

METRAHIT IM XTRA & METRAHIT IM E-DRIVE Isolation Tester & Milliohmmeter TRMS Digital Multimeter, Milliohmmeter, Insulation and Short-Circuited Coil Tester

3-349-993-03

- Insulation resistance measurement up to 3.1 GΩ with interference voltage detection, test voltages: 50, 100, 250, 500 and 1000 V per DIN EN 61557-2 / VDE 0413-2
- DAR: dielectric absorption rate, PI: polarization index
- 4-wire milliohm measurement (Kelvin connection), 200 mA or 1 A measuring current for precise measurement of extremely small resistances with a resolution of 1 $\mu\Omega$
- 2-wire RIo measurement with 200 mA test current per DIN EN 61557-4 / VDE 0413-4
- Short-circuited coil test with 1000 V and optional COIL adapter
- Multifunctional measuring instrument (V, A, Ω, F, Hz, %, RPM, °C/°F)
- \bullet $\,$ TRMS $_{AC\,/\,AC+DC}$ measurement for current/voltage value up to 10/100 kHz
- Low-pass filter can be activated, 1 kHz (-3 dB) in the V AC, AC+DC range
- Direct current measurement, 10 nA to 1 A
- Current measurement with clamp sensors transformation ratio can be adjusted with CLIP from 1:1 to 1:1000 and is taken into account in the amperage display
- · Capacitance measurement
- Precision temperature measurement °C, and °F for RTD and TC-K sensors
- Diode measurement ($I_K = 1 \text{ mA}$, U_{Flow} up to 5.1 V) and continuity testing
- Acoustic signals
- Acquisition of min./max. values, DATA Hold
- Data logger thanks to integrated memory module and real-time clock, individual measurements as well
- Push/print function transfers measured values to software by pressing a key
- Programmable sequences for test routines
- · Color graphic display
- Modular supply power: standard quick-change rechargeable lithium battery, optional WPC module for inductive charging and mains module with USB port, change without interrupting the measuring circuit thanks to touch protected module socket
- Automatic blocking sockets for the current input
- Remote probe with START (ISO) and STORE keys
- Housing with IP52 protection, dust and splash protected, replaceable rubber holster
- Interfaces: Bluetooth or WLAN integrated, USB with optional mains module
- IZYTRONIQ windows software for documentation, preparation of test reports and graphic
 evaluation of measurements

CE

600 V CAT IV 1000 V CAT III

Applications

The **METRAHIT IM XTRA** and the **METRAHIT IM E-DRIVE** are portable, extremely rugged multimeters designed for use in the field. They're suitable for maintenance, service and diagnosis at electric machines, drive units and systems, for example in automotive, energy and automation applications.

METRAHIT IM XTRA and **METRAHIT IM E-DRIVE** multimeters are all-inone instruments: insulation tester, milliohmmeter, short-circuited coil tester and universal multimeter. They're ideal for safety testing and diagnosis at electric and hybrid vehicles, as well as all types of electric machines.

The METRAHIT IM XTRA and the METRAHIT IM E-DRIVE make it possible to test coils for short-circuits within an inductance range of 10 μH to 50 mH (at 100 Hz) in combination with the optional COIL test adapter. This range corresponds to motors in accordance with DIN standards with power ratings of roughly 15 kVA to 80 MVA. A universal adapter for motors with medium power ratings is in preparation.

Features

Insulation Resistance Measurement with Interference Voltage Detection

Insulation resistance measurement with test voltages of 50 to 1000 V. If interference voltage of greater than 15 V AC or 25 V DC is detected during insulation measurement, an error message appears briefly at the display, after which automatic switching to TRMS_{AC+DC} voltage measurement at 1 $\mathrm{M}\Omega$ takes place.

Polarization Index (PI):

When test voltage is applied, insulation resistance is measured after one minute and after ten minutes. The polarization index is the ratio which results from the two measured values. In the case of electric drive units, a value of at least 2 indicates intact insulation and a value of greater than 4 indicates very good insulation.

Absorption Index (DAR)

Practically speaking, the absorption index test is a quick polarization index measurement. The ISO values measured after 30 and 60 seconds are used to generate a ratio.

TRMS Multimeter with Insulation Measurement and Short-Circuited Coil Test

Kelvin Connection for 4-Wire Measurement (4-L) (milliohm measurement)

The 4-wire measurement compensates for influences resulting from cable and contact resistances which must not be neglected when measuring very small resistances. Measuring current can be set to 200 mA or 1 A. In this way, even extremely small contact resistances can be measured, for example at welded and riveted joints and on aircraft outer skins (lightning protection and wick test), or equipotential bonding is measured in accordance with UN ECE R100 in hybrid and electric vehicles.

