher than 0.4 (in France).



This set of measurements will help the installation manager to size the capacitor banks correctly.

TROUBLESHOOTING DISTURBANCES

With the spread of systems incorporating electronics using switching power supplies, the electrical network is becoming increasingly polluted. A further complication is the fact that electricity market deregulation could lead to more frequent general network blackouts.

The quality requirements have become much more demanding and stringent than in the past. All the equipment in factories and buildings now includes digital electronics which are known to be sensitive to micro-outages, peaks and dips, harmonics and disturbances in general.

The complexity of industrial equipment makes it vulnerable to the voltage disturbances that occur on the electrical network. The arrival of new quick-switching components is leading to a large number of low-order harmonic currents (3, 5, 7, 9, 11, ...).

Some faults are encountered very frequently. In general, most disturbances are caused by:

Slow and transient voltage variations.

The voltage amplitude is a crucial parameter for electricity quality.

The voltage amplitude varies abnormally and may even drop to a level close to zero.

The causes mainly lie in the installation itself. The connection of heavy loads may lead to voltage variations if the short-circuit power at a point of supply is undersized.

Several types of faults are then defined: overvoltage, voltage dip, outage, etc. The rated network voltage variation range is set by the power distributor.

Flicker: rapid voltage fluctuations.

When **variable loads** such as arc furnaces, laser printers, microwave ovens or air-conditioning systems **are started up, they cause rapid voltage variations**. This phenomenon is called **flicker**. In reality, the flicker value is the result of a statistical calculation based on measurements of the rapid voltage variations.

A 10-minute interval is considered an acceptable compromise for evaluation of the short-term flicker (Pst).

If the combined effect of several disturbance-generating loads operating in a random way (e.g. welding units or motors) has to be taken into account or when flicker sources with long or variable operating cycles are involved (electric arc furnace), the resulting disturbance must be assessed over a longer time. The measurement duration defined is then 2 hours, a time considered appropriate for the load operating cycle or the time during which an observer may be sensitive to long-term flicker (Plt).

Harmonics and interharmonics.

The waveform of the current consumed by loads connected to the electrical network is often no longer purely sinusoidal. This current distortion implies distortion of the voltage wich also depends on the impedance of the source. The **disturbances called harmonics are caused by connecting non-linear loads, such as equipment incorporating power electronics, to the network**. This may have instant consequences on certain electronic equipment: operating problems (synchronization, switching), untimely tripping, measurement errors on energy meters, etc. In the medium term, the extra heating caused by this may reduce the life span of rotating machines, capacitors, power transformers and neutral conductors.

Today's measuring instruments have to be capable of performing this harmonic analysis order by order, as well as measuring the Total Harmonic Distortion (THD) for more detailed diagnosis of the installation.

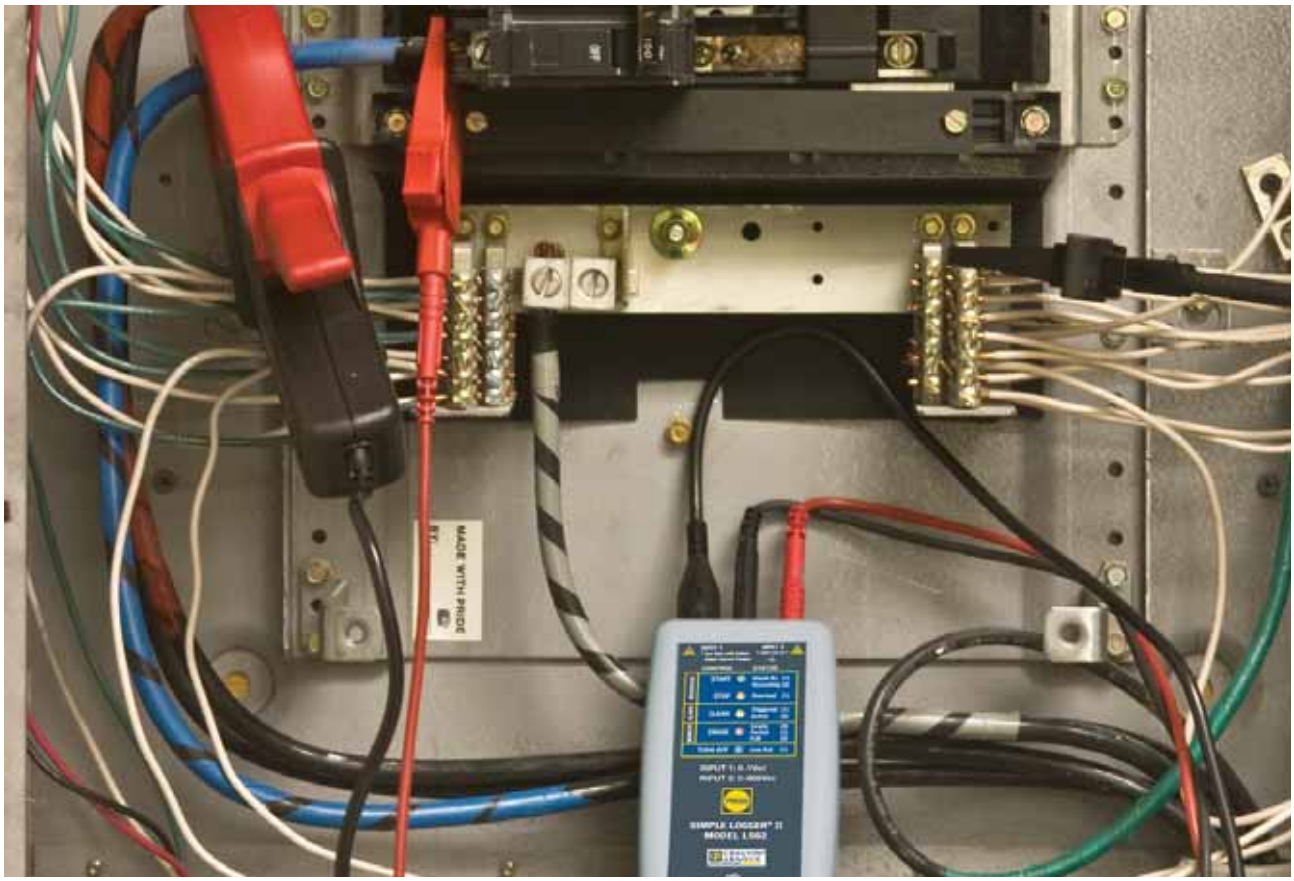
Electrical network analysers capable of recording disturbances for industrial companies and professionals in the electricity sector (producers, transmission companies, electricity users) **are essential tools for satisfactory supervision and timely maintenance of installations.**

They have to provide direct measurements, allow as much parameterization as possible for recording and facilitate subsequent analysis.

DATA LOGGING MADE SIMPLE

The **data logger family** is a cost-effective, advanced-design product line incorporating features and functions not found in data loggers costing 2 to 3 times their price. The choice of data storage modes and storage rates allows the operator to effortlessly configure these loggers to optimize memory usage for the application required.
Extended Recording Mode (XRM™) and delayed start time are **just two of the many application-friendly features** in these loggers.
An internal memory of 512 kB allows storage of over 240,000 measurements, more than enough for most data collection needs. **All the AC measurement loggers are True RMS (TRMS)** and all the DC measurement loggers allow the user to program both scale and engineering units. A full set of alarm programming tools allows programming of alarm set points and triggering on high, low, inside or outside trigger points.

Their battery operation and compact size allow **installation in locations where space is restricted** without the need for external power. A series of front-panel LEDs provides a quick overview of the logger's state and memory usage. Software is included as standard, providing real-time viewing of measurement data even while recording. Instrument configuration, data storage and report generation from predefined templates or operator custom-designed templates are also standard features. In addition, several data loggers can be synchronized to record at the same time intervals using DataView®.



MAIN ADVANTAGES

- True RMS measurements provide an accurate representation of measured signals for AC models
- Choice of data storage modes to assist in matching the data collection to the needs of the application
- Stores over 240,000 measurements, ensuring that no valuable data is missed (more than 8 hours at 8 samples per second; approximately 1 week at one sample every 2 seconds)
- Compact size and battery operation
- Display and analyse real-time data through your PC

APPLICATIONS

- DataView® helps electricians or engineers to detect problems occurring randomly during fault/intermittent current detection
- Neutral current monitoring to detect unwanted leakage currents
- Real-time current harmonics monitoring to locate unwanted energy which causes equipment failure
- Load profiling which sizes loads for proper transformer and meter selection
- Split-phase load monitoring for residential voltage and current
- Machine load monitoring detects overload conditions causing premature equipment failure due to overheating
- Process loop monitoring can detect problematic sensors and control systems
- HVAC and general temperature profiling (refrigeration and air-conditioning systems)

POWER AND HARMONICS MULTIMETER CLAMPS

F407

Ref. : P01120947

1000 V CAT IV | IP 54 | Ø 48 mm | 1000 AAC

STRENGTHS

- Measurements up to 1,000 AAC or 1,500 ADC or AAC+DC
- Clamping Ø 48 mm
- Harmonic analysis up to the 25th order
- TrueInrush function
- 3-year warranty

SPECIFICATIONS

	F407
Current(RMS)	
AC	100 mA to 1,000 A
DC and AC+DC	100 mA to 1,500 A
Best accuracy	1 % L + 3 counts
Voltage (RMS)	
AC	100 mV to 1,000 V
DC and AC+DC	100 mV to 1,000 V
Best accuracy	1 % L + 3 counts
Auto AC/DC	Yes (V and A)
Resistance	100 kΩ
Continuity/buzzer	Yes (< 40 Ω)
Power W, var, VA	Yes, single and total three-phase
Crest factor (CF)	Yes
PF and cos φ (DPF)	Yes / Yes
Auto power-off	Yes
Hold function	Yes
Backlighting function	Yes
Min Max key	Yes
Peak +/- 100 ms function	Yes / Yes
TrueInrush function	Yes
THD-f / THD-r harmonics function	Yes / Yes
Decomposition into harmonic orders	25th order
REC storage function	Yes
Recordings (with Min, Max)	Up to 3,000 measurements
Bluetooth communication function	Yes
Frequency	15 Hz to 20 kHz
Clamping Ø	48 mm
Protection	IP 54
Electrical safety	IEC 61010 1000 V CAT IV
Warranty	3 years
Dimensions / weight	272 x 92 x 41 mm - 600 g (with batteries)

CONTENTS

- F407 delivered in a bag pre-equipped for MultiFix
- 1 set of banana/banana leads (red/black)
- 1 set of test probes (red/black)
- 1 set of crocodile clips (red/black)
- 4 x 1.5 V LR6 batteries
- 1 safety datasheet
- 1 CD-Rom containing a user manual and the PC data recovery software (Power Analyser Transfer)

ACCESSORIES / REPLACEMENT PARTS

- Set of banana/banana leads (red/black) P01295451Z
- Set of crocodile clips (red/black) P01295457Z
- See all the accessories on page 142

POWER AND HARMONICS MULTIMETER CLAMPS

F607

Ref. : P01120967

1000 V CAT IV | IP 54 | Ø 60 mm | 2000 Aac

STRENGTHS

- Measurements up to 2,000 Aac or 3,000 Adc or Aac+dc
- Clamping Ø 60 mm
- Harmonic analysis up to the 25th order
- TrueInrush function
- 3-year warranty

PAC	10 A to 1,000 AAC / 10 A to 1,400 ADC
E3N	50 mA to 10 AAC+DC, 100 mA to 100 AAC+DC
Frequency	40 Hz to 70 Hz
Other measurements	W, var, PF, DPF, VA, temperature, phase rotation, RPM, resistance, continuity, diode test, Wh, VAh, varh
Harmonics	1st to 50th order
Sampling rate	256 samples/period
Recording capacity	≥ 9 complete sets of voltage, current, power and harmonics measurements
Power supply	6 x 1.5 V LR06 batteries, mains power supply available as an option
Battery life	≥ 8 hours with display activated
Communication	Optical USB
Display	Backlit 3-display screen with symbols
Dimensions / weight	211 x 108 x 60 mm / 0.88 kg
Electrical safety	IEC 61010 600 V CAT III, pollution degree 2

ADDITIONAL INFO

- The C.A 8220 analyser is also available with a current sensor:
- C.A 8220 MN93A — P01160621
- C.A 8220 AmpFlex® — P01160622

ACCESSORIES / REPLACEMENT PARTS

- C.A 1711 tachometer probe — P01102082
- 2-wire Pt100 adapter — HX0091
- See all the accessories on page 142

CONTENTS

- C.A 8220
- 2 banana leads
- 2 x 4 mm test probes
- 2 crocodile clips
- 6 x 1.5 V LR06 batteries
- 1 optical USB cable
- Power Analyser Transfer processing software
- 1 CD-ROM containing the user manual

ELECTRICAL NETWORK MAINTENANCE

C.A 8230

1000 V CAT III | 600 V CAT IV | 3U 4I | 4U 4I | IP 53 | IEC 61000-4-30 | EN 50160

STRENGTHS

- TRMS AC+DC voltage and current, frequency
- Measurements for power surveys
- Measurements for sizing the anti-harmonic filters
- Simultaneous recording of all the parameters
- Capture of all the transients, alarms and waveforms

CONTENTS

- C.A 8331 / C.A 8333 / C.A 8336 delivered with:
- 1 bag No. 22
- 1 USB lead
- 1 mains adapter
- 4 x 4 mm banana voltage leads 3 m long (5 leads for C.A 8336)
- 4 crocodile clips (5 clips for C.A 8336)
- 1 safety datasheet
- 1 set of 12-colour markers for identifying the leads and inputs
- 1 anti-scratch screen protection film (mounted)
- 1 CD-ROM containing the Power Analyser Transfer PC data recovery software

- C.A 8435 delivered with:
- 1 bag no. 22
- 1 USB cable
- 1 IP65 mains adapter
- 5 x 4 mm banana voltage leads 3 m long
- 5 crocodile clips
- 1 set of 12-colour markers for identifying the leads and inputs
- 1 anti-scratch screen protection film (mounted)
- 1 safety datasheet
- 1 CD-ROM containing the Power Analyser Transfer PC data recovery software

Don't forget to order your current sensors - see page 210

ADDITIONAL INFO

- The C.A 8435 is also available in a complete version Ref. P01160587
  - 4 AmpFlex® A196 450 IP65 current sensors,
  - 5 IP65 BB196 black banana leads 3 m long
  - 5 lockable crocodile clips
- The Power Analyser Transfer PC data recovery software is supplied as standard

ACCESSORIES / REPLACEMENT PARTS

- Black MN93A current sensor P01120434B
- Black AmpFlex® A193 450 mm P01120425B
- See all the accessories on page 142

NETWORK AND THREE-PHASE ENERGY ANALYSERS

FUNCTIONS

- Real-time waveform display (5 voltage inputs and 4 current inputs)
- ½-period RMS voltage and current measurements
- Intuitive use
- Automatic recognition of the different types of current sensors
- Integration of all the DC components
- Voltage and current ratios
- Mixing of current sensors
- Measurement, calculation and display of the harmonics up to the 50th order, along with their phase information
- Calculation of the Total Harmonic Distortion (THD)
- Transient capture down to a single sample (1/256th of a period)
- Display of phasor diagram
- Measurement of power values: VA, W, VAD, total var and var per phase
- Measurement of energy values: VAh, Wh, VADh, total varh and varh per phase
- Calculation of K factor and FHL
- Calculation of cos φ displacement power factor and (DPF) and power factor (PF)
- Capture of up to 210 transients
- Calculation of PST & PLT Flicker
- Calculation of unbalance (current and voltage)
- Monitoring of the electrical network with setting of alarms
- Backup and recording of screenshots (image and data)
- Recording and export on PC
- Real-time data recovery and communication software on PC
- EN 50160 reports

PEL 102 - PEL 103

Ref. : P01157152 P01157153

1000 V CAT III | 600 V CAT IV | IP 54

STRENGTHS

- Compatible with all electrical networks: single-phase, split-phase, three-phase with or without neutral, etc.
- Implementation without powering down the electrical network
- All the instruments can be powered by the phase
- Data recording on integrated SD card
- Compact and magnetized for mounting in closed cabinets

ADDITIONAL INFO

The PEL Transfer analysis software is delivered as standard for:

- Configuration of the PEL100s
- Verification of the connections before recording starts
- Downloading of the recorded measurements
- Display of the various measurement results and analyses

ACCESSORIES / REPLACEMENT PARTS

- Bag no. 23 — P01298078
- Mains adapter — P01102134
- See all the accessories on page 142

