

VNE2

Monofunction panel meter for
electrical measurements

VNE2 is a 20,000-point monofunction digital panel meter 72 x 24 mm for electrical measurements in voltage, current and process signals.

Description

VNE2 is a 20,000 point monofunction digital panel meter 72 x 24 mm for electrical measurements in voltage, current and process signals. It is particularly adapted to measurements in industrial areas: robust housing, connection through a removable screwing connector, high immunity to external noises, several types of power supply. AC current measurement can be performed using an external transformer insuring a good insulation to the instrument in regards to line potentials.

- Panel meter size: 72 mm x 24 mm
- IP40 protected
- Measurement and display of:
 - DC and AC voltage up to 650 V
 - DC current up to 1,000 A with an external shunt
 - AC current up to 200 A
 - Process
- 9 different power supplies available