2-Wire Rlo Measurement with 200 mA Test Current per EN 61557 / VDE 0413

Low-resistance measurement per EN 61557-4 / VDE 0413, part 4, for earth, protective and equipotential bonding conductors.

RMS Value with Distorted Waveform

The utilized measuring method allows for waveform-independent TRMS measurement of periodic quantities (AC) and pulsating quantities (AC and DC) for voltage and current at up to 100 kHz.

Activatable Filter for V AC Measurement

A 1 kHz low-pass filter can be activated if required, for example when measuring cables with parasitic external signals. The input signal is checked by a voltage comparator for dangerous voltages as long as the low-pass filter is activated, and these are indicated at the display if applicable.

Diode Testing with Constant Current $I_k = 1 \text{ mA}$

Testing of the polarity of diodes and checking for short-circuits and interruptions in electrical circuits. The test voltage source makes it possible to measure LEDs and reference diodes up to 4.5 V, e.g. also white LEDs.

Fast Acoustic Continuity Test $I_k = 1 \text{ mA}$

Testing for short-circuiting or interruption in the \mathbb{Q}) switch position. The threshold value for acoustic signaling can be set to 1, 10, 20, 30, 40 or 90 Ω .

Automatic/Manual Measuring Range Selection

Measured quantities are selected with the rotary switch.

The measuring range can be automatically matched to the measured value, or selected manually for quick, repetitive measurements.

Color Graphic Display

A high-resolution transmissive 3½" TFT color graphic display with 320 x 480 dots is used for measured values and menu navigation. The display is easily readable from all directions, as well as under difficult lighting conditions (controllable with light sensor). Graphic representation permits user-friendly menu navigation including help texts.

Analog Bar Graph for Quick Trend Displays

The bar graph (with additional negative axis range for zero-frequency quantities) permits faster detection of measured value changes as compared with digital value displays.

Display Resolution

High resolution with 30,000 digits and a basic accuracy of 0.15%.

Automatic Storage of Measured Values

The DATA HOLD function automates the storage of measured values after they have settled in. A patented process assures that random values are not saved to memory in the case of rapidly changing measured quantities, but rather the actual measured value. The stored measured value is displayed as a digital value. The bar graph continuously indicates the momentary measured value.

Overload Protection

Overload protection safeguards the instrument in all measuring functions for up to 1000 V. Voltages of greater than 1000 V and currents of greater than 1 A are indicated acoustically. FUSE appears at the display if the fuse for the current or $m\Omega$ measurement input blows.

Battery Charge Level - Power Saving Circuit

The battery charge level is accurately indicated in the graphic display.

The device is switched off automatically if the measured value remains unchanged for a period of between 10 and 59 minutes (adjustable), if none of the controls are activated during this time and continuous operation is not activated.

Automatic Blocking Sockets (ABS) *

All current ranges are implemented via a single connector jack which prevents any possibility of operator error.

The automatic blocking sockets prevent incorrect connection of the measurement cables, as well as selection of the wrong measured quantity. Danger to the user, the instrument and the device under test resulting from operator error is thus ruled out.

* Patented (patent no. EP 1801 598 and US 7,439,725)

Housing and Protective Cover for Harsh Conditions

- New housing design
- Separate fuse compartment
- Quick-change rechargeable battery

The instrument is protected against damage in the event of impacts or dropping by means of a soft rubber cover with tilt stand. The rubber material also assures that the instrument doesn't wander if it's set up on a vibrating surface

Data Interfaces

The instrument can be remote configured and momentary and saved measurement data can be read out via a bidirectional wireless interface, Bluetooth or WLAN, or the USB port at the optional mains module. IZYZRON.IQ software is required to this end.

Interface protocol and device driver software for **LabVIEW** (National InstrumentsTM) are available upon request.

Voluntary Manufacturer's Guarantee

36 months for materials and workmanship. 1 year for calibration.

DAkkS calibration certificate

The **METRAHIT IM XTRA** multimeter is furnished with a DAkkS calibration certificate, which is also recognized internationally (EA, ILAC).

After the user-specified calibration interval has elapsed (recommended interval: 1 to 3 years), the multimeter can be inexpensively recalibrated in our own DAkkS calibration laboratory.