CONTENTS

- A PEL 102 or PEL 103 logger delivered with:
- 4 measurement leads
- 4 crocodile clips (black)
- 1 x 2 GB SD card
- 1 set of markers (for the ends of the leads and current sensors)
- 1 mains power cable
- 1 USB cable (Type A / Type B)
- 1 Multifix mounting system
- 1 carrying bag
- 1 safety datasheet
- PEL Transfer PC software
- 1 SD USB adapter
- 1 CD-ROM containing the user manual

SPECIFICATIONS

		PEL 102	PEL 103
Display		None	With triple digital display
Type of installation		Single-phase, split-phase, three-phase with or without neutral, etc.	
Number of channels		3U / 4I	
Number of inputs		4U / 3I	
Measurements			
Network frequency		DC, 50 Hz, 60 Hz & 400 Hz	
Voltage (measurement range)		10.00 to 1,000 VAC/DC	
Current	MN93	2.000 to 240.0 AAC	
	MN93A	0.005 AAC to 5.000 AAC 0.100 AAC to 120.0 AAC	
	C193	3.000 A to 1,200 AAC	
	AmpFlex® A193 & MiniFlex® MA193	200.0 mA to 10.00 kAAC	
	PAC93	10.00 A to 1,000 AAC 10.00 A to 1,400 ADC	
	E3N	50.00 mA to 10.00 AAC/DC 100.0 mA to 100.0 AAC/DC	
	J93	50 A to 3,500 AAC / 50 A to 5,000 ADC	
Calculated Measurements			
Ratios		Up to 650,000 V / up to 25,000 A	
Power		10 W to 10 GW / 10 var to 10 Gvar / 10 VA to 10 GVA	
Energy		Up to 4 EWh / 4 EVAh / 4 Evarh ($E = 10^{18}$)	
Phase		cos φ, tan Φ, PF	
Harmonics		THD	
Additional functions			
Phase sequence		Yes	
Min / Max		Yes	
Mounting		Magnet, hook	
Recording			
Sampling rate / Acquisition interval / Aggregation		128 samples/period - 1 measurement/s from 1 min to 60 min	
Data storage		SD card, 8 GB (SD-HC card up to 32 GB)	
Communication		Ethernet & BlueTooth®	
Power supply		110 V - 250 V (+10%, -15%) @ 50-60 Hz & 400 Hz	
Safety		IEC 61010 600 V CAT IV 1000 V CAT III	
Mechanical specifications			
Dimensions		256 x 125 x 37 mm without sensor	
Weight		900 g	950 g
Casing		IP54, ETL	

PEL 105

Ref. : P01157155

1000 V CAT IV | IP 67

STRENGTHS

- Suitable for installation on an electricity pole
- All-terrain casing resistant to shocks, UV light and high temperatures
- Self-powered by its voltage inputs up to 1,000 V
- Continuous recording with a 200 ms acquisition interval
- Measurements in compliance with the IEEE 1459 standards

ADDITIONAL INFO

- When used with the DataView® software, the measurements made with the PEL105 can be processed directly for measurement report generation.

ACCESSORIES / REPLACEMENT PARTS

- A196A current sensor — P01120552
- Pole mounting kit — P01102146
- See all the accessories on page 142

CONTENTS

- One PEL105 logger delivered with:
- 5 black silicone leads 3 m long, straight banana / straight banana
- 5 black crocodile clips, 1000 V CAT IV
- 1 set of inserts/rings
- 4 AmpFlex® IP67 A196 3 m long
- 1 set of waterproof caps
- 1 SD card
- 1 USB cable
- 1 bag
- 1 safety datasheet
- 1 USB key containing a quick startup guide and a user manual

SPECIFICATIONS

		PEL 105
Display		With triple digital display
Type of installation		Single-phase, split-phase, three-phase with or without neutral, etc.
Number of channels		4U / 4I
Number of inputs		5U / 4I
Measurements		
Network frequencies		DC, 50 Hz, 60 Hz & 400 Hz
Voltage (measurement range)		10.00 V to 1,000 VAC/DC @ 50/60 Hz 600 VAC @ 400 Hz
Current	MN93	500 mA to 200 AAC
	MN93A	0.005 AAC to 100 AAC
	C193	1 A to 1,000 AAC
	AmpFlex® A193 & MiniFlex® MA193	200 mA to 10 kAAC
	PAC93	1 A to 1,000 AAC / 1 A to 1,300 ADC
	E3N	50 mA to 10 AAC/DC / 100 mA to 100 AAC/DC
	J93/J193	50 to 3,500 AAC / 50 to 5,000 ADC
Calculated measurements		
Power		20 W to 10 GW 20 var to 10 Gvar 20 VA to 10 GVA
Energy		Up to 4 EWh / 4 EVAh / 4 Evarh ($E = 10^{18}$)
Phase		cos φ, tan Φ, PF
Harmonics		THD
Additional functions		
Phase sequence		Yes
Min / Max		Yes
Recording		
Sampling rate / Acquisition interval / Aggregation		128 samples./period 5 measurements/s From 1 min to 60 min
Data storage		8 GB SD card (SD-HC card up to 32 GB)
Communication		Ethernet, Bluetooth®, WiFi and USB
Power supply		Self-powered internally from 94 to 1,000 V @ 50-60 Hz & 400 Hz / DC
Safety		IEC 61010 - 1000 V CAT IV
Mechanical specifications		
Dimensions		245 x 270 x 180 mm
Weight		< 4 kg
Casing		IP67

TRMS VOLTAGE/CURRENT LOGGER

L562

Ref. : P01157060

600 V CAT III | 300 V CAT IV | TRMS

STRENGTHS

- Detects voltage drops and surges
- Monitors power consumption on single-phase networks, as well as energy consumption
- Up to 240,000 measurements saved in non-volatile memory
- Recording rate from 8/s to 1/day

SPECIFICATIONS

	L562	
Number of channels	2	
Connection	Current channel	Voltage channel
Input connection	BNC	Banana connector
Input range	0 to 1 VAC	0 to 600 VAC
Resolution	0,1 mV	0,1 V
Accuracy (50/60 Hz)	0 to 10 mV: not specified 10 to 50 mV: ± (0.5 % R + 1 mV) 50 to 1,000 mV: ± (0.5 % R + 0.5 mV	0 to 5 V: not specified 5 to 50 V: ± (0.5 % R + 1 V) 50 to 600 V: ± (0.5 % R + 0.5 V)
Sampling rate	64 samples per period	
Storage interval	Programmable from 125 ms to 1 day	
Recording modes	Stop when full, FIFO, XRM™ extended recording mode and recording on alarms	
Recording duration	15 minutes to 8 weeks, programmable using DataView®	
Data storage	240,000 measurements (512 kB). The recorded data are stored in non-volatile memory, even if the battery is low or absent	
Communication	Optically-isolated USB 2.0	
Power supply	2 x 1.5 V LR06 batteries	
Battery life	100 hours to > 45 days (depending on recording interval/duration)	
Mechanical specifications		
Dimensions	136 x 70 x 32 mm	
Max. conductor sizes	Depends on current sensor	
Weight (with battery)	181 g	
Casing	UL94-V0	
Vibration	IEC 60068-2-6 (1,5 mm, 10 à 55 Hz)	
Shocks	IEC 60068-2-27 (30 G)	
Falls	IEC 60068-2-32 (1 m)	
Environment		
Operating temperature	-10 to +50 °C	
Storage temperature	-20 to +60 °C	

ADDITIONAL INFO

- Automatic report generation with the DataView® software

CONTENTS

- L562 delivered with:
- 1 USB cable 2 m long, type A to mini-B 5-pin
- PC communication software
- 2 banana leads 1.5 m long
- 2 crocodile clips
- 2 x 1.5 V LR06 alkaline batteries

ACCESSORIES / REPLACEMENT PARTS

- Standard PVC leads with straight 4 mm male plugs ____ P01295288Z
- 32 A crocodile clips ____ P01102052Z
- See all the accessories on page 142

TRMS LOGGER CURRENT CLAMP

CL601

Ref. : P01157010

600 V CAT III | 300 V CAT IV | TRMS

STRENGTHS

- Stand-alone with safe connections
- Alarm function
- Overload indication
- Monitoring of machine loads, electrical troubleshooting, etc.

SPECIFICATIONS

	CL601
Number of channels	1
Input connection	Split-phase current transformer AC current
Current range	0 to 600 AAC
Resolution	0,1 A
Accuracy (50/60 Hz)	0 to 5 A: not specified 5 to 50 A: ± (1 % R + 1 A) 50 to 400 A: ±(1 % R + 0.5 A) 400 to 600 A: ±(3 % R + 1 A)
Sampling rate	64 samples per period
Storage interval	Programmable from 125 ms to 1 day
Storage modes	Start/end, FIFO and XRM™ extended recording mode
Recording duration	15 minutes to 8 weeks, programmable using DataView®
Data storage	240,000 measurements (512 kB). The recorded data are stored in non-volatile memory, even if the battery is low or absent
Communication	Optically-isolated USB 2.0
Power supply	2 x 1.5 V LR06 batteries
Battery life	100 hours to > 45 days (depending on recording interval/duration)
Mechanical specifications	
Dimensions	235 x 102 x 41 mm
Max. conductor size	1 conductor Ø 42 mm, 2 conductors each with Ø 25.4 mm
Weight (with batteries)	485 g
Electrical safety	IEC 61010, 300 V CAT IV / 600 V CAT III
Casing	UL94-V0
Vibration	IEC 60068-2-6 (1.5 mm, 10 to 55 Hz)
Shocks	IEC 60068-2-27 (30 G)
Falls	IEC 60068-2-32 (1 m)
Environment	
Operating temperature	-10 to +50 °C
Storage temperature	-20 to +60 °C

ADDITIONAL INFO

- Automatic report generation

CONTENTS

- CL601 delivered with:
- 1 USB cable 2 m long, type A to mini-B
- 5 pins
- PC communication software
- 2 x 1.5 V LR06 batteries

TRMS CURRENT LOGGERS

L101 - L102 - L111

Ref. : P01157020 P01157030 P01157080

50 V CAT III | TRMS

STRENGTHS

- L101 records on request and can be used to monitor current on 1 channel
- L102 can be used to monitor the neutral current in relation to the earth, as well as split-phase loads It is equipped with 2 independent channels
- L111 has the same function as the L101 but with single-channelnnection via banana socket for clamps with current output

SPECIFICATIONS

	L101	L102	L111
Number of channels	1	2	1
Input connection	BNC	One BNC connector per channel	2 flush-mounted banana sockets
Current range	0 to 1 VAC depending on sensor		
Resolution	0,1 mV		0,1 mA
Accuracy (50/60 Hz)	0 to 10 mV: not specified 10 to 50 mV: ± (0.5 % R + 1 mV) 50 to 1,000 mV: ± (0.5 % R + 0.5 mV)		0 to 10 mA: not specified 10 to 50 mA: ± (0.5 % R + 1 mA) 50 to 1,000 mA: ± (0.5 % R + 0.5 mA)
Sampling rate	64 samples per period		
Storage interval	Programmable from 125 ms to 1 day		
Storage modes	Start/end, FIFO, XRM™ extended recording mode and recording on alarms		
Recording duration	15 minutes to 8 weeks, programmable using DataView®		
Data storage	240,000 measurements (512 kB). The recorded data are stored in non-volatile memory, even if the battery is low or absent		
Communication	Optically-isolated USB 2.0		
Power supply	2 x 1.5 V LR06 batteries		
Battery life	100 hours to > 45 days (depending on recording interval/duration)		
Mechanical specifications			
Dimensions	136 x 70 x 32 mm		132 x 70 x 32 mm
Max. conductor size	Depends on current sensor		
Weight (with batteries)	180 g		
Electrical safety	IEC 61010, 50 V CAT III		
Casing	UL94-V0		
Vibration	IEC 60068-2-6 (1,5 mm, 10 to 55 Hz)		
Shocks	IEC 60068-2-27 (30 G)		
Falls	IEC 60068-2-32 (1 m)		
Environment			
Operating temperature	-10 to +50 °C		
Storage temperature	-20 to +60 °C		

ADDITIONAL INFO

- Automatic report generation

CONTENTS

- L101 and L102 delivered with:
- 1 USB cable 2 m long, type A to mini-B 5-pin
- PC communication software
- 2 x 1.5 V LR6 batteries

- L111 delivered with:
- 1 USB cable 2 m long, type A to mini-B 5-pin
- PC communication software
- 2 x 1.5 V LR06 batteries

ACCESSORIES / REPLACEMENT PARTS

- Bag with carrying strap ____ P01298076
- USB cable 2 m long, type A to mini-B 5-pin ____ Contact us
- See all the accessories on page 142

ML912

Ref. : P01157130

600 V CAT III | 300 V CAT IV

STRENGTHS

- Two MiniFlex® flexible current sensors for measuring currents from 0.5 A to 1,000 A
- Two ranges: 100 / 1,000 Aac
- Monitoring of loads on the phase
- Intermittent fault detection
- Monitoring of current harmonics

SPECIFICATIONS

	ML912	
Number of channels	2	
Input connection	Built-in MiniFlex® flexible AC current sensors	
Range	0.5 to 100 AAC	5 to 1,000 AAC
Resolution	0.1 mA	0.1 V
Accuracy	0 to 1 A: not specified 1 to 100 A: ±(1 % R + 0.5 A)	0 to 5 A: not specified 5 to 1,000 A: ±(1 % R + 1 A)
Sampling rate	64 samples per period	
Storage interval	Programmable from 125 ms to 1 day	
Storage modes	Start/stop, FIFO, XRM™ extended recording mode and recording on alarms	
Recording duration	15 minutes to 8 weeks, programmable using DataView®	
Data storage	240,000 measurements (512 kB). The recorded data are stored in non-volatile memory, even if the battery is low or absent	
Communication	Optically-isolated USB 2.0	
Power supply	2 x 1.5 V LR06 batteries	
Battery life	100 hours to > 45 days (depending on recording interval/duration)	
Mechanical specifications		
Dimensions	136 x 70 x 32 mm without sensor	
Weight (with batteries)	245 g	
Electrical safety	IEC 61010-1, 600 V CAT III, 300 V CAT IV, Pollution degree 2	
Casing	UL94-V0	
Vibration	IEC 60068-2-6	
Shocks	IEC 60068-2-27 (30 G)	
Falls	IEC 60068-2-32 (1 m)	
Environment		
Operating temperature	-10 to +50 °C	
Storage temperature	-20 to +60 °C	
Safety - electromagnetic compatibility		
Safety	IEC 61010-1 ; 600 V CAT IV ; Pollution degree 2	
Protection	IP40	

ADDITIONAL INFO

- Automatic report generation

CONTENTS

- ML912 delivered with:
- 1 USB cable 2 m long, type A to mini-B 5-pin
- PC communication software
- 2 x 1.5 V LR06 batteries

ACCESSORIES / REPLACEMENT PARTS

- Bag with carrying strap ____ P01298076

CURRENT LOGGERS WITH FLEXIBLE SENSORS

ML914 - AL834

Ref. : P01157135 **P01157140**

600 V CAT IV | 1000 V CAT III | IP 65 | TRMS

STRENGTHS

- Compact current loggers with flexible sensors
- TRMS measurements up to 1,000 Aac (ML914) or 3,000 Aac (AL 834)
- Safe, accessible, risk-free measurements via the Bluetooth communication function
- DataView® software for effective analysis of your measurements

CONTENTS

- ML 914 delivered with:
- PC communication software
- 4 type-C batteries
- 1 CD-ROM containing the user manual
- 1 safety datasheet
- AL 834 delivered with:
- PC communication software
- 4 x 1.5 V LR14 batteries
- 1 CD-ROM containing the user manual
- 1 safety datasheet

ACCESSORIES / REPLACEMENT PARTS

- DataVIEW® software — P01102095
- Bag no. 23 — P01298078
- See all the accessories on page 142

SPECIFICATIONS

	ML914		AL 834

L261 - L481

Ref. : P01157040 P01157110

600 V CAT III | 300 V CAT IV | TRMS

STRENGTHS

- L261
- 600 VAC/DC TRMS
- Suitable for industrial, commercial or residential monitoring
- Recording of voltage drops and surges
- L481
- 850 VDC
- Voltage monitoring on machines, wind turbines, railway applications, etc.
- Detection of intermittent voltage faults

SPECIFICATIONS

	L261	L481

Pulse voltage	3.3 V (with 1,000,000 Ω pull-up)			
Battery life	Acquisition 200 ms, display on: 18 days Acquisition 200 ms, display off: 36 days Acquisition 1 min, display off: 270 days			
Power supply	110 to 240 V (50/60 Hz) – External: via USB connector Internal: 2.4 V rechargeable NiMH batteries (2 x 1.2 V)			
Storage modes	Start/Stop (stop when memory full or when campaign end date is reached)			
Control	Local mode (multi-directional keypad on front panel) Remote mode (control via PC)			
Recording duration	10 minutes to 1 year, configurable			
Examples	2 channels @ 200 ms: 19 days 2 channels @ 1 min: > 1 year (theoretically)			
Acquisition interval	200 ms to 1 hour			
Communication	Bluetooth 2.1, Class 1, USB 2.0			
Dimensions	32.4 x 65.5 x 125 mm (137.5 mm with screw connector)			
Weight	206 g			
Display	LCD 128 x 64 pixels			
Measurement terminal strip	6 screw terminals			
Operating temperature	0 to 50 °C			
Protection	IP42 (terminal block IP20)			
Electrical protection	IEC 61010-1 Ed. 3 and IEC 61010-2-030 Ed. 1			

ADDITIONAL INFO

- To simplify its use, the L452 is equipped with a magnetized rear panel. You can also use the Multifix system or a wall mount.

CONTENTS

- 1 L452 logger
- 1 µUSB power-supply cable
- 1 CD-ROM containing the Datalogger Transfer software

ACCESSORIES / REPLACEMENT PARTS

- µUSB power-supply cable — P01102148
- Screw-connector kit (x5) — P01295489
- See all the accessories on page 142

TEMPERATURE LOGGER

L642

Ref. : P01157050

50 V CAT III

POINTS FORTS

- Monitoring of processes, heating systems and air-conditioning
- 2 input channels for thermocouple (J, K, T, N, E, R, S)
- Storage interval programmable from 1 every 5 seconds up to 1 per day
- Choice of 4 recording modes
- Up to 240,000 measurements saved in non-volatile memory

SPECIFICATIONS

Input connection		2 miniature thermocouple connectors
Measurement range		°C (°F)
	j	-210 to +1,200 (-346 to +2,192)
	k	-200 to +1,372 (-328 to +2,501)
	t	-250 to +400 (-418 to +752)
	n	-200 to +1,300 (-328 to +2,372)
	E	-150 to +950 (-238 to +1,742)
	R	0 to 1,767 (32 to 3,212)
	S	0 to 1,767 (32 to 3,212)
Resolution		0.1 °C/F < 1,000 °C/F; 1 ° ≥ 1,000 °C/F
Accuracy (50/60 Hz)		0.1 % to 0.2 % + 0.6 ° at 1 ° depending on thermocouple range and type
Sampling rate		8 samples acquired at the storage interval
Storage interval		Programmable from 5 s to 1 day
Storage modes		Start-end, FIFO, XRM™ extended recording mode and recording on alarms
Recording duration		15 minutes to 8 weeks, programmable using DataView®
Data storage		240,000 measurements (512 kB). The recorded data are stored in non-volatile memory, even if the battery is low or absent
Communication		Optically-isolated USB 2.0
Power supply		2 x 1.5 V LR06 batteries
Battery life		100 hours to > 45 days (depending on recording interval/duration)
Mechanical specifications		
Dimensions		125 x 70 x 32 mm
Weight (with batteries)		200 g
Casing		UL94-V0
Vibration		IEC 60068-2-6 (1,5 mm, 10 to 55 Hz)
Shocks		IEC 60068-2-27 (30 G)
Falls		IEC 60068-2-32 (1 m)
Environment		
Operating temperature		-10 to +50 °C
Storage temperature		-20 to +60 °C

ADDITIONAL INFO

- Automatic report generation

ACCESSORIES / REPLACEMENT PARTS

- SK6 flexible K thermocouple — P03652906
- Bag with carrying strap — P01298076
- See all the accessories on page 142

CONTENTS

- L642 delivered with:
- 1 USB cable 2 m long, type A to mini-B 5-pin
- PC communication software
- 2 x 1.5 V LR06 batteries

SOLAR POWER ANALYSERS

FTV 100

Ref. : P01160700

1000 V CAT III | 600 V CAT IV | IP 54

STRENGTHS

- Calculation of solar power installation efficiency
- Testing of solar power installation energy efficiency
- Electrical power survey
- Calculation of DC/AC inverter efficiency
- Simultaneous measurements on 1, 2 or 3 rows of panels installed in parallel

SPECIFICATIONS

	FTV 100		
Display	Large 5.7" extra-bright colour digital LCD screen (320 x 240) with anti-reflective treatment		
Inputs	**Functions**	**Range**	**Accuracy**
Pyranometer	Solar irradiance measurement	0 to 2,000 W/m²	± 2 %
Environmental temperature	Measurement with Pt100 sensor	-30 °C to +80 °C	± 1 % ± 1 °C
Solar panel temperature	Measurement with Pt100 sensor	-30 °C to +120 °C	± 1 % ± 1 °C
DC voltage	1 to 3 inputs	1,000 VDC	± 1 %
DC current	1 to 3 inputs	1,400 ADC	± 1 %
AC voltage	1 to 3 inputs	600 VAC	± 1 %
AC current	1 to 3 inputs	3,000 AAC	± 1 %
Functions			
Calculation functions	Efficiency of solar panels with compensation of the modules' temperature coefficient Efficiency of DC/AC conversion by the inverter		
Data logger	Up to 10 instrument configurations pre-recorded in memory (measurements and results)		
Specifications			
Communication	RS232 (remote unit) + USB (PC)		
Internal power supply	Built-in rechargeable Li-Ion battery (4.5 Ah) Battery life 8 hours		
External power supply	230 Vac - 50 Hz external power supply		
Protection	IP67 closed / IP54 open		
Dimensions / weight	360 x 304 x 194 mm / 3 kg		
Electrical safety	IEC 61010-1 - 600 V CAT IV / 1 000 V CAT III		

ADDITIONAL INFO

- Particularly easy to read, even in direct sunlight, thanks to the anti-reflective treatment
- The FTV 100 is also available in a version with 3 DC inputs plus 3 PAC10-FTV DC current clamps and 3 MN-FTV AC clamps — P01160720

CONTENTS

- FTV100 with 1 DC input plus A PAC10-FTV DC current clamp and 3 MN-FTV AC clamps delivered with:
- 1 IP67 site-proof case
- 1 pyranometer for insolation with 5 m cable
- 1 Pt100 sensor for environment temperature with 3 m cable
- 1 Pt100 sensor for panel temperature with 3 m cable
- 3 AC current clamps (MN-FTV) with 3 m cable
- 1 DC current clamp (PAC10-FTV) with 3 m cable
- 4 x 3 m leads with test probes
- 1 rechargeable battery with mains adapter
- Data processing software
- 1 bag
- 1 certificate of conformity

ACCESSORIES / REPLACEMENT PARTS

- 3 -DC-input installation measurement kit comprising:
  2 PAC current clamps (PAC10-FTV) with 3 m cable,
  2 sets of leads with test probes (3 m) — P01160710
- GREENTEST FTV100 REMOTE unit comprising:
  4 x 1.5 V LR6 batteries,
  2 x RS232 M/M connectors for soldering,
  1 mounting strap — P01160736
- See all the accessories on page 142

FTV 200

Ref. : P01160745

600 V CAT IV | IP 54 | EN 60891

STRENGTHS

- Solar panel testing
- I-V curves of all types of solar panels
- Excellent display resolution: 500 measurement counts per curve with zoom
- Measurement of temperature, solar irradiance, peak power, Voc, Isc, etc.
- The specifications of thousands of types of solar panels are referenced in the integrated library

SPECIFICATIONS

	FTV 200
Screen	4.3" colour graphical LCD touch screen
Library	10,000 curves (with panel reference values / manufacturer)
Functions	
Voltage DC	10 to 1,000 V
Current DC	0.1 to 10 A
Power	10 W to 10 kW
Radiation	By pyranometer / 0 to 2,000 W/m2
Temperature	by Pt100 - 20°C to +100°C
I-V graph	Graphic display of voltage/current measurement per panel or string
MPP graph	Graphic display of maximum power point (MPP)
General specifications	
Communication	USB 2.0
Power supply / battery life	Mains or rechargeable Li-Ion battery pack / 12 hours on battery
Safety	IEC 61010, CAT III 600 V
Operating temperature	-5°C to +40°C
Dimensions/weight	270 x 250 x 130 mm / 2.5 kg

ADDITIONAL INFO

- The FTV 200 is also available in a complete version delivered with 1 professional pyranometer and a Pt100 sensor P01160740

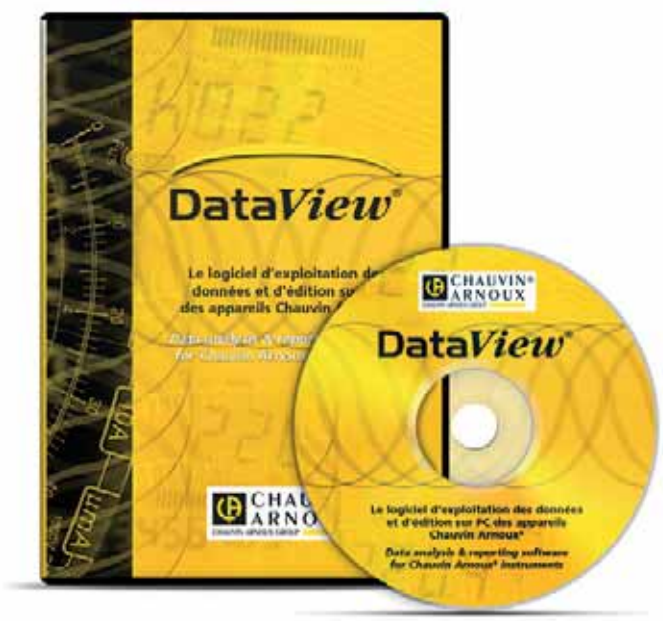
CONTENTS

- FTV 200 delivered with:
- 1 bag
- 1 set of cables 3 m long
- 1 set of MC4 adapters (red/black)
- 1 MC4/banana Ø 4 mm adapter
- 1 magnetic stylus for touch screen
- 1 USB key
- 1 mains adapter
- 1 set of flexible test probes
- PC software
- 1 certificate of conformity

ACCESSOIRES / RECHANGES

- Pyranometer P01160730
- Pt100 ambient temperature sensor P01160731
- See all the accessories on page 142

DATA PROCESSING SOFTWARE



DATAVIEW®

Ref. : P01102095

PAT | PAT 2 | PEL TRANSFER | DATA LOGGER

FUNCTIONS

- Configuration of all the functions of instruments connected to a PC or via Bluetooth®
- Recovery of recorded measurement data
- Backup of measurement files
- Opening of saved files
- Processing and report creation (EN50160)
- Export into an Excel spreadsheet
- Export in .pdf format
- Database management

POWER ANALYZER TRANSFER 2 FOR C.A 8331 / C.A 8336

The PAT 2 module in DataView® offers additional functions:

- Configuration of alarms
- Configuration of transients
- Configuration of trend curves
- Real-time display
- Data recovery, backup and export
- Measurement campaign start after automatic configuration of the associated instrument.

REQUIRED CONFIGURATION

- Windows XP / 256 MB RAM
- Windows Vista & Windows 7/8/10 (32/64 bit)
- 1 GB RAM for Windows Vista & Windows 7/8 (32 bit)
- 2 GB RAM for Windows Vista & Windows 7/8 (64 bit)
- 80 MB available hard-disk space (200 MB recommended)

ADDITIONAL INFO

- The Dataview software:
- Automatically recognizes the instrument connected when it is hooked up to the PC and opens the corresponding menu. Users then have direct access to its configuration and the data stored on it
- Equipped with a large number of predefined report templates for quick generation in accordance with the applicable standards. Users can also create their own templates to meet their needs and directly add their own comments

PHYSICAL & ENVIRONMENTAL MEASUREMENTS

TEMPERATURE MEASUREMENT

Thermometers have always been essential instruments, used by all industrial companies for:
- Ambient temperature measurement.
- Control of the temperature in a cold room or climatic chamber.
- Temperature measurement on partitions.
- Verification of the hot spots in a an electrical cabinet.
- Verification of foodstuff freshness by inserting a probe in the heart of the product

Chauvin Arnoux offers easy-to-use electronic thermometers which are rugged and accurate:
- Thermocouple thermometers.
- Resistive-probe thermometers.
- No-contact thermometers.
- Thermal cameras.

THERMOCOUPLES

The operating principle of thermocouples is based on the **electromotive force created naturally between two conductor wires of different materials joined at the end** (SEEBECK effect). This electromotive force depends on the temperature to which one of the two junctions is exposed. This temperature is measured as a voltage of a few millivolts. A thermocouple is therefore composed of two junctions (or welds) linking two different metals or alloys. One of the junctions, positioned at the point of measurement, is called the hot junction, while the other is called the cold junction and its known temperature serves as the reference. For two given materials or alloys, there is a relation between the electromotive force and the reference and measurement temperatures. This relation is usually **expressed** by a characteristic curve of **sensitivity in mV/°C.**

RESISTIVE PROBES

Some pure metals have a coefficient of resistivity which varies as a function of temperature in a reproducible way. The metals generally used are platinum and copper. Currently, the widest-used type is platinum, with a resistance of 100 Ω at 0 °C.

OPTICAL OR NO-CONTACT MEASUREMENTS

All bodies emit electromagnetic radiation whose spectrum has an energy distribution which is a function of temperature.
This measurement system offers **quick temperature testing on parts which are current-carrying**, **moving or difficult to access**. It can also be used for measurements of very high temperatures or on poor heat conductors such as ceramics or synthetic materials.

CHOOSING THE RIGHT TEMPERATURE MEASUREMENT SYSTEM

Three types of measurement are used to measure temperature:
- Measurement by penetration (semi-solids, pasty samples, etc.) and by immersion (liquids).
- Ambient measurement (air, gas).
- Surface measurement (solid bodies).

For the latter type, users can choose a system with or without contact, depending on the application involved.
The type of application will determine the instrument and the probe chosen.
In general, thermocouples offer quick response times and wide measurement ranges. Sensors with resistive probes are usually slower, but they are also more accurate.

The sensor selection criteria will depend on:
- the milieu and the operating environment.
- the temperature range.
- the required accuracy.
- the response time.

INFRARED THERMOGRAPHY

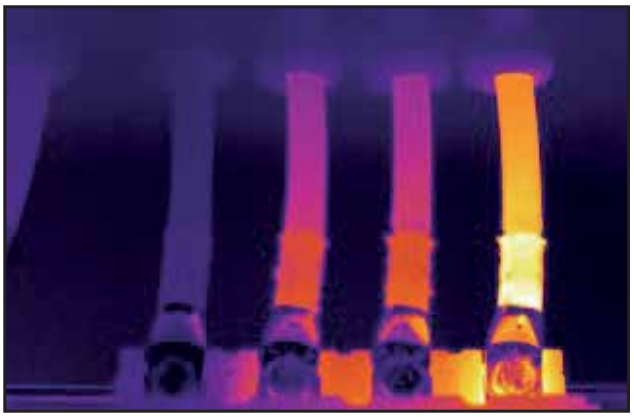
Infrared thermography detection technology has become irreplaceable for ensuring safe conditions for industrial production. Infrared thermal imaging is a no-contact, real-time inspection method for production equipment subject to high voltages, powerful electric currents or high operating speeds.
For this detection method, there is no need to cut off the current, shut down the machines or stop production. It can be used to troubleshoot any latent malfunctions in advance and thus prevent failures and avoid production incidents.

Thermal imaging is an **innovative technique for safe, reliable and quick "no-contact" assessment.**
A thermal camera does not measure temperatures but radiation fluxes. Once the operator has adjusted certain parameters, the camera calculates the temperatures of the target. It then provides the user with a map of the temperatures, called a thermogram: each temperature is represented by a different colour.

ELECTRICAL MAINTENANCE

The purpose of this sort of inspection is to detect any overheating in working electrical systems due to various causes: poor connections, overloads, phase unbalance, faulty contacts, etc. This helps to prevent and avoid costly equipment damage, production shutdowns, operating losses, fires, etc.

The aim is to help with decision-making for corrective action, to prevent incidents, to anticipate any works which might be necessary and to facilitate electrical installation maintenance (time saving and safety).

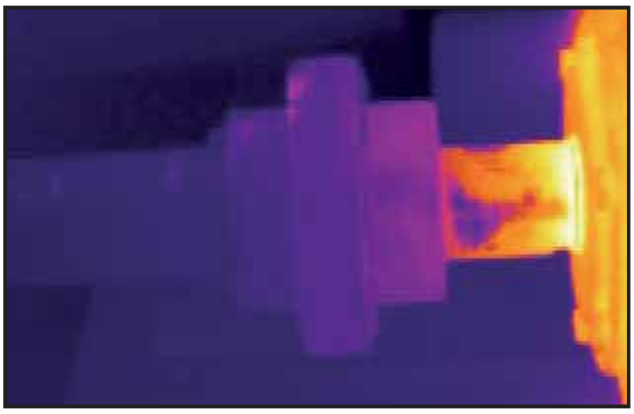


MECHANICAL MAINTENANCE

Moving mechanical parts heat up quite normally due to friction. Infrared thermography reveals abnormal overheating due to wear, misalignment, lubrication problems, etc.