METRAHIT IM XTRA & METRAHIT IM E-DRIVE TRMS Multimeter with Insulation Measurement and Short-Circuited Coil Test

Overview of Included Features

Function	METRAHIT IM XTRA METRAHIT IM E-DRIVE
V_{DC} (Ri = 9 M Ω)	•
V_{AC} / Hz TRMS (Ri = 9 M Ω)	1 kH3 filter
V_{AC+DC} TRMS (Ri = 9 M Ω) ¹	1 kHa filter
V_{AC+DC} TRMS (Ri = 1 M Ω) R _{ISO} range (interference voltage)	•
Hz (V _{AC})	300 kHz
V _{AC, AC+DC} bandwidth	100 kHz
A _{DC, AC, AC+DC} / Hz TRMS	10 nA 1 A
Fuse	1 A / 1000 V - 30 kA
Current sensor transformation ratio >C	1 mV : 1 • 10 • 100 • 1000 mA
Hz (A AC)	30 kHz
Insulation resistance RISO: test voltages	50 • 100 • 250 • 500 • 1000 V
Short-circuited coil test (1 kV) with COIL adapter	Option
Duty cycle measurement as %	•
Speed measurement in RPM	•
Resistance Rlo with 200 mA per EN 61557 / VDE 0413	•
Milliohm with 4-wire method, $\text{m}\Omega$ with 200 mA	•
Milliohm with 4-wire method, $\text{m}\Omega$ with 1 A pulse	•
Fuse	1 A / 1000 V - 30 kA
Resistance Ω	•
Continuity (1)	•
Diode 5.1 V-▶	•
Temperature: °C/°F TC type K and Pt100/1000 ²	•
Capacitance	•
Min-Max / data hold	•
Test sequence	20 steps
64 MBit memory ³	•
Bluetooth interface	•
WIFI interface	Option
3.5" TFT color graphic display	•
2-key Remote probe: start/stop and store	•
Quick-change battery with USB charging	•
Mains module with electrical isolation and USB	Option
WPC quick change battery for inductive charging	Option
Protection	IP 52
Measuring category	1000 V CAT III, 600 V CAT IV

Due to the system, the DC component indicated in the smallest measuring range (300 mV) has an offset. For a precise measurement of the DC component, please select measuring function VDC.

Standard Equipment (depending on Device Variant)

- 1 METRAHIT IM XTRA or METRAHIT IM E-DRIVE multimeter with rubber holster
- 1 Remote probe with start/stop and store/send functions
- 1 Type KS17-2 cable set: 1 pair of safety measurement cables with 4 mm test tip red/black
- 1 Type KC4 Kelvin clip (with METRAHIT IM XTRA 1 pair)
- 1 Type KC27 Kelvin probe (only with METRAHIT IM E-DRIVE)
- 1 Quick change, rechargeable lithium polymer battery with micro USB charging socket
- 1 USB mains power pack (5 V DC, 2 A) with cable and micro USB charging plug
- 1 DAkkS calibration certificate
- 1 Hard case for the multimeter and accessories
- 1 Condensed operating instructions, German/English
- Comprehensive operating instructions in German and English available on the Internet for download at www.gossenmetrawatt.com
- 1 Card with registration key for the software

with optional temperature sensors

For 300,000 measured values, sampling rate adjustable from 0.1 seconds to 9 hours

Display of up to max. 5.1 V, "OL" in excess of 5.1 V.

Applies to measurements at film capacitors during battery operation

Lowest measurable frequency for sinusoidal measuring signals symmetrical to the zero point

Overload capacity of the voltage measurement input:

power limiting: frequency x voltage max. 3 x 10⁶ V x Hz at > 100 V

Overload capacity of the current measurement input: See current measuring ranges for maximum current values

Input sensitivity, sinusoidal signal: 10% to 100% of the voltage or current measuring range, restriction in mV measuring range: 30% rdg. The voltage measuring ranges with max. 10 kHz apply in the A measuring range.

Plus sensor deviation

With ZERO function active

Accuracy applies as from 1 % of MR; due to the TRMS converter, values < 50 digits are suppressed in the zero point.