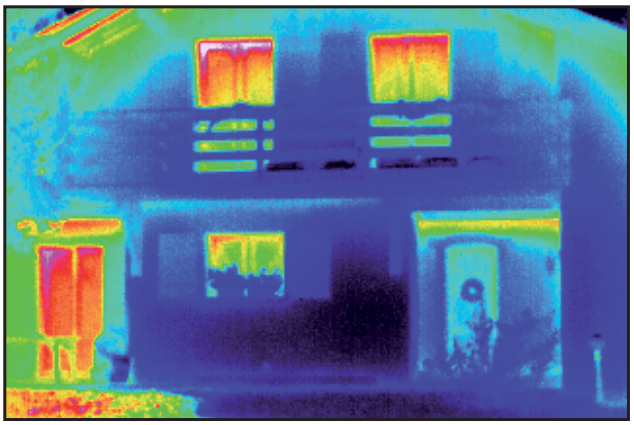
It is used to complement vibratory analysis, which is much more time-consuming to set up.

A single image gives a full health report on the electric motor, its power supply (cables), the bearings and, if necessary, the alignment.



BUILDING THERMICS

These applications of infrared thermography concern architects, heating and sanitary installers, heating operators, electricians, property companies, property experts, owners and insurers.
With an infrared camera, it is easy to view the distribution of heat on the front of a building and it also possible to precisely locate heat losses due to faulty insulation. This helps to produce a thermal survey of the building.



INDOOR AIR QUALITY

Whether in places open to the public (transport, government offices, schools or hospitals), workplaces or private areas, our lifestyles mean we spend most of our time indoors. Human activities and products used in construction, decoration and furniture (paint, floor and wall coverings, varnishes, etc.) are all sources of contamination emitting substances into the air. The issue of indoor air quality has only been raised recently, but it is a major concern because it affects everyone.

CARBON DIOXIDE (CO_2)

Carbon dioxide is a colourless, odourless gas produced by the combustion of carbon-based materials such as wood, oil, coal and their derivatives. It is also produced by humans' and animals' respiration. Plants, however, actually extract CO_2 from the air during photosynthesis, thus contributing to the natural balance.

Nevertheless, the level of CO_2 in outdoor air is increasing. This gradual increase began with the industrial revolution and the growing use of fossil fuels.

WHY MEASURE IT?

Indoors, CO_2 is representative of a level of confinement indicating an accumulation of pollutants in the premises and insufficient air renewal. Links have been found between poor ventilation, leading to high levels of CO_2, and reduced performance by children in tests involving logic, reading and calculations.
Concentrations above 1,000 ppm already cause sleepiness, difficulty in concentrating and even headaches.

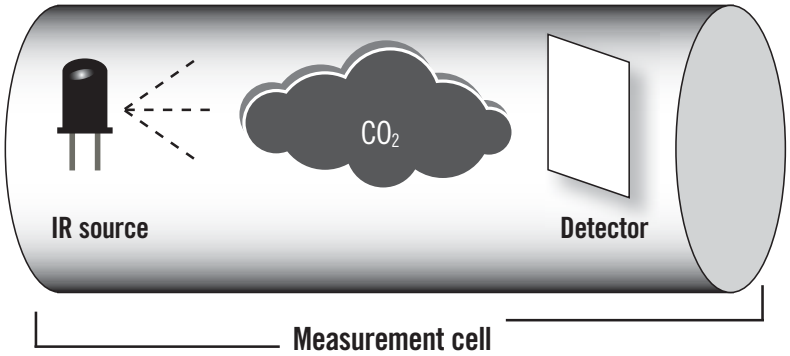
THRESHOLD VALUES

In volume terms, the proportion of CO_2 in the air is 0.0375%, or 375 ppmv (parts per million by volume). In urban environments, it may be as high as 500 ppm.

- 500 to 1,000 ppm - Indoor air quality: Good
- 1,000 ppm - Certain studies have shown an increase in asthma-related symptoms among children on average over a school day
- 1,500 to 2,500 ppm - Indoor air quality: Poor (1,500 ppm is the regulatory limit usually specified, particularly for educational premises in the United Kingdom, Germany and Austria)
- 2,500 to 5,000 ppm - Symptoms: headache, fatigue and loss of concentration
- 5,000 ppm - Average concentration over 8 hours - Occupational Exposure Limit in France and elsewhere

MEASUREMENT PRINCIPLE

The method used by the C.A 1510 to measure CO_2 levels is an NDIR (Non-Dispersive InfraRed) method.



CO_2 and other gases absorb IR radiation in a “specific” way.

- 1 source emits an IR signal in a predefined cavity
- The CO_2 absorbs part of the light in the near-IR spectrum, thus reducing the intensity of the signal
- The IR detector measures the intensity of the signal received at the absorption wavelength of carbon dioxide. The Beer-Lambert Law establishes the relationship between the signal intensity and the gas concentration.

SENSOR POSITIONING AND RECOMMENDATIONS

The measuring instrument should preferably be positioned between 50 cm and 2 m from the ground. In practice, it should be set up in a safe place with access to a power socket if necessary.
The instrument should be kept at least 50 cm away from any intense heat sources (heating) and should be kept out of direct sunlight. The instrument must not be placed in the direct flow of air from outside (windows) or close to the entrance. The CO_2 level varies during the day, depending on how many people are present, the activities involved and the efficiency of the air renewal system; for these reasons, functions for recording and for indicating any threshold overruns are crucial.

STRENGTHS

- Large screen for easier reading
- Instrument calibration without removing the sensors
- Comfortable handling due to its dimensions (205x97x45 mm) and weight (472 g)

C.A 1621: thermocouple-probe temperature calibrator capable of measuring and simulating:

- up to 8 types of thermocouple: J, K, T, E, R, S, B and N
- a voltage in mV

C.A 1623: resistive-probe temperature calibrator capable of measuring and simulating:

- up to 7 types of resistive probes: Pt 10, Pt 50, Pt 100, Pt 200, Pt 500, Pt 1000, Pt 100(JIS)
- a resistance

ADDITIONAL INFO

- Power supply via optional mains lead:
- Input: 100 V/240 V - 50/60 Hz – 1.8 A
- Output: 12 VDC, 2 A max
- Battery-powered (6 x 1.5 V supplied) or via mains lead (option)

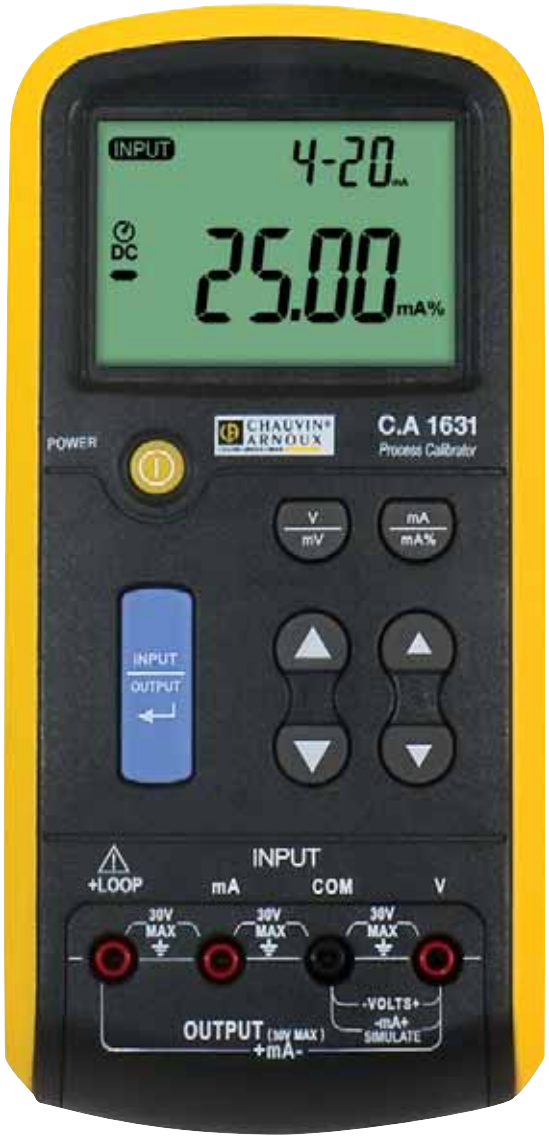
CONTENTS

- 1 calibrator
- 1 soft case
- 6 x 1.5 V LR06 batteries
- C.A 1621 delivered with 2 additional thermocouple adapters
- C.A 1623 delivered with 2 additional test leads and 2 additional crocodile clips

ACCESSORIES / REPLACEMENT PARTS

- Mains power cable P01103057
- MultiFix bag - 120x245x60 mm P01298075
- See all the accessories on page 180

PROCESS SIGNAL CALIBRATORS



C.A 1631

Ref. : P01654402

STRENGTHS

Voltage/current process signal calibrator used to measure or supply:
- a 0 -24 mA DC current loop
- a 0 - 20 V DC voltage

C.A 1950

Ref. : P01651901

IP 54 | 80 x 80 | 2 m | BMP

STRENGTHS

- 13-hour battery life and startup in only 3 seconds
- Withstands falls of up to 2 m without interrupting operation
- Focus-free with 20° x 20° field of view
- Voice annotation for recording your comments directly on the image (earphone supplied)
- Connectivity with current clamps and multimeters

ADDITIONAL INFO

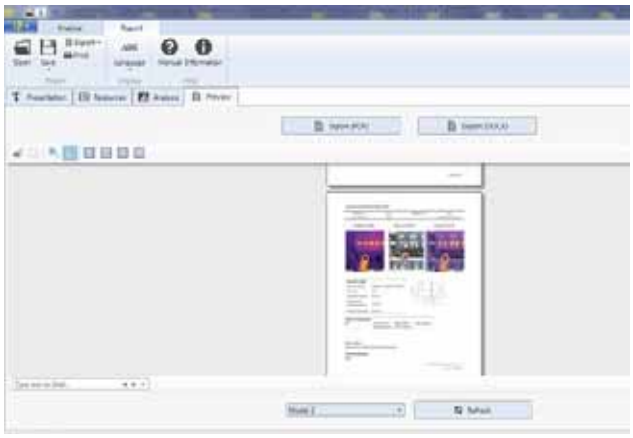
- Recording of thermal image and real image simultaneously. Image merge function available via the CAmReport software supplied
- Large number of measurement tools: manual cursor, automatic detection, temperature profile, etc.
- Built-in brightness sensor

CONTENTS

- C.A 1950 delivered in site-proof hard case with:
- 4 x NiMH batteries
- 1 battery charger
- 1 x 2 GB micro SD HD card
- 1 USB cable
- 1 Bluetooth® earphone
- 1 CD-ROM containing the CAmReport software
- 1 measurement report

SPECIFICATIONS

	C.A 1950
Detector	80 x 80
Type	UFPA microbolometer, 8 ~14 µm
Frequency	9 Hz
Sensitivity (N.E.T.D)	80 mK @ 30 °C (0.08 °C @ 30 °C)
Temperature measurement	
Temperature range	-20 °C to +250 °C
Accuracy	±2 °C or ±2 % of reading
Imaging performance (thermal image)	
Field of view	20° x 20°
IFOV (spatial resolution)	4.4 mrad
Focus	Fixed
Minimum focal distance	40 cm
Real image	Yes (320 x 240 pixels)
Display mode	Thermal image, real image with automatic parallax compensation. Image merge available with PC software
Analysis functions	
Measurement tools	1 manual cursor + 1 automatic detection + Min Max on adjustable area + Temperature profile + Isotherm
Parameter settings	Emissivity, environmental temperature, distance, relative humidity
Voice comments	Yes by Bluetooth® (earphone supplied)
Connectivity	F407, F607, MTX 3292 and MTX 3293 clamps
Data storage	On 2 GB removable micro SD card (approx. 4,000 images), up to 32 GB
Image format	.bmp (thermal and real images recorded simultaneously)
Image presentation	
Adjustment	Automatic or manual adjustment of palette min/max
Image hold	Animated or fixed image
Image display	Multi-palette
Screen	2.8 inches
Power supply	
Type	Rechargeable NiMH batteries with low self-discharge
Recharging	External (charger supplied)
Battery life	13 hrs 30 min (typical) / 50 % brightness, Bluetooth® off
Environmental specifications	
Operating temperature	-15 °C to +50 °C (-4 °F to +122 °F)
Storage temperature range	-40 °C to +70 °C (-40 °F to +158 °F)
Humidity	10 % to 95 %
Compliance with standards	EN 61326-1 : 2006 / EN 61010-1 Ed. 2
Fall resistance	2 metres on all surfaces
Shock resistance	25 G
Vibration resistance	2 G
Physical specifications	
Weight /dimensions	700 g with rechargeable batteries / 225 x 125 x 83
Ingress protection	IP 54
Interfaces	- USB link and Mass Storage: the product is then recognized as a USB key for easy image transfer - Bluetooth for connectivity with earphone (voice comments) and Chauvin Arnoux® Metrix® measuring instruments (F407, F607, MTX 3292, MTX 3293)
Tripod mounting	Yes, ¼'' insert on camera
General specifications	
Report creation software	Supplied as standard with automatic report generation in .pdf or .docx (Word) format / Compatible with W7, W8, 32 and 64 Bits
Warranty	2 years



CAmReport

C.A 1950 | W | PDF

STRENGTHS

- Dedicated to the C.A 1950 thermal camera
- Supplied as standard at no additional cost
- Complete, with all the functions needed for reliable analysis of the measurement results
- Automatic creation of analytical reports which can be exported in Word or pdf format.

REQUIRED CONFIGURATION

WINDOWS XP :

- SP3 minimum
- 850 MB RAM for 32 bit
- 2 GB for 64 bit
- NET Framework 4.0 minimum
- Monitor resolution: super VGA (800 x 600) or higher

WINDOWS VISTA / 7 / 8 / 10 :

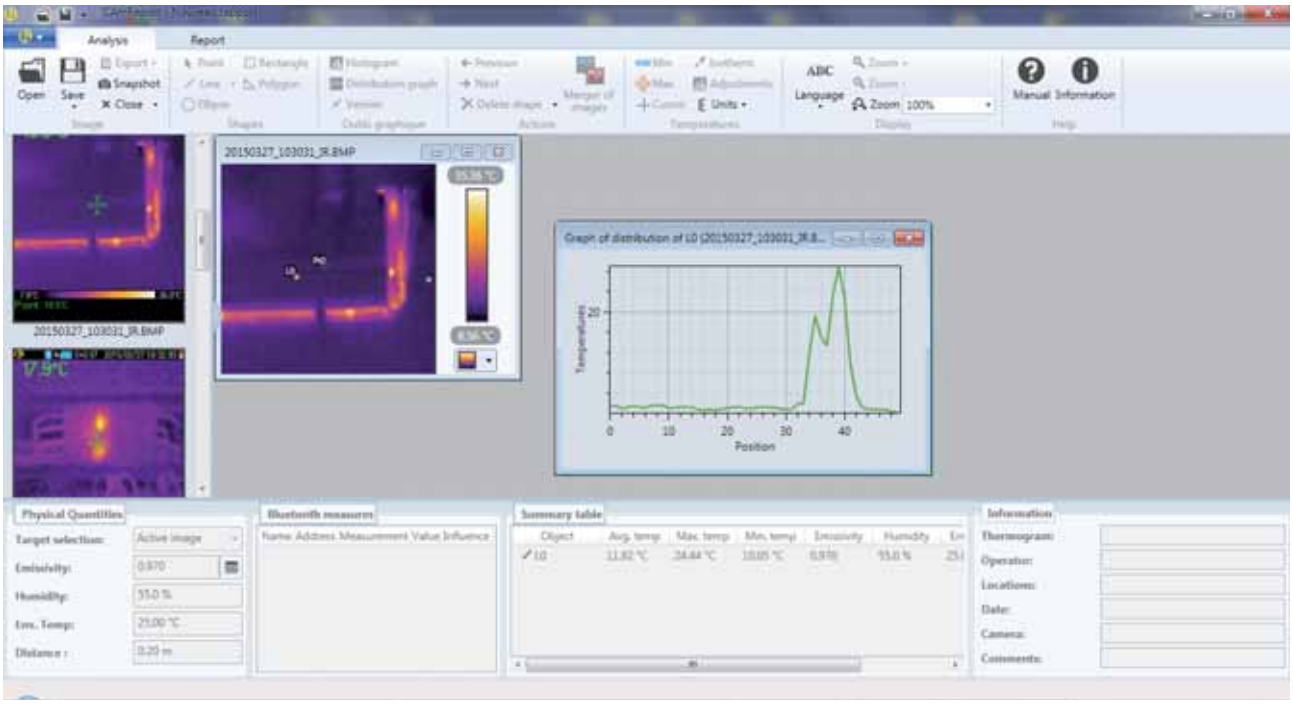
- SP1 minimum
- 850 MB RAM for 32 bit
- 2 GB for 64 bit
- NET Framework 4.0 minimum

PRECISE ANALYSIS TOOLS

- Cursors (automatic display of the temperature at the selected point)
- Thermal profile (automatic display of the Min/Max/Avg temperatures of the line)
- A square or circle for area analysis
- Polygons and polylines for more precise analysis of certain areas in the thermogram
- Results tables quickly and automatically display all the information
- Recovery of the voice comments or related measurements
- Automatic merging of the thermal and real images recorded simultaneously
- Automatic report creation for export in .pdf or .docx format

AVAILABLE LANGUAGES

- French, English, German, Spanish, Italian , Dutch, Polish, Romanian, Czech, simplified Chinese, Portuguese, Swedish, Finnish



C.A 1882

Ref. : P01651215

IP 54 | 160 x 120 | SD

STRENGTHS

- Wide-angle lens
- MixVision cursor for linking a thermogram to a real image
- Manual cursor and automatic detection of hot/cold points
- Wide dynamic range for measurement: -20 °C to +250 °C
- Recording of up to 1,000 thermograms on 2 GB SD card

ADDITIONAL INFO

- The C.A 1882 camera is delivered as standard with its docking station equipped with a video output
- An SD card reader is supplied with the camera
- The screen is totally multi-directional so that it can be used whatever the environment
- A 9 Hz version is available with the reference P01651215E

CONTENTS

- C.A 1882
- 1 neutral box
- 1 battery charger
- 1 docking station
- 1 battery
- 1 x 2 GB SD card
- 1 SD card reader
- 1 video cable
- 1 CD-ROM containing the RayCAm Report software

ACCESSORIES / REPLACEMENT PARTS

- Battery P01296045
- Battery charger P01296046
- See all the accessories on page 180

SPECIFICATIONS

	C.A 1882
Detector	160 x 120

Temperature measurement	
Temperature range	-20 °C to +250 °C
Accuracy	±2°C or ±2% of reading
Image performance	
Thermal image	
Field of view	38° x 28°
Spatial resolution	4.4 mrad
Min. focal distance.	10 cm
Focus	Manual
Real image	Yes
"MixVision" mode	Merge function with adjustment of percentage of thermal image in real image from 0 to 100%
Image size	640 x 480 pixels
Functions	
Parameter settings	Emissivity, environmental temperature, distance, relative humidity
Measurement tools	1 manual cursor + 1 automatic Min/Max detection on adjustable area
Laser pointer	Yes
Data storage	1,000 thermal images as standard
Type of storage	2 GB removable SD card (as standard), up to 16 GB
Multi-directional screen	3 inches
General specifications	
Battery	Rechargeable Lithium-Ion battery / Batt. life: 3 hours
Battery recharging	Recharging via external charger
Protection	IP54

**9 Hz outside the European Union*

C.A 1886

Ref. : P01651260

IP 54 | 160 x 120 | CNPP APPROVAL

STRENGTHS

- 160 x 120 matrix
- Sensitivity: 0.08 °C at 30 °C
- Temperature up to 600 °C as standard
- Large, multi-directional 3.5" screen for easier reading
- MixVision function which links a thermogram to a real image

SPECIFICATIONS

	C.A 1886
Detector	160 x 120, refresh rate: 50 Hz
Type	UFPA microbolometer, 8-14 microns
Sensitivity (NETD)	0.08 °C @ 30°C
Temperature	-20 °C to +600 °C as standard Up to 1,500 °C as an option
Accuracy	±2°C or ±2%
Optics	Field of view: 20° x 15°, IFOV: 2.2 mrad Min. focal distance: 10 cm
"MixVision" mode	Merge function with adjustment of percentage of thermal image in real image from 0 to 100%
Image size	640 x 480 pixels
Adjustment	Emissivity, environmental temperature, distance, humidity
Measurement tools	3 manual cursors + 1 auto. Max/Min/Avg detection on area, isotherm, temperature differential, temperature profile
Data storage	1,000 images (radiometric format) in 250 folders + 2 GB on mini-SD card
Power supply	Battery life: 3 hrs (continuous use) Recharging via external charger

CONTENTS

- C.A 1886 delivered in a case with:
- 1 battery charger
- 2 batteries
- 1 x 2 GB mini SD card
- 1 SD card reader
- 1 video cable
- 1 CD-ROM containing the RayCAm Report software
- 1 measurement report

RayCam Report

C.A 1882
C.A 1886
C.A 1888
TXT
CSV

STRENGTHS

- Specially developed for the C.A 1882, C.A 1886 and C.A 1888 thermal cameras
- Supplied as standard at no additional cost
- Complete, with all the functions needed for reliable analysis of the measurement results
- Creation of analysis reports exportable in Word or PDF format
- Very simple user interface

REQUIRED CONFIGURATION

WINDOWS XP :

- SP2 minimum
- 512 MB RAM minimum
- CPU 700 Hz minimum
- NET Framework 2.0 minimum
- Monitor resolution: 1,024 x 768 minimum

WINDOWS VISTA / 7 / 8 / 10 :

- SP1 minimum
- 1 GB RAM minimum
- CPU 1 GHz minimum
- NET Framework 2.0 minimum
- Monitor resolution: 1,024 x 768 minimum

AVAILABLE LANGUAGES

- French, English, German, Spanish, Italian.

PRECISE ANALYSIS TOOLS

- Cursors (automatic display of the temperature at the selected point)
- Thermal profile (automatic display of the Min/Max/Avg temperatures of the line)
- A square or circle for area analysis
- Polygons and polylines for more precise analysis of certain areas in the thermogram
- Results tables quickly and automatically display all the information
- The “Max” function automatically indicates the hot point in the whole thermogram or in a predefined area for analysis
- A histogram for studying the temperature distribution according to several intervals
- Display of a value label next to the measurement tool
- Assignment of a different emissivity from that of the rest of the thermogram
- Automatic merging of the thermal and real images recorded simultaneously
- Automatic report creation for export in .pdf or .docx format

C.A 871 - C.A 879

Ref. : P01651302Z P01651805Z

°C °F IR

STRENGTHS

- Small and easy to handle
- Simple to use
- Ideal for everyone
- Ergonomics specially designed for comfortable handling
- Laser sighting for precise targeting of measuring area

SPECIFICATIONS

	C.A 871	C.A 879
Field of view	8/1	12/1
Emissivity	Fixed: 0.95	
Measurement range	-40 °C to +538 °C	- 50 °C to +550 °C
Resolution	0.1 °C up to 100 °C 1 °C for > 100 °C	
Accuracy*	±2.5% ±2 °C	±1.5% ±2 °C
Functions		
Laser sighting	Yes	
Continuous measurement	Yes (continuous press on trigger)	
Hold	Yes	
Measurement unit	°C / °F	
Display	2,000 counts, backlighting	
Dimensions / weight	160 x 82 x 41.5 mm 180 g	230 x 100 x 56 mm 290 g

**Depending on temperature measurement range. See User Manual for further details.*

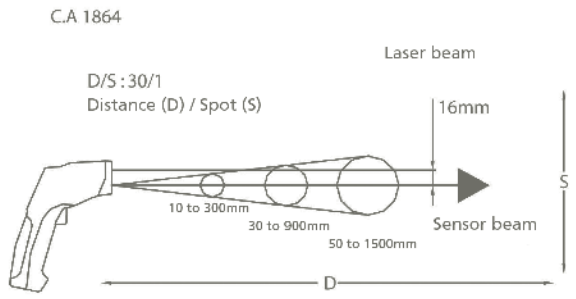
ACCESSORIES / REPLACEMENT PARTS

- 9 V LR14 battery — P01100620
- Soft case — P01298033

CONTENTS

- C.A 871 and C.A 879 delivered with:
- 1 bag
- 1 x 9 V LR14 battery

Distance / Spot ratio: explanatory diagram



C.A 1864 - C.A 1866

Ref. : P01651813 P01651814

°C °F IR

STRENGTHS

- Extended temperature range: measure up to 1,000 °C
- Use the variable emissivity to perform your inspections in accordance with reality
- High distance/spot ratio for better accuracy at long distances
- Set your alarm thresholds so that you are alerted every time there is an abnormal temperature!

SPECIFICATIONS

	C.A 1864	C.A 1866
Distance/spot ratio	30/1	50/1
Emissivity	0.1 to 1	
Measurement range	- 50 °C to +1,000 °C	
Resolution	0.1 °C	
Accuracy	- 50 °C to - 20 °C: ± 5 °C - 20 °C to +200 °C: ±1.5 % R + 2 °C +200 °C to +538 °C: ±2.0 % R + 2 °C +538 °C to +1,000 °C: ±3.5 % R ± 5 °C	
Functions	Max., Min., Avg., DIFF, HOLD	
Alarms	High and Low	
Measurement unit	°C, °F	
Laser sighting	Yes, Class II laser	
Display	20,000 counts, backlighting	
Dimensions / weight	230 x 100 x 56 mm / 290 g	

ACCESSORIES / REPLACEMENT PARTS

- 9 V LR14 battery — P01100620
- Soft case — P01298033

CONTENTS

- C.A 1864 and C.A 1866 delivered with:
- 1 bag
- 1 x 9 V LR14 battery

C.A 1871

Ref. : P01651610Z

°C IR

STRENGTHS

- Infrared probe suitable for use with all multimeters
- Point the probe at the surface of the object. The sensor supplies a voltage proportional to the temperature measured (1 mV / °C)

SPECIFICATIONS

	C.A 1871
Distance/Spot ratio	8/1
Emissivity	Fixed 0.95
Measurement range	- 30 °C to + 550 °C
Accuracy	± 2 % of reading
Dimensions / weight	164 x 50 x 40 mm / 182 g

CONTENTS

- C.A 1871 delivered with:
- 1 x 9V LR14 battery

CONTACT THERMOMETERS

TK 2000 - TK 2002

Ref. : P01653100 P01653110

IP 65 °C

STRENGTHS

- Compact, accurate and simple to use: connect the sensor and start measuring!
- Usable in all environments thanks to their IP 65 protection
- Measures the temperature difference by means of the 2 thermocouple inputs on the TK 2002

SPECIFICATIONS

	TK 2000	TK 2002
No. of inputs	1	2
Range	- 50 °C to +1,000 °C	
Accuracy	± 1.5 % + 0.5 °C	
Functions	HOLD, °C	
Dimensions	163 x 63 x 37.5 mm	
Weight	200 g	

CONTENTS

- 1 battery
- TK 2000 delivered with:
- 1 flexible K-thermocouple sensor
- 1 x 9 V 6LR61 battery
- TK 2002 delivered with:
- 2 flexible K-thermocouple sensors
- 1 x 9 V 6LR61 battery

THERMO-HYGROMETERS

C.A 846 - C.A 1244 - C.A 847

Ref. : P01156301Z P01156310 P01156302Z

STRENGTHS

- C.A 846
- 2 in 1: measurement of hygrometry and ambient temperature
- Simple to use
- C.A 1244
- 3 in 1: measurement of hygrometry, ambient temperature and dew point
- Improved accessibility with remote probe
- Easy to read thanks to the double backlit display
- C.A 847
- Measure the humidity of your materials very simply: prick the material and note the value corresponding to the LED which lights up.

SPECIFICATIONS

	C.A 846	C.A 1244	C.A 847
RH range	10 to 90 % RH	5 to 95 % RH	6 to 100 % RH
Accuracy RH	± 2.5 % from 10 % to 90 %	±1.8 % RH	± 1 LED
Temperature range °C	- 20 °C to + 60 °C	- 20 °C to +70 °C	-

MULTI-FUNCTION INSTRUMENT

C.A 1052

Ref. : P01175020

STRENGTHS

- Can be used for comprehensive surveys of air-conditioning, heating and ventilation systems
- Accurate, 5-in-1 instrument: measurement of air speed, relative humidity, flow-rate, pressure and temperature
- Complete: the instrument is delivered as standard with its probes in a case
- Particularly easy to use: connect the probe (recognized automatically) and measure!
- Data backup

SPECIFICATIONS

	C.A 1052	
	Measurement range	Accuracy
Hot-wire speed	0.15 to 3 m/s	± 3 % R + 0.03 m/s
	3.1 to 35 m/s	± 3 % R + 0.1 m/s
Ø 100 mm rotating-vane speed	0.25 to 3 m/s	± 3 % R + 0.1 m/s
	3.1 to 35 m/s	± 1 % R + 0.3 m/s
Environmental temperature	–20 °C to +80 °C	± 0.4 % R + 0.3 °C
Flow-rate	0 to 99,999 m3/h	3 % R
Relative humidity	3 to 98 % RH	± 1 % R + 1.5 % RH
Dew point	–50 °C to +70 °C	± 0.8 % R + 0.6 °C
Pressure	0 to 1,000 mm H20	± 0.2 % R + 1
Temperature (2 K-thermocouple inputs)	–200 °C to +1,300 °C	±0.4 % R or 1.1 °C
	–100 °C to +750 °C	±0.4 % R or 0.8 °C
	–200 °C to +400 °C	±0.4 % R or 0.5 °C
Function	HOLD, Min., Max., Avg.	
Recording	8,000 counts	
Dimensions	161.9 x 80.8 x 57.4 mm	
Weight	380 g	

CONTENTS

Ref. : P01172201Z P01172401Z

LUX

STRENGTHS

- Check your lighting in full compliance and in all directions
- Measure up to 20,000 or 200,000 lux depending on your needs

SPECIFICATIONS

	C.A 811	C.A 813
Measurement range	20 to 20,000 lux	20 to 200,000 lux
Accuracy		
Incandescent lamp	± 3 % + 10 cts	
Other sources	± 18 % + 2 cts	± 11 % + 2 cts
Correction	Spectral and incidence	
Functions	Max., HOLD	
Dimensions	173 x 60.5 x 38 mm	
Weight	214 g	223 g

CONTENTS

- C.A 811 and C.A 813 delivered in blister pack with:
- 1 shockproof protective sheath
- 1 x 9 V 6LR61 battery

C.A 832 - C.A 834

Ref. : P01185501Z P01185502

dBA dBC

STRENGTHS

- C.A 832
- Sound-level testing
- Simple to use
- C.A 834
- Monitoring of noise-exposure levels: recording of up to 32,000 values!
- Process the data on PC with the software supplied as standard

SPECIFICATIONS

	C.A 832	C.A 834
Measurement range	35 to 130 dB	30 to 130 dB
Calibres	3 calibres: 35 to 80 dB 50 to 100 dB 80 to 130 dB	4 calibres: 30 to 80 dB 50 to 100 dB 80 to 130 dB Auto 30 to 130 dB
Accuracy	±2 dB	±1.5 dB
Frequency range	31.5 Hz to 8,000 Hz	
Functions	A and C frequency weighting curves Fast and slow time weighting	
	-	Min., HOLD
Analogue output	10 mV/dB or 1 V_{RMS}	
Data storage	-	32,000 values
Software	-	Yes
Dimensions	237 x 60.5 x 38 mm	275 x 64 x 30 mm
Weight	230 g	285 g

CONTENTS

- C.A 832 delivered with:
- 1 shockproof sheath
- 1 jack socket for analogue output
- 1 universal adapter for tripod mounting
- 1 x 9 V 6LR61 battery
- C.A 834 delivered with:
- 1 hard case with data processing software
- 1 jack/USB cable
- 1 jack socket for analogue output
- 1 x 9 V 6LR61 battery

ACCESSORIES / REPLACEMENT PARTS

- 94 dB or 114 dB sound-level meter calibrator, C.A 833 — P01185301
- Microphone extension for C.A 834 — P01102085
- See all the accessories on page 180

C.A 1725 - C.A 1727

Ref. : P01174810 P01174830

STRENGTHS

- Measurements up to 100,000 RPM
- Measurement with and without contact
- Multiple functions available: rotation speed, linear speed, counting, frequency, period
- Possibility of programming and storage capacity
- C.A 1727
- USB connection to process the recordings on PC

SPECIFICATIONS

	C.A 1725	C.A 1727
RPM functions		
Range	60 to 100,000 RPM	
Accuracy	10^{-4} R ± 6 cts	
m/min function		
Range	60 to 10,000 m/min.	
Accuracy	10^{-4} R ± 1 increment	
Hz function		
Range	1 to 10,000 Hz	
Accuracy	4 x 10^{-5} R ± 4 cts	
ms function		
Range	0.1 to 1,000 ms	
Accuracy	10^{-4} R ±5 cts	
Report function		
Range	0.1 to 100 %	
Accuracy	0.1 % to 1 %	
Counting function		
Range	-	0 to 100,000 events
Accuracy	-	± 1 events
Functions	Min., Max., HOLD, Smooth	
	-	High and low alarms
Data storage	-	4,000 counts
Dimensions	21 x 72 x 47 mm	
Weight	250 g	

CONTENTS

- C.A 1725 delivered with:
- 1 hard case
- 1 FRB F connector
- 1 x 9 V LR14 battery
- 1 set of 15 strips of reflective tape (0.1 m long)
- 1 CD-ROM containing the user manual
- C.A 1727 delivered with:
- 1 hard case
- 1 FRB F connector
- 1 x 9 V LR14 battery
- 1 set of 15 strips of reflective tape (0.1 m long)
- 1 CD-ROM containing the TACHOGRAPH software

ACCESSORIES / REPLACEMENT PARTS

- Mechanical accessories kit ____ P01174902
- End-fittings (set of 3) ____ P01174903
- See all the accessories on page 180

STROBOSCOPE

CDA 9452

Ref. : P03197704

Flashes /min

STRENGTHS

- Frequency or speed measurement without contact with rotating parts
- Digital frequency display
- Quartz time base
- White flash lamp, 40 joules

SPECIFICATIONS

	CDA 9452
LED display	10,000 points
Measurement range	100… 1,000 flashes/min 1000… 10,000 flashes/min
Resolution	1 flash/min
Accuracy	0.05 %
Power supply	220 V – 50/60 Hz
Climatic conditions	0… + 50 °C / RH < 80 %
Dimensions	210 x 120 x 120 mm
Weight	1 kg

ADDITIONAL INFO

- When the flashes from the stroboscope are directed at an object moving periodically and have the same frequency as the phenomenon observed, the object appears immobile. All you then need to do is read the frequency expressed in flashes/minute on the CDA 9452. To obtain the frequency in Hz, simply divide the reading by 60.