^{12 10} minute cool-down period

¹³ Required signal range: 30% to 100% of the voltage measuring range 14 The integrated FF630 mA/1000 V fuse blows in the event of overloading

Key: d = digit(s), MR = measuring range, rdg. = reading (measured value)

Fuse

Current range: FF 1 A/1000 V AC/DC,

6.3 x 32 mm

Fuse with breaking capacity of 30 kA at 1000 V AC/DC, protects the current measurement input in the 300 μA to 1 A

ranges

m Ω range FF 1 A/1000 V

6.3 x 32 mm

Fuse with breaking capacity of 30 kA at

1000 V AC/DC

Display

TFT color graphic display (55×36 mm) with analog and digital display including unit of measure, type of current and various special functions

Background Illumination

Activated background illumination can be regulated by means of a light sensor.

Analog Bar Graph

Scaling Linear

Polarity display With automatic switching

Measuring rate 40 measurements per second and display

refresh

Digital Measured Value Display

Resolution /

char. height 320 x 480 dots, 12 mm

Number of places 31,000 / 3100

4%-place in the V, A, Hz and Ω measuring functions, depending on parameter setting

Overflow display "OL" is displayed for ≥ 31,000 digits

or ≥ 3100 digits

Polarity display "-" (minus sign) is displayed

if plus pole is connected to "L"

Measuring rate 10 and 40 measurements per second with

the Min-Max function except for the capacitance, frequency and duty cycle measur-

ing functions

Refresh Rate 2 times per second, every 500 ms

Power Supply

Battery module 3.7 V, 4000 mAh, LiPo

 $\mbox{(approx. 25\% self-discharge per year)} \label{eq:approx. 25\% self-discharge per year)} Service life <math display="block">\mbox{Approx. 20 hours (without } \mbox{M}\Omega_{ISO} \mbox{ mea-}$

surement / R_{Lo} / R 4-wire)

Battery indicator Battery capacity display via battery sym-

bol: , querying of momentary charge

level via menu function

Power OFF function The multimeter is switched off automatically:

- When battery voltage drops to below

approx. 3.6 V

 If none of the keys or the rotary switch are activated for an adjustable duration (10 to 59 min.) and the multimeter is not in the continuous operation mode

In the continuous operation mode

Rechargeable battery modules can only be recharged externally.

Measuring Function	Nominal Voltage U _N	Resistance of the DUT	Service Life in Hours	Number of Possible Mea- surements with Nominal Current per VDE 0413
V 			20 ¹	
V ~			15 ¹	
RINS	100 V	1 ΜΩ	5	
	100 V	100 kΩ		300
	500 V	500 kΩ		60
	1000 V	2 MΩ		20

¹ Times 0.7 for interface operation

Electrical Safety

Protection category II per EN 61010-1:2010/VDE 0411-

1:2011

Measuring category CAT III CAT IV Nominal Voltage 1000 V 600 V

Pollution degree 2

Test voltage 7.4 kV~ per EN 61010-1:2011/

VDE 0411-1:2011

Electromagnetic Compatibility (EMC)

Interference emission EN 61326-1:2013 class B

Interference immunity EN 61326-1:2013

Short-term measured value deviation of up to 10% may occur during electromagnetic interference thus reducing the specified operating quality.

TRMS Multimeter with Insulation Measurement and Short-Circuited Coil Test

Ambient Conditions

0 °C to +40 °C Accuracy range

Operating temperatures (Storage temperature

-10 °C ... +50 °C with batteries)

-20 °C ... +50 °C with rubber holster Storage temperatures -25 °C ... +70 °C (without battery) 40 to 75%, no condensation allowed

To 2000 m Elevation

Deployment Indoors, except within specified ambient

conditions

Data Interface

Relative humidity

Туре Bluetooth 4.2 2.402 ... 2.480 GHz Frequency band Transmitting power max. 91 mW

- Query measuring functions **Functions**

and parameters

- Query momentary measurement data

Internal Measured Value Storage

Memory capacity 64 MBit for approx. 300,000 measured

values with indication of date and time

Mechanical Design

Housing Impact resistant plastic (ABS) 235 x 105 x 56 mm (without rubber Dimensions

holster)

Weight Approx. 0.7 kg with battery module Housing: IP 52 (pressure equalization by Protection

means of the housing)

Excerpt from table on the meaning of IP Codes

	(1 st digit X)	foreign object entry	(2 nd digit Y)	penetration of water
ı	0	not protected	0	not protected
l	1	≥ 50.0 mm dia.	1	vertically falling drops
	2	≥ 12.5 mm dia.	2	vertically falling drops with enclosure tilted 15°
l	3	≥ 2.5 mm dia.	3	spraying water
	4	≥ 1.0 mm dia.	4	splashing water
ı	5	dust protected	5	water jets