CONTENTS

- CDA 9452 delivered with mains power cable

CO2, TEMPERATURE & HUMIDITY LOGGER

C.A 1510

Ref. : P01651011

STRENGTHS

- CO_2, temperature and humidity logger (up to 1 million points)
- Compact: for fixed or portable use
- User-friendly: thanks to the comfort-level indicators based on the level of CO_2 and hygrothermal criteria
- Accurate: complies with the latest regulations on air-quality monitoring
- Low gas consumption thanks to its in-situ calibration kit

ADDITIONAL INFO

- C.A 1510 also available in black P01651010
- Delivered in a metal case

CONTENTS

- Delivered in cardboard box with:
- 2 x 1.5 V LR06 batteries
- 1 USB mains adapter
- 1 USB-micro USB cable
- 1 desk stand
- AQR software
- 1 user manual (5 languages) on CD-ROM
- 1 verification certificate

ACCESSORIES / REPLACEMENT PARTS

- In-situ calibration kit P01651022
- Metal case P01298071
- See all the accessories on page 180

SPECIFICATIONS

	C.A 1510
Specifications for CO_2	
Measurement range	0 to 5,000 ppm
Accuracy	± 50 ppm ± 3% of measured value
Resolution	1 ppm
Temperature measurement	
Measurement range	-10 °C to +60 °C
Accuracy	± 0.5 °C
Resolution	0.1 °C
Humidity measurement	
Measurement range	5 to 95 % RH
Accuracy	± 2% RH
Resolution	0.1% RH
Product capabilities	
Portable measurement	Quick measurement and display of the CO_2, temperature and relative humidity values
Indicator	**Mode 1D :** CO_2 confinement indication Visual indication (two-colour backlighting and pictograms) and/or audible indication of high confinement when the CO2 concentration is between 1,000 ppm and a 1,700 ppm threshold. **3D mode:** indication of optimum comfort zone on the basis of hygrothermal criteria and the CO_2 concentration
Energy saving (ECO)	For fixed use on battery power, the product performs measurements every 10 minutes over a programmable time range for a battery life of up to one year
Logger	Activation of programmed recording (P_REC) The start date, recording rate and end date can be customized with the PC software or the Android application. Possibility of locking the display in this mode (no values displayed). Manual activation (M_REC) Manual start and stop controls on the product. Recording is performed at the rate of the mode currently selected.
Specifications	
Recording rate	Customizable from 1 minute to 2 hours
Data storage	More than 1 million points
Buzzer and units	Yes / °C or °F
Backlighting / Hold / Min Max	Yes
Dimensions / weight	125 x 65.5 x 32 mm / 190 g with batteries
Power supply	Batteries: 2 x 1.5 V AA / LR6 or rechargeable battery Connection to mains possible with mains / micro USB adapter supplied as standard
Interfaces	2 communication modes possible: Bluetooth wireless communication and USB link; the product is then recognized as a USB key for easy file transfer
Mounting	C.A 1510 casing equipped with a magnet, a wall-suspension system and a slit for hanging the product. A wall support for use with a padlock (padlock not supplied) is available as an accessory, as is a desktop stand (supplied as standard with the C.A 1510W).
AQR (Air Quality Report) software supplied as standard	Graphic representation or as table of values - Data export - Real-time mode Calculation of the confinement index with selection of presence periods – Report generation

C.A 895

Ref. : P01651001Z

PPm CO

STRENGTHS

- Measures the level of carbon monoxide present in a room
- Checks the operation of combustion equipment
- Warning buzzer to indicate when there is a risk

SPECIFICATIONS

	C.A 895
Measurement range	0 to 1,000 ppm
Accuracy	± 5 % + 5 ppm
Measurement mode	Normal or Avg.
Functions	Alarm, Max., HOLD
Dimensions	237 x 60.5 x 38 mm
Weight	190 g

CONTENTS

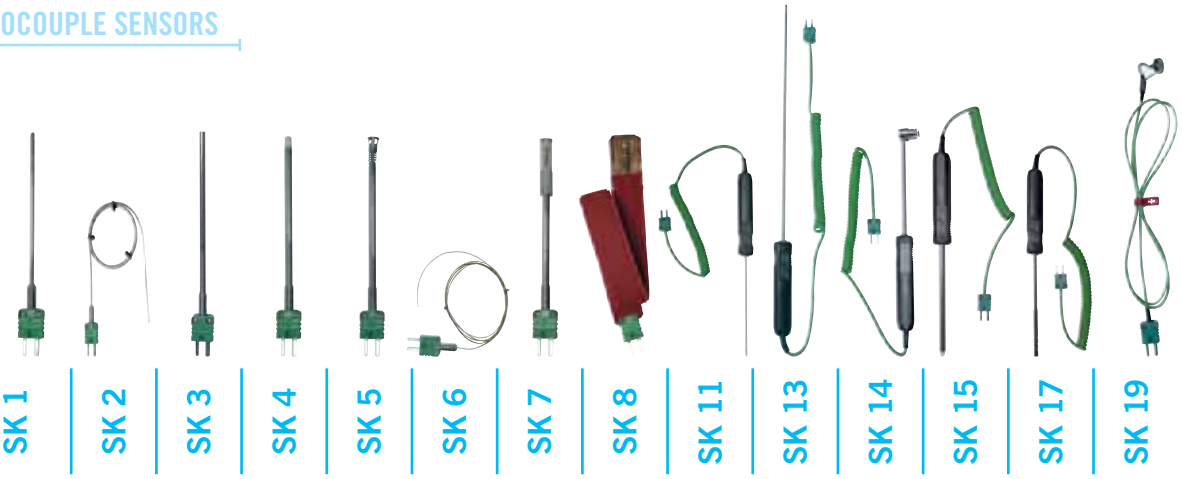
- C.A 895 delivered with:
- 1 shockproof protective sheath
- 1 x 9 V LR14 battery

ACCESSORIES / REPLACEMENT PARTS

- Aspiration kit with pump and extension ____ P01651101

THERMOMETERS

K-THERMOCOUPLE SENSORS



Models	Type	Description	Measurement range	Response time	ø	Length
SK 1	Needle sensor	Penetration (20 mm minimum) in pasty, viscous or liquid media.	–50 °C to +800 °C	1 s	3 mm	15 cm
SK 2	Bendable sensor	Bendable as required. Curve radius > 4 mm.	–50 °C to +1,000 °C	2 s	2 mm	1 m
SK 3	Semi-rigid sensor	Slightly bendable.	–50 °C to +1,000 °C	6 s	4 mm	50 cm
SK 4	Surface sensor	For small flat surfaces. Use of silicone grease improves contact quality.	0 to 250 °C	1 s	5 mm	15 cm
SK 5	Surface sensor with spring	For flat surfaces The spring ensures optimum contact, even if the sensor is not set up perpendicularly Use of silicone grease improves contact quality.	–50 °C to +500 °C	1 s	5 mm	15 cm
SK 6	Flexible sensor	Sensor specially designed for measurements in places where access is difficult. Not to be used in liquids (tip not leakproof).	–50 °C to +285 °C	1 s in use with contact 3 s in ambient-air use	1 mm	1 m
SK 7	Air sensor	Suitable for all ambient air measurements (moving air). If the air is stationary, agitate the sensor to favour heat exchange.	–50 °C to +250 °C	5 s	5 mm	15 cm
SK 8	Pipe sensor	For measurements on pipes The pipe is cleaned and dried before applying the copper sheet The Velcro ribbon is then wound round it to ensure contact.	–50 °C to +140 °C	10 on stainless-steel pipe	90 mm	32 cm
SK 11	Needle sensor (stainless steel)	For penetration in pasty or viscous products.	–50 °C to +600 °C	12 s	3 mm	13 cm
SK 13	General-purpose sensor	Spiral lead: 45 cm to 1 m	–50 °C to +1,100 °C	12 s	3 mm	30 cm
SK 14	Elbowed surface sensor	For measuring surface temperatures when access is difficult.	–50 °C to +450 °C	8 s	6 mm	13 cm
SK 15	Surface sensor with spring	For flat surfaces The spring ensures optimum contact, even if the sensor is not set up perpendicularly.	–50 °C to +900 °C	2 s	8 mm	13 cm
SK 17	Air sensor	Suitable for all ambient air measurements (moving air). If the air is stationary, agitate the sensor to favour heat exchange.	–50 °C to +600 °C	3 s	6 mm	13 cm
SK 19	Magnetic sensor	Sensor with magnet for flat metal surfaces.	–50 °C to +200 °C	7 s	4 mm	1 m
Class II thermocouple accuracy -40 °C to +333 °C: ±2.5 °C / +333 °C to +1,200 °C: ±0.0075 x t °C, with t in °C

RADIOFREQUENCY & MICROWAVE MEASUREMENTS

COMPUTER NETWORK AND TELECOM TESTING

The wiring of a physical infrastructure may be defined as a set of specific elements through which it is possible to transfer information. Usually linked to computer networks, the performance requirements of wiring systems are evolving rapidly and they must now be capable of conveying other types of information, such as voice or video.

COPPER NETWORK WIRING

A category-5 or higher network cable comprises an external sheath, 8 copper wires organized in 4 pairs and an earth wire. There are different levels of cable shielding, with shielding per pair, global shielding or both.

THE DIFFERENT TYPES OF CABLES

The ISO/IEC 11801 standard defines official naming conventions for copper cables. The names describe the global protection of the cable, on the one hand, and the protection of the pairs of copper conductors, on the other.

Copper cables are named as follows: X / Y TP
X: Global protection of the cable
Y: Protection of the pairs
TP: Twisted Pairs

The following values are possible for X and Y:
U = Unshielded, no protection
S = Shielded with a tin-plated braid
F = Foiled, shielded with aluminium foil

		Shielding efficiency
U/UTP Global shielding: None (U) Shielding per pair: None (U)		☹☹☹
F/UTP Global shielding: Aluminium foil (F) Shielding per pair: None (U)		☹☹
SF/UTP Global shielding: Tin-plated braid and aluminium foil Shielding per pair: None (U)		☹
U/FTP Global shielding: None (U) Shielding per pair: Aluminium foil (F)		☺
F/FTP Global shielding: Aluminium foil (U) Shielding per pair: Aluminium foil (U)		☺☺
S/FTP Global shielding: global tin-plated braid Shielding per pair: Aluminium foil per pair		☺☺☺

THE RJ45 CONNECTOR

This connector with 8 positions and 8 electrical contacts is very widely used to terminate cables with twisted pairs:

MEASUREMENT OF ELECTROMAGNETIC FIELDS

Any system using electricity as an energy source generates electromagnetic radiation when it is in operation. Depending on the design of the system, the electromagnetic fields which it produces may be propagated in the space around it, extending significantly further than the external limits defined by its enclosure (casing) or the site where it is installed. This is the case for electrical machinery, motors, welding units, induction furnaces, high-voltage power lines, transformer stations, household electrical appliances and electronic instruments used for data processing, transmission, monitoring or measurement. These electromagnetic fields interact with matter, both inanimate (interference with nearby electrical devices) and animate (plants, animals, etc.). It is therefore important to be able to measure the values of the radiated magnetic and electric fields propagated around any electrical or electronic device:

- to overcome the purely technical problems linked to the electromagnetic compatibility of instruments and machines,
- but also to make sure that the people living and working near these electrical systems are not exposed to fields liable to cause lasting or even temporary negative effects on them.

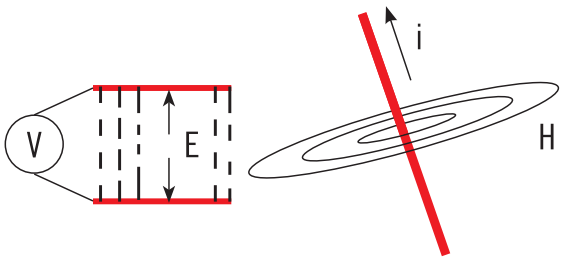
THE ELECTROMAGNETIC WAVE

The electromagnetic wave is **the radiated energy produced by the oscillation of an electrical load**. It is characterized by oscillation of the electrical and magnetic fields. Each system generating or absorbing electrical energy is the source of electromagnetic waves in the form of variable electric fields and magnetic fields which are propagated in the air at the speed of light.

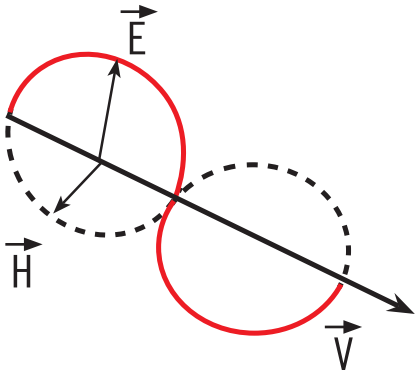
Roughly speaking, an electromagnetic wave comprises:

The electric field (E): generated by the difference in potential between two conductors subjected to an electrical voltage, this field depends on the voltage V.

The magnetic field (H): as this field is generated by a current in a conductor, it depends on the current i.



In the case of a sinusoidal alternating wave, the electric field E and the magnetic field H are sinusoidal and in phase. Their directions are perpendicular to one another and perpendicular to the direction of propagation.



Representation of the three components of an electromagnetic wave

This wave is characterized by its frequency F in Hertz (Hz) or its wavelength in metres; these two quantities are linked by the following relation:

$$\lambda = C_0 / F$$

where Co = the speed of light in m/s,
i.e. 300,000 km/s = 3 x 108 m/s

F = frequency in Hz

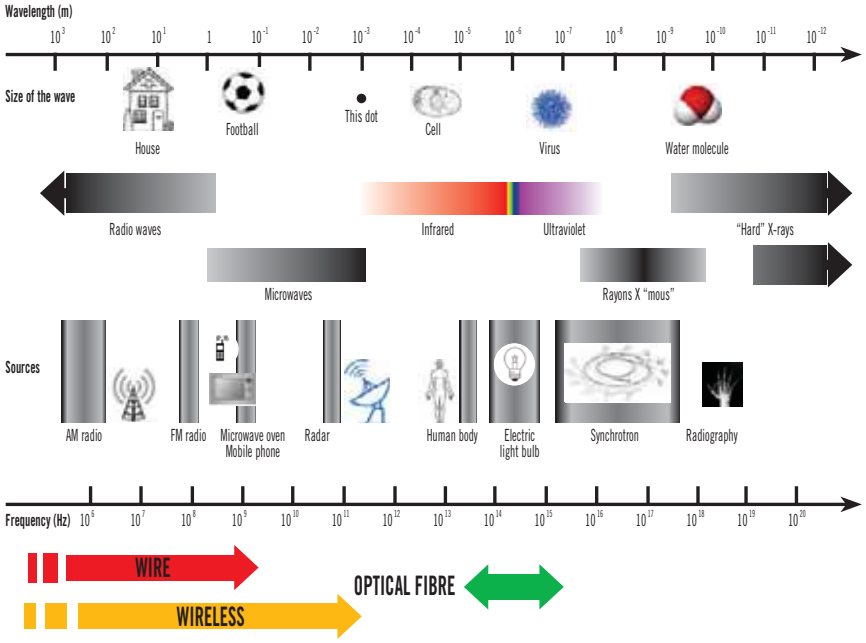
λ = wavelength in m

Example: for a wave at 300 MHz, the wavelength is 1 metre.

MEASUREMENT OF ELECTROMAGNETIC FIELDS

THE ELECTROMAGNETIC SPECTRUM

The electromagnetic spectrum is the decomposition of the electromagnetic radiation into its different components in terms of wavelength. Some waves can be detected with the human eye, while others have much lower frequencies detectable using radio devices.



INTERACTIONS WITH MATTER

The effects of electric and magnetic fields on matter and tissues vary according to their frequency and their intensity. Low-frequency fields are liable to induce electric currents in matter and biological tissues.
Effects described as "thermal" may follow. These thermal effects are the basis for the action of higher-frequency fields used in certain applications (cooking and drying with microwaves).

OBLIGATIONS

The International Commission on Non-Ionizing Radiation Protection (ICNIRP) has defined exposure limits adopted in many countries. The exposure limits adopted by the European Community are based on a recommendation issued by the ICNIRP, including those in Directive 1999 / 519 / CE (public) and the recent directive 2013/35/UE of 26th June 2013 concerning workers' exposure to electromagnetic fields, which must be transposed into law in the member states by 1st July 2016. For the latter directive, the employer's role will be to assess the hazards and determine the exposure which can be measured in order to find out objectively whether the standard recommended thresholds have been exceeded or not.

C.A 7028

Ref. : P01129501

RJ 45

STRENGTHS

- Graphical screen
- Detects, identifies and locates faults from up to 150 m away
- Designed for use on UTP, STP, FTP, & SSTP cables equipped with RJ45 connectors and wired in compliance with the TIA 568A/B, USOC or ISDN specifications

SPECIFICATIONS

	C.A 7028
Connector	RJ 45
Types of cables	UTP, STP, FTP & SSTP
Faults indicated	Short-circuited pair, Wire in open circuit, Short-circuit between pairs, Crossed pairs, Reversed pairs, Shielding continuity
Remote modules	Identifiers nos. 1 to 9
Dimensions	165 x 90 x 37 mm
Weight	350 g

ACCESSORIES / REPLACEMENT PARTS

- Set of 4 identifiers nos. 2 to 5 — P01101994
- Set of 4 identifiers nos. 6 to 9 — P01101995
- See all the accessories on page 193

CONTENTS

- C.A 7028 delivered with:
- 2 RJ45 leads
- 1 identifier no. 1
- 1 soft case
- 4 x 1.5 V LR06 batteries

LOW-FREQUENCY FIELDMETER

C.A 40

Ref. : P01167501

STRENGTHS

- Measurement of low-frequency magnetic fields
- Quick assessment of the radiation from equipment and installations
- Easy-to-handle unidirectional probe

SPECIFICATIONS

	C.A 40		
Magnetic field measurement	20 µT	200 µT	2,000 µT
Accuracy	±(4 %+3 cts)	±(5 %+3 cts)	±(10 %+5 cts)
Frequency range	30 to 300 Hz		
Power density	-		
Output	-		
Probe	Unidirectional		
Alarm	-		
Data storage	-		
Dimensions	163 x 68 x 24 mm		
Weight	285 g		

CONTENTS

- 1 probe
- 1 x 9 V 6LR61 battery

ACCESSORIES / REPLACEMENT PARTS

- Soft case P01298036

C.A 41 - C.A 43

Ref. : P01167001B P01167002A

STRENGTHS

- Measurement of electric fields and detection of radiation sources over a wide frequency band
- Isotropic probe: measures the field in all directions
- Storage of measurement points with the C.A 43

SPECIFICATIONS

	C.A 41		C.A 43	
Electric field measurement	0.1 to 1 V/m	1 to 10 V/m	10 to 100 V/m	100 to 200 V/m
Accuracy	0.7 V/m	0.5 V/m	1 dB	2 dB
Frequency range	100 kHz to 2.5 GHz			
Power density	-		0.1 to 2 mW/cm²	
Output	Analogue		Digital on optical fibre	
Probe	Isotropic			
Alarm	Configurable high and low thresholds			
Data storage	-		1,920 points	
Dimensions	216 x 72 x 37 mm			
Weight	350 g			

CONTENTS

- C.A 41 delivered with:
- 1 hard case
- 1 EF2A probe
- 1 x 9 V 6LR61 battery

- C.A 43 delivered with:
- 1 hard case
- 1 EF2A probe
- Optical fibre
- 1 PC adapter
- 1 CD-ROM containing data processing software
- 1 x 9 V 6LR61 battery

ACCESSORIES / REPLACEMENT PARTS

- EF2A isotropic probe P01167202B
- Shockproof sheath P01298009B

LABORATORY & EDUCATIONAL INSTRUMENTATION

INFO AND ADVICE

Electricity, electronics, physics, industrial maintenance & the environment: these are disciplines where **measurement is crucial for identifying and understanding** theoretical phenomena through practical experience. We offer **simple, educational equipment to help students to learn** about subjects ranging from the study of electrical signals to the maintenance of electrical systems.

STUDYING SIMPLE ELECTRICAL PHENOMENA

In Electronics training, students discover the techniques using electrical signals to capture, transmit, process, store and view data. To help them, **the electrical quantities may be generated by decade boxes or simulation cases.** These quantities are measured by traditional measuring instruments such as voltmeters, ammeters, wattmeters and multimeters.

These resistance, capacitance or inductance decade boxes are passive elements for insertion into test or development circuits in order to obtain the required resistance, capacitance or inductance values by combination.

Quantity	Unité
Resistance R	Ω (ohm)
Current I	A (ampere)
Voltage V	V (volt)
Power P	W (watt)
Capacitance C	F (farad)
Inductance L	H (henry)

Resistance box

COMPLIANCE WITH THE IEC 61010-1 STANDARD

These **decade boxes comply with the IEC 61010-1 safety standard** which establishes the safety rules for electrical measuring, control and laboratory instruments.
This standard defines the normal environmental conditions of use:

- Indoor use
- Altitude up to 2,000 m
- Temperature from 5 °C to 40 °C
- Maximum relative humidity of 80 % at temperatures up to 31 °C, with a linear decrease down to 50 % relative humidity at 40 °C
- Fluctuations of the network supply voltage from the network not exceeding ±10 % of the rated voltage
- Normal presence of transient overvoltages on the network power supply

PRACTICAL APPLICATIONS ENCOURAGE SUCCESSFUL LEARNING

Electrical installation cases, power and harmonics cases, microwave test benches and an **infrared thermography bench:** Chauvin Arnoux provides students with **ready-to-use** educational units which are ideal **for a large number of experiments.**

Their overall design aims to ensure simple use and measurements. **Delivered with a guide containing practical exercises** accompanied by the corresponding theoretical elements, these training cases enable students to boost their knowledge with practical skills likely to prove useful during their careers.

THERMOGRAPHY TRAINING BENCH

C.A 1875

Ref. : P01651620

PRACTICAL EXERCISES

STRENGTHS

- Highlighting of the various possible errors in thermography: problems linked to emissivity, spatial resolution, angle of measurement, transmission or reflection
- Simple use and simple measurements
- Delivered with a booklet of practical exercises accompanied by the corresponding theoretical principles

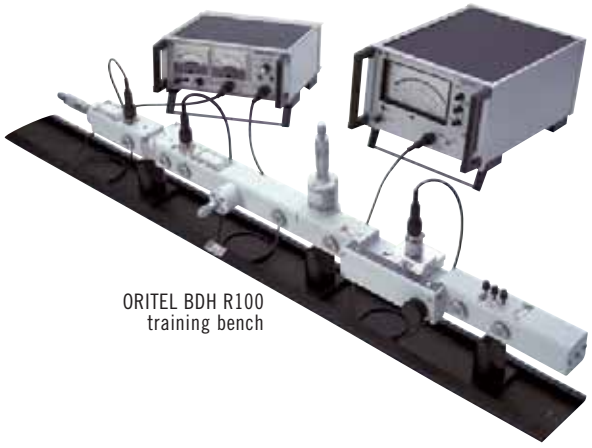
SPECIFICATIONS

	C.A 1875
Emissivity of materials	The influence of emissivity on temperature measurement is demonstrated using sheets of different materials
Positioning	Visual demonstration of the influence on temperature measurement of camera positioning in relation to the target
Reflection and transmission	Visual demonstration of reflection and transmission phenomena and their influence
Spatial resolution	Detection of minimum areas for temperature measurement according to the distance from the target
Power supply	230 V – 50 / 60 Hz

CONTENTS

- C.A 1875 delivered in a bag with:
- 1 mains power cable
- Test sheets
- 1 booklet presenting the theoretical principles and practical exercises

ORITEL CF 204 GUNN power supply



ORITEL BDH R100

BDH R100

Ref. : P01275101

EASYFIX | PRACTICAL EXERCISES

STRENGTHS

- Dedicated to teaching about 8.5 to 9.6 GHz microwaves with guided propagation
- WR90/R100 waveguide equipped with a quick mounting system
- Supplied with detailed course, teaching and lab work material
- Various accessories for setting up a wide range of experiments

SPECIFICATIONS

	BDH R100
Main possible experiments	
Study	GUNN oscillator
Measurements	Impedance
	Wavelength
	Frequency
	Standing wave ratio
Readings	Quadratic law of a detector

CONTENTS

- BDH R100 delivered in a case with:
- 1 ORITEL OSG 100 GUNN diode oscillator
- 1 ORITEL ISO 100 ferrite isolator
- 1 ORITEL MOD 100 PIN diode modulator
- 1 ORITEL ATM 100 variable attenuator
- 1 ORITEL OND 100 cavity wavemeter with curve
- 1 ORITEL LAF 100 measuring line
- 1 ORITEL ADZ 100/3 impedance adapter
- 1 ORITEL TGN 100 waveguide-to-coaxial transition element
- 1 ORITEL DEN 100 coaxial detector
- 1 ORITEL CHG 100 adapted load
- 1 ORITEL CC 100 short-circuit plate
- 3 ORITEL SUP 100 guide supports

ELECTRICAL INSTALLATIONS

STRENGTHS

- Ideal for learning about electrical safety measurements
- Simulation of measurements on electrical installations
- Depressurization valve for air transport

SPECIFICATIONS

	C.A 6710
Standards illustrated	NF C 15-100, VDE 0100, IEE 16th, IEC 64-8, ÖVE EN-1, RBT MIE, NIN/NIV…
Simulation of earthing systems	T, TN and IT
Measurement simulations	Earth, resistivity, loops (earth and internal), insulation, RCD tests (30 mA / 300 mA), current / leakage current
Fault simulations	Phase / neutral or earth interruptions, neutral / earth reversal, leakage current
Electrical safety	Cat. II 230 V
Dimensions	490 x 395 x 195 mm
Weight	10 kg

CONTENTS

- C.A 6710 delivered with:
- 1 x Schuko-type FR-DE mains power cable
- 6 black safety leads 25 cm long with rear connection
- 1 universal adapter for mains power sockets
- 1 FR/DE adapter for mains power sockets

ACCESSORIES / REPLACEMENT PARTS

- Set of 6 black Ø 4 male safety leads 25 cm long with rear connection — P01295212
- 1 universal adapter for mains power sockets — P01101980
- 1 FR/DE adapter for mains power sockets — P01101981

PEE

POWER AND HARMONICS

STRENGTHS

- Hazard-free simulation of a network and a three-phase load
- Variable currents, voltages, phase shift and THD

SPECIFICATIONS

	PEE
Network simulations	SINGLE or THREE--phase (230 V mains power supply)
Measurement simulations	U, I, W, W/h, var, φ, THD, etc.
Voltage	Mains ± 15 %
Current	1, 2, 5, 10, 20 A ± 10 %
Voltage variation*	+8 % ; –10 %
Current phase shift*	30°, 45°, 60° ±5° inductive or capacitive
Harmonic distortion on current and voltage*	Network level, 15 %, 25 % and variable
Phase outage	Yes
Power supply	230 V mains - 2 P + E socket
Electrical safety	IEC 61010 300 V Cat II pollution 2
Dimensions	490 x 395 x 195 mm
Weight	10 kg

**on phase 1*

CONTENTS

- PEE case delivered with:
- 1 mains power cable

ACCESSORIES / REPLACEMENT PARTS

- Measurement leads page 220

ADDITIONAL INFO

- The current sensors are not delivered with the training case.

DECADE BOXES AND SHUNTS

CAPACITANCE BOXES

STRENGTHS

Elements for mechanical and electrical assemblies

- Selection by rotary switch with contacts
- Typical accuracy: 2%

1-decade boxes

- 3 boxes with 11-position switch (including position 0)
- 2 safety terminals Ø 4mm and one earth terminal
- Dimensions: 72x72x90 mm

5-decade box

- Polystyrene and polypropylene high-accuracy capacitors with a temperature coefficient of 125 ppm/°C and a very high insulation resistance
- Output: Ø 4mm safety sockets
- Metal front panel and casing connected to a safety earth socket with foolproofing

CURRENT MEASUREMENT

CHOOSING YOUR CURRENT CLAMP

There is a wide range of criteria for choosing a current clamp. The approach below is designed to help define your requirements and guide you naturally towards the model which best suits your application. The criteria selected are classified from 1 to 6.

To choose your clamp, we advise you to follow this logic:

- Measurement of direct or alternating current?
  ➥ AC/DC clamps table or AC clamps table
- High or low currents?
  ➥ see the “Input” column to define the appropriate families of clamps
- On small wires or large cables?
  ➥ see the diagrams at the bottom of the next page and only choose families with the shapes and dimensions required
- What instrument will it be connected to?
  ➥ see “Output / Connection” column to choose a clamp with compatible signal and connection possibilities
- What are your other criteria?
  ➥ see “Specific features” column to check that the clamp chosen fulfils your requirements perfectly

THE WIDEST RANGE OF IEC 61010-2-032 CLAMPS

Our innovation, technical expertise and determination to manufacture top-quality products that comply with standards have made Chauvin Arnoux the worldwide specialist in current clamps.

On the next pages, you will find a table presenting the clamps for measuring AC/DC current, followed by a diagram giving the clamp form with dimensions and then another table grouping a large number of models for AC current.

As a result of their specifications, certain clamps are specialized for specific applications:

- Clamps for oscilloscopes (BNC output): E3N, PAC12, PAC22, MN60, Y7N, C160, D38N and MA200
- Clamps for leakage currents: MN73, C173 and B102
- Process current clamps: K1 and K2
- Clamp for measurement on the secondary windings of current transformers: MN71

As well as these standard specialized and unspecialized models, “specific” versions can also be produced on request: please ask for details.

MiniFlex® FLEXIBLE PROBES FOR AC CURRENT

MA110 - MA130 - MA200

600 V CAT IV | 1000 V CAT III | 20 mA | 3000 AAC | 4 calibres | IP 67

STRENGTHS

- Flexible sensor comprising an active part (Rogowski coil) and a unit containing electronics
- For multimeters, loggers, oscilloscopes, etc.
- No magnetic saturation constraints: excellent linearity, low phase shift, wide dynamic range for measurement
- Flexibility of the sensors for easier clamping of the conductor to be measured
- Compact instruments which are easy to position in residential or industrial electrical cabinets
- Click system for opening and closing the core even when handling with safety gloves

ADDITIONAL INFO

MA110 model

- Measurement from 20 mA
- Can be connected to the AC voltage input (mVAC / VAC) of any multimeter or measuring instrument equipped with Ø 4 mm female banana plugs
- Can be powered by batteries or via a standard external power supply
- Equipped with an automatic power-off system which can be deactivated at start-up to perform long-duration measurement campaigns
- Possesses 3 LEDs (green, yellow and orange) indicating, respectively, the power-supply status, status of the automatic power-off function and measurement capacity overruns

Three-phase MA130 model

- Can be connected to the AC voltage inputs (mVAC / VAC) of any power analyser, logger or measuring instrument equipped with BNC plugs

Three-phase MA200 model

- Equipped with a BNC output and can be connected to all types of oscilloscopes
- Offers high bandwidth
- Particularly suitable for viewing transient signals, command signals, tripping currents of thyristors or the output signal from an electronic power supply

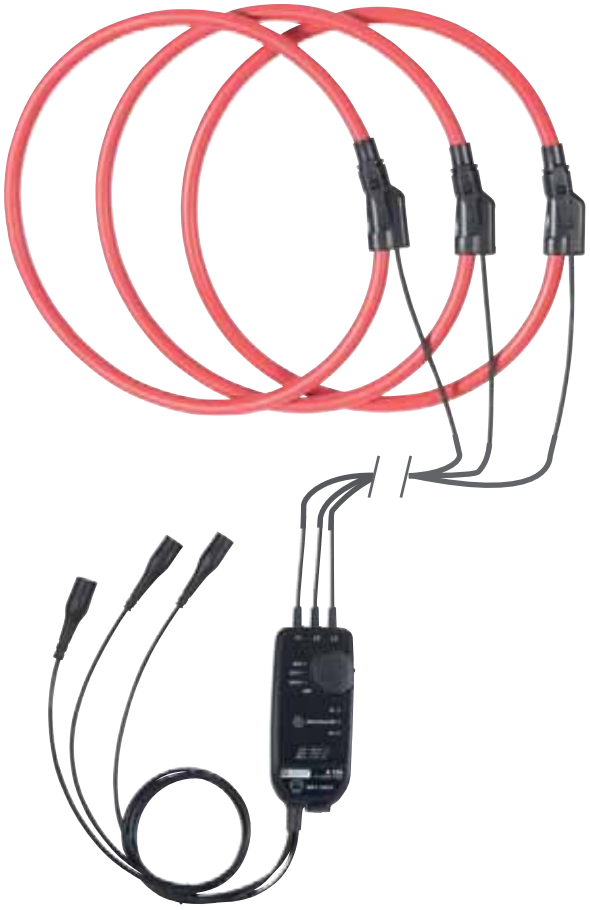
AmpFlex® FLEXIBLE PROBES FOR AC CURRENT



A110 - A130

1000 V CAT IV | 20 mA | 30000 AAC | IP 67 | 4 calibres

STRENGTHS

- Flexible sensor comprising an active part (Rogowski coil) and a unit containing electronics
- For multimeters, loggers, oscilloscopes, etc.
- No magnetic saturation constraints: excellent linearity, low phase shift, wide dynamic range for measurement
- Flexibility of the sensors for easier clamping of the conductor to be measured
- Compact instruments which are easy to position in residential or industrial electrical cabinets
- Click system for opening and closing the core even when handling with safety gloves

ADDITIONAL INFO

A110 model

- Measures from 20 mA
- Can be connected to the AC voltage input (mVAC / VAC) of any multimeter or measuring instrument equipped with Ø 4 mm female banana plugs
- Can be powered by batteries or via a standard external power supply
- Equipped with an automatic power-off system which can be deactivated at start-up to perform long-duration measurement campaigns
- Possesses 3 LEDs (green, yellow and orange) indicating, respectively, the power-supply status, status of the automatic power-off function and measurement capacity overruns

Three-phase A130 model

- Can be connected to the AC voltage inputs (mVAC / VAC) of any power analyser, logger or measuring instrument equipped with BNC plugs

Please contact us for models with specific sensitivities (mV/A) and/or lengths. We can also supply bare sensors for integration into assemblies including the signal-processing electronics.

(1) The upper value corresponds to 120 % of the max. rated value.

*Reference for E3N + power supply > P01120047

ACCESSORIES / REPLACEMENT PARTS

FOR CURRENT SENSORS

MA110 / MA130 / A110 / A130

- Mains adapter / µUSB-B cable _____ P01651023

- 110V-240V 50/60 Hz
- Female USB type A 5V 1A
- Charging and connection cable
- Male USB type A - male USB type Micro-B
- 1.80 m

MN73 / C173 / B102

- AN1 artificial neutral box _____ P01197201

OTHER CURRENT SENSORS

- Mains adapter for E clamp _____ P01101965
- Mains adapter for K clamp _____ P01101966
- Mains adapter for PAC clamp _____ P01101967
- Mains adapter for AmpFlex® A100 _____ P01101968
- Mains adapter for MiniFlex® MA100 _____ P01102986
- Mains adapter for MiniFlex® MA200 _____ P01102987

MULTIFIX MOUNTING ACCESSORY

P01102100Z

When used with the compatible soft cases and bags, this helps you to transport and mount the measuring instruments for greater user comfort.

REELING BOX

P01102149

To make sure that your cables are never tangled. Can be used to store up to 3 m of cable (1 x 3 m / 2 x 1.5 m). Built-in magnet for easy mounting on any metal surface.

Ø 4 MM BANANA CONNECTION TECHNOLOGY

MEASUREMENT LEADS

Moulded

Model	Description
	**Set of 2 red/black moulded PVC leads** P01295450Z Insulated straight male plug Ø 4 mm Insulated straight male plug Ø 4 mm • 15 A • 1.5 m • 1000 V CAT IV
	**Set of 2 red/black moulded silicone leads** P01295452Z Insulated straight male plug Ø 4 mm Insulated straight male plug Ø 4 mm • 15 A • 1.5 m • 1000 V CAT IV

Model	Description
	**Set of 2 red/black moulded PVC leads** P01295451Z Insulated straight male plug Ø 4 mm Insulated elbowed male plug Ø 4 mm • 15 A • 1.5 m • 1000 V CAT IV
	**Set of 2 red/black moulded PVC leads** P01295453Z Insulated straight male plug Ø 4 mm Insulated elbowed male plug Ø 4 mm • 15 A • 1.5 m • 1000 V CAT IV

Standards

Model	Description
	**Set of 2 red/black PVC leads** P01295288Z Insulated straight male plug Ø 4 mm Insulated straight male plug Ø 4 mm • 15 A • 1.5 m • 600 V CAT IV / 1000 V CAT III
	**Set of 2 red/black PVC leads** P01295290Z Insulated straight male plug Ø 4 mm with rear connection. Insulated straight male plug Ø 4 mm with rear connection • 20 A • 2 m • 600 V CAT III

Model	Description
	**Set of 2 red/black PVC leads** P01295289Z Insulated straight male plug Ø 4 mm Insulated elbowed male plug Ø 4 mm • 15 A • 1.5 m • 600 V CAT IV / 1000 V CAT III

LEADS WITH TEST PROBES

For CAT IV & CAT III installations

Model	Description
	**Set of 2 red/black PVC test-probe leads** P01295455Z Insulated straight male plug Ø 4 mm • 15 A • 1.5 m • 600 V CAT IV / 1000 V CAT III
	**Set of 2 IP2X PVC leads for multimeters** P01295461Z Complies with NF C 18-510 and IEC 61010-031+A1:2008 • IP2X test probe • Insulated elbowed male plug Ø 4 mm • 15 A • 1,5 m • 600 V CAT IV

Model	Description
	**Set of 2 red/black PVC test-probe leads** P01295456Z Insulated elbowed male plug Ø 4 mm • 15 A • 1.5 m • 600 V CAT IV / 1000 V CAT III

Ø 4 MM BANANA CONNECTION TECHNOLOGY

LEADS WITH TEST PROBES

For CAT II & lower installations

Model	Description
	**Measurement leads + test probes kit** **P01295475Z** comprising: **Set of 2 red/black PVC leads** Insulated straight male plug Ø 4 mm Insulated elbowed male plug Ø 4 mm • 15 A • 1,5 m • 600 V CAT IV / 1000 V CAT III **+ Set of 2 moulded test probes Ø 4 mm** • Female plug Ø 4 mm • CAT II 300 V

Model	Description
	**Measurement leads + test probes kit** **P01295474Z** comprising: **Set of 2 red/black PVC leads** Insulated straight male plug Ø 4 mm Insulated elbowed male plug Ø 4 mm •15 A •1.5 m •600 V CAT IV / 1000 V CAT III **+ Set of 2 moulded test probes Ø 2 mm** •Female plug Ø 4 mm •CAT II 300 V

REMOVABLE TEST PROBES

For CAT IV & CAT III installations

Model	Description
	**Set of 2 red/black moulded test probes** **P01295454Z** • Female plug Ø 4 mm • 15 A • CAT IV / CAT III 1000 V

For CAT II & lower installations

Model	Description
	**Set of 2 moulded test probes Ø 4 mm** **P01295458Z** • Female plug Ø 4 mm • 15 A • CAT II 300 V

Model	Description
	**Set of 2 moulded test probes Ø 2 mm** **P01295460Z** • Female plug Ø 4 mm • 15 A • CAT II 300 V

PRODUCT-SPECIFIC ACCESSORIES

FOR MULTIMETERS OR TESTERS WITH + TERMINAL ON TOP

Model	Description
	**Red test probe Ø 4 mm** **P01103060Z** removable for tester or DMM Use as "hands-free" test probe • Male plug Ø 4 mm • 600 V CAT IV

FOR C.A 745 TESTER OR REMOTE-CONTROL PROBE

Model	Description
	**Red test probe Ø 4 mm** **P01103061Z** removable with locking pin For tester or remote-control probe • Male plug Ø 4 mm • 600 V CAT IV

FOR C.A 704, C.A 740 & C.A 760 VOLTAGE ABSENCE TESTERS

Model	Description
	**Removable red test probe** **P01103059Z** • Female plug Ø 4 mm • 600 V CAT IV **Black test-probe lead** **P01295464Z** Insulated elbowed female plug Ø 4 mm Length 0.85 m • 600 V CAT IV

FOR C.A 771 & C.A 773 VOLTAGE ABSENCE TESTERS

Model	Description
	**Set of 2 red/black IP2X test probes Ø 4 mm** **P01102128Z** Female plug Ø 4 mm IEC 61423-3 1000 V
	**Set of 2 red/black IP2X test probes** **P01102127Z** Female plug Ø 4 mm 1000 V CAT IV
	**Set of 2 red/black test probes** **P01102123Z** Female plug Ø 4 mm 1000 V CAT IV

Model	Description
	**Set of 2 red/black test probes Ø 2 mm with crystal cap** **P01102124Z** Female plug Ø 4 mm IEC 61423-3 1000 V
	**Set of 2 red/black test probes Ø 4 mm** **P01102125Z** Female plug Ø 4 mm IEC 61423-3 1000 V
	**Crystal protective cap for test probe** **P01102126Z**

FOR ALL VOLTAGE ABSENCE TESTERS

Model	Description
	**Set of 2 PVC IP2X leads** **P01295463Z** for C.A 760 and C.A 704 VATs Complies with NF C 18-510 and IEC 61010-031+A1:2008 • IP2X test probe Ø 2 mm • Elbowed female plug Ø 4 mm • 15 A • 1.5 m • 600 V CAT IV
	**Red removable test probe** **P01102008Z** • Female plug Ø 4 mm • IEC 61243-3 **Black test-probe lead** **P01102009Z** Insulated elbowed female plug Ø 4 mm • Length 0.85 m • IEC 61243-3

Model	Description
	**Set of 2 IP2X leads for C.A 740N and C.A 760N VATs** **P01295462Z** • IP2X test probe Ø 4 mm • Elbowed female plug Ø 4 mm • 15 A • NF C 18-510 / IEC 61243-3 1000 V • 1.5 m • 0.25 m & 0.85 m : **P01295285Z**

FOR CAT IV & CAT III INSTALLATIONS

Model	Description
	**Set of 2 red/black crocodile clips** P01295457Z • 15 A • 1000 V CAT IV
	**Set of leads and measuring accessories for electricians** P01295459Z • 2 x 1000 V CAT IV moulded test probes • 2 x 1.5 m 1000 V CAT IV red/black moulded leads with straight male plug – elbowed male plug • 2 x red/black 1000 V CAT IV crocodile clips • 2 x 300 V CAT II moulded test probes Ø 4 mm
	**Kit of 2 PVC leads + 2 test probes Ø4 mm** P01295475Z • Straight male plug Ø4 mm - Elbowed male plug Ø4 mm • Probe Ø4 mm - Female plug Ø 4mm • 300 V CAT II
	**Set of 2 red/black magnetized test probes** P01103058Z For voltage measurement only Ø test probe: 6.6 mm – Elbowed female plug Ø 4 mm • 1000 V CAT III / 600 V CAT IV

Model	Description
	**Set of 2 red/black crocodile wire grips** P01102053Z • 20 A • 1000 V CAT III
	**Set of 2 adapters** P01102101Z Insulated female BNC plug–Red/black insulated male plugs Ø 4 mm with 19 mm spacing • 600 V CAT III
	**Kit of 2 PVC leads + 2 test probes Ø2 mm** P01295474Z • Straight male plug Ø4 mm - Elbowed male plug Ø4 mm • Probe Ø2 mm - Female plug Ø 4mm • 300 V CAT II
	**PVC lead** AG-1066Z Insulated male BNC plug –Insulated straight male banana plugs Ø 4 mm (red/black) with rear connection • 1 m • 500 V CAT III

FOR CAT II & LOWER INSTALLATIONS

Model	Description
	**Set of 3 measurement adapters for housing** P01102114Z 2 red/black insulated straight male plugs Ø4 mm • E27 screw socket • B22 bayonet socket • 2-pole mains socket (P/N) • 250 V CAT II
	**Current lead equipped with a French 2P+E mains socket** P03295509 • For inserting an ammeter in series in total safety • For measuring the current with a current clamp without having to remove the outer sheath of the power supply cable
	**Set of 2 red/black insulation-piercing clips** P01102055Z • 30 V AC, 60 V DC
	**Set of 2 adapters** P01101846 Red/black insulated male BNC – female sockets Ø 4 mm with 19 mm spacing • 500 V CAT I, 150 V CAT III

Model	Description
	**C.A 753: Measurement adapter for 2P+E socket** P01191748Z • Suitable for European and Schuko sockets • Can be used for measurements on the P (Phase), N (Neutral) and PE (Earth) conductors in total safety • Guarantees mechanical and electrical contact with all test probes (Ø2, Ø4, IP2x, etc.) • Shows the presence of a P-N voltage (> 200 V) and indicates the phase position • IEC 61010 230 V CAT II
	**Measurement lead for French and German 2P+E mains sockets** P06239307 For direct measurement on a mains socket Quick implementation and reliable connections
	**CMS clamp** HX0064 Copper-gold-plated beryllium contacts Output via male plugs Ø 4 mm • 1.2 m • SELV
	**Set of 2 adapters** P01101847 Red/black insulated BNC male – male sockets Ø 4 mm with 19 mm spacing • 500 V CAT I, 150 V CAT III

OTHER ACCESSORIES

FOR CAT II & LOWER INSTALLATIONS

Modèle	Description
	**SHT40KV high-voltage probe for multimeters** P01102097 Maximum rated voltage: 40 kV_{DC}, 28 kV_{RMS} or 40 kV_{PEAK} (50/60 Hz) Division ratio (input/output : 1 kV / 1 V For multimeters with 10 MΩ input impedance

EXTERNAL POWER SUPPLY & MAINS POWER PACK

Model	Description
	**Set of 4 x 1.5 V LR06 rechargeable batteries with low self-discharge** HX0051B
	Set of 4 x 1.5 V LR06 rechargeable batteries with low self-discharge plus charger HX0053

Model	Description
	**230 V / µUSB mains adapter – B** P01651023 • 110 – 240 V 50/60 Hz • Female USB type A, 5 V 1 A Charging and connection cable • Male USB type A – Male USB type µ-B • 1.8 m

TEMPERATURE MEASUREMENT SENSORS

Model	Description
	**C.A 1711** P01102082 Tachometer probe - Pulse output  / rev. - 2 insulated banana plugs Ø 4 mm - Measurement range: 6 to 120,000 RPM - IP 53
	**C.A 801** P01652401Z Temperature adapter for multimeters - -40 °C to +1,000 °C - 1 mVDC / °C (or /°F) Delivered with 1 K sensor and 1 battery

Model	Description
	**C.A 1871** P016516102 Infrared sensor Compatible with any multimeter equipped with an mV range - Measurement range: -30 °C to +550 °C - Output: 1 mV/1 °C - Distance/spot ratio: 8/1 - Accuracy: ± 2 %
	**C.A 803** P01652411Z Temperature adapter for multimeters - 2 measurement channels - -40 °C to +1,000 °C - 1 mVdc / °C (or /°F) - θ1 - θ2 differential measurement Delivered with 2 K sensors and 1 battery

ADAPTERS FOR TEMPERATURE MEASUREMENT SENSORS

Modèle	Description
	**Set of 2 safety thermocouple adapters for multimeters** P01102106Z Female thermocouple plug – insulated red/black male plugs Ø 4 mm with 19 mm spacing
	**Safety adapter and K-sensor temperature probe** P01102107Z For multimeters and multimeter clamps equipped with a temperature measurement calibre with 19 mm-spaced banana inputs - Measurement range from -50 °C to +350 °C - Sensor length: approx. 100 cm

Modèle	Description
	**Pt100/Pt1000 sensor adapter for multimeters** HX0091 Female Pt100/Pt1000 plug – Red/black insulated male plugs Ø 4 mm
